

Members of the Health and Government Operations Committee,

I am writing as a concerned parent to 5 kids ranging age 5-25. The free use of these needles and possible disposable on school grounds and playgrounds is a huge possible safety issue. Also not to mention that this breaks the ability or patents to possibly of awareness if their child is obtaining these needles for a habit that may be hidden by the minor, not allowing the parent to intervene to get the proper help for their minor child. This should not be a choice the school has in distributing over a parental consent. Please consider not pushing or passing this bill!

Thankyou
