

HB530: Health Occupations - Pharmacists - Administration of Vaccinations
Ingrid Antonelli
Oppose

I oppose to this bill because of several reasons -

- Pharmacists are not trained in the assessment of a child before vaccination. This is why current law included the need for a prescription from a physician.
- This is a push for the HPV vaccine. Pharmacies would love to incentivize families and get this into as many kids as possible to raise their revenues. Kids health is not the consideration, profits are.
