**TESTIMONY OF THE CRITICAL ISSUES FORUM: ADVOCACY
FOR SOCIAL JUSTICE OF MONTGOMERY COUNTY, MARYLAND
ON MARCH 3, 2020
BEFORE THE SENATE JUDICIAL PROCEEDINGS COMMITTEE
IN SUPPORT OF SB 958 UNTRACEABLE FIREARMS ACT**

Honorable Chair William Smith, Vice-Chair Jeffrey Waldstreicher, and Members of the Senate Judicial Proceedings Committee:

The Critical Issues Forum: Advocacy for Social Justice (CIF), which was formed by a group of synagogues in Montgomery County, appreciates the opportunity to provide its testimony in support of SB 958, the Untraceable Firearms Act. Comprised of Temple Beth Ami, Kol Shalom, and Adat Shalom, CIF represents over 1,750 households and three branches of Judaism: Reform, Conservative, and Reconstructionist. CIF serves as a vehicle for our congregations to speak out on policy issues that relate to our shared values.

Jewish tradition emphasizes the sanctity and primary value of human life. The Bible commands us, "Thou shalt not murder" (Exodus 20:13) and "Do not stand idly by the blood of your neighbor" (Leviticus 19:16). The Talmud teaches us that "he who takes one life it is as though he has destroyed the universe and he who saves one life it is as though he has saved the universe"(Mishnah Sanhedrin 4:5). Gun violence is a widespread problem in our society and we must address the issue in its various forms, from mass shootings and hate crimes to domestic violence and suicide. CIF is committed to supporting common sense laws that save lives and thus affirm the value of all human life.

Enforcement of our criminal laws is dependent on being able to trace firearms, and assuring the safety of our citizens in airplanes and public buildings is dependent on being able to detect firearms through metal detectors. Both of these essential law enforcement activities are undermined by the advent of ghost guns. Ghost guns, which include firearms assembled from kits or made with 3D printers, are untraceable by law enforcement and often undetectable by metal detectors. Such guns do not have a serial number or markings that identify the manufacturer or importer, make, model, and caliber. Without this identifying information, law enforcement cannot run a trace search on a firearm, making it difficult if not impossible to determine the chain of custody of the weapon. Further, these guns may be produced largely from plastic and thus are undetectable by traditional security scanning systems. Finally, buyers of "unfinished" gun parts or components are not required to undergo a background check

under federal law. In short, ghost guns are deadly, yet untraceable and undetectable, weapons that can be legally owned by an individual who has not been subject to -- and perhaps could not pass -- a background check.

SB 958 addresses these urgent law enforcement threats by prescribing the following:

1. A person (other than a federally licensed firearms dealer, manufacturer, or importer), may not manufacture, possess, sell or purchase a firearm manufactured using a 3D printer;
2. A person may not manufacture, possess, sell or purchase a covert or undetectable firearm;
3. A person may not manufacture, possess, sell or purchase a firearm that is not imprinted with a serial number.

SB 958 thus imposes common-sense, reasonable legal prohibitions on the manufacture, sale and possession of undetectable and untraceable ghost guns. If HB 910 is passed, Maryland would join five other states that have enacted laws that address these issues: California¹, Connecticut², New Jersey³, Washington⁴, and New York⁵.

Untraceable guns are increasingly used by illegal gun trafficking rings across the country, and ghost guns have been used in multiple recent shootings.⁶ This is a real issue in Maryland. A student at Clarksburg High School, one day after the Parkland, Florida school massacre, brought a home-built gun to his school. In the student's home an AR-15 rifle was also found to be in mid assembly.⁷ In 2019, a Montgomery County man was arrested for selling ghost guns. Prosecutors said he had sold the guns to drug dealers, heroin users, robbers and gang members.⁸ In 2016, the Baltimore police responded to an incident involving a man armed with a ghost gun: an AR-15 style rifle loaded with armor piercing bullets. The man was a violent repeat offender.⁹

This is a growing issue. Gun tracking statistics are hard to find as the type of gun is not always tracked. But since 2017, police in Montgomery County have recovered 60 ghost guns. Last year, Prince George's police found 63 ghost guns. Baltimore police have found a "major uptick in ghost gun seizures over the last year." This is also an issue in nearby Philadelphia and the

District of Columbia. An overview of recent police seizures of ghost guns was described in a front-page story in the February 28, 2020 Washington Post. The District is considering emergency legislation to address ghost guns.¹⁰

SB 598 does not prevent individuals from continuing to build their own firearms provided that they are imprinted with a serial number obtained from a Federally licensed manufacturer or importer.¹¹ This legislation provides additional tools for law enforcement in fighting crime by reducing untraceable and undetectable firearms in Maryland.

The Untraceable Firearm Act provisions are positive measures to responsibly regulate firearms. CIF urges this committee to favorably report legislation to ensure that firearms are traceable and detectable, thereby assisting law enforcement in fighting and preventing crime and ensuring the security of all of us.

**SB 958-Support
Ghost Guns
Elizabeth Banach, Executive Director
Marylanders to Prevent Gun Violence
Judicial Proceeding Committee**

March 3, 2020

Dear Chairman Smith, Vice-Chair Waldstreicher, and Members of the Committee,

Marylanders to Prevent Gun Violence is a local, grassroots organization dedicated to reducing gun deaths and injuries throughout the state of Maryland, with a particular focus on reducing urban gun violence and gun suicide. **We urge the committee to vote FAVORABLY on Senate Bill 958 to prohibit untraceable and undetectable firearms.**

This piece of legislation seeks to address firearms that are untraceable by law-enforcement. These self-assembled firearms—which can be built from kits or 3D printed—are referred to as ghost guns because they do not come with a serial number and are untraceable. In the traditional manufacturing process, the firearm manufacturer or importer will affix a serial number and markings that identify the manufacturer or importer, make, model, and caliber. Using this information, the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) can track firearms from the manufacturer or importer through the distribution chain to the first retail purchaser. ATF works extensively with other law enforcement agencies to trace firearms using this technique.

Tracing is a powerful investigative tool, but it is dependent on the ability to identify firearms based on their serial numbers. Because the purveyors of the parts and kits used to make untraceable guns claim that they are not selling firearms, they also assert that these serialization requirements do not apply to them. Without a serial number, law enforcement cannot run a trace search on a firearm, making it difficult, if not impossible, to determine the chain of custody from the gun itself.

Furthermore, these guns may be produced largely or even entirely from plastic, which can render them undetectable by traditional security scanning systems. Ghost gun purveyors thus provide access to untraceable, undetectable firearms to individuals who have not passed—and potentially could not pass—a background check.

Law enforcement in certain parts of the country are already seeing an alarming increase in the number of ghost guns being recovered in investigations. According to the ATF, California is seeing 30% of recovered guns as un-serialized weapons. MPGV urges action

on this before we see these numbers reflected everywhere. We ask for a FAVORABLE report on SB 958.

Unitarian Universalist Legislative Ministry of Maryland

Shared Voices for Liberal Religious Values in Maryland

Testimony in Support of SB 958 Pubic Safety - Criminal Law - Untraceable Firearms

TO: Chairman Smith and Members of the Judicial Proceedings Committee

FROM: Janice Bird, MD, Co-Chair, Gun Violence Task Force, Unitarian Universalist Legislative Ministry of Maryland.

DATE: March 3, 2020

Gun violence affects all of us. So why would anyone want to allow untraceable guns, including 3D printed guns and firearms assembled from kits, without serial numbers to exist? They cannot be traced and can otherwise circumvent Maryland's regulated firearm registry.

We, as Unitarian Universalists, believe that we all belong to an interconnected community responsible for the safety and well-being of all. Wendi Winters was one of our faith, and a beloved, vibrant member of our Annapolis congregation. She was a victim of gun violence at the Capital Gazette shooting in June 2018.

Common sense gun laws save lives! This bill is a means to keep criminals and domestic abusers from gaining access to untraceable "ghost" guns.

Some of you were Maryland legislators when the Firearms Act of 2013 was signed into law. These measures have been effective in decreasing gun violence without compromising the rights of law-abiding citizens.

We ask our legislators to stand on the side of love and justice and vote for this bill and others that will strengthen Maryland's gun violence prevention laws to further limit the ability of dangerous and irresponsible individuals access to firearms.

The measure before you today is another tool for law enforcement to protect the people from gun violence. We urge a favorable report.

BILL NO.: **SB 958**

TITLE: Criminal Law – Untraceable Firearms

SPONSOR: Senator Lee

COMMITTEE: Judicial Proceedings

POSITION: **SUPPORT**

DATE: March 3, 2020

Baltimore County **SUPPORTS** Senate Bill 958 – Criminal Law – Untraceable Firearms, which would prohibit the use of covert firearms, firearms that are undetectable in a security scan, “ghost” guns without serial numbers, and the use of a 3D printer to manufacture firearms.

Firearms manufactured at home using kits or 3D printers have become a prevalent issue in recent years. These guns are often made of plastic, and therefore undetectable on security scans. Additionally, they do not have serial numbers and cannot be tracked by law enforcement. These weapons are increasingly used by illegal gun trafficking rings.

County Executive Olszewski is committed to addressing crime and gun violence in Baltimore County, and it is impossible to properly do so if there are undetectable weapons of war on the streets. These weapons threaten us everywhere, especially the schools where we send our children every day. Passing this legislation closes existing legal loopholes and makes everyone safer.

Accordingly, Baltimore County requests a **FAVORABLE** report on SB 958. For more information, please contact Chuck Conner, Chief Legislative Officer, at 443-900-6582.

FACSIMILE NO.

STATE OF MARYLAND
OFFICE OF THE ATTORNEY GENERAL

WRITER'S DIRECT DIAL NO.

March 3, 2020

To: The Honorable William C. Smith, Jr.
Chair, Judicial Proceedings Committee

From: The Office of the Attorney General

Re: Senate Bill 958 – Criminal Law – Untraceable Firearms - **SUPPORT**

The Office of the Attorney General urges the favorable report of Senate Bill 958 - the “Untraceable Firearms” or “ghost guns” bill. This bill prohibits a person from manufacturing, assembling, constructing, possessing, selling, offering to sell, transferring, purchasing or receiving a untraceable firearm; using a 3-dimensional printer to manufacture, assemble or construct firearms; distributing a computer program relating to the fabrication of firearms with a 3D printer; and possessing a untraceable object marketing or advertised to be designed for purposes related to the fabrication of firearms. Any violator would be guilty of a misdemeanor and on conviction, subject to maximum penalties of imprisonment for two years, and/or a \$5,000 fine. The purpose of this legislation is to address the growing threat of untraceable firearms, or “ghost guns.”

Generally, when a firearm is manufactured or imported into the United States, it must be marked with a serial number and additional information about the manufacturer and/or importer. Then, when it is sold in Maryland, a background check is conducted on the consumer and the retailer retains records of the transaction – enabling the “tracing” of records. However, “ghost guns” disrupt this traditional process, and provide a loophole around Federal and State gun laws.

This loophole is created because ghost gun purveyors sell unfinished parts of a firearm, rather than the whole firearm – thus, it does not qualify as a “firearm” for purposes of Federal and State law. The unfinished parts then are easily made into a firearm with very little effort on the part of the purchaser. This process allows the purchasers to go undetected, and un-checked for purposes of background checks. In addition, law enforcement officers are increasingly

encountering trafficking rings that are mass-manufacturing and selling untraceable firearms,¹ and often see ghost guns used in shootings by individuals who would not pass a background check, including in Maryland.²

Consistent with the Attorney General's efforts to protect Maryland residents against the dangers of firearms and gun violence, Senate Bill 958 closes the loophole that allows for untraceable guns in Maryland. By prohibiting the possession or sale of unserialized, untraceable guns, this legislation will make it much more difficult to obtain and use ghost guns in Maryland.

For the reasons stated above, the Office of the Attorney General urges a favorable report of Senate Bill 958.

THE EPISCOPAL DIOCESE OF MARYLAND

Testimony of the Rev. Kenneth O. Phelps, Jr.

Rector, All Saints Episcopal Church, Sunderland, MD; Member, Maryland Episcopal Public
Policy Network (Diocese of Maryland)

Before the Senate Judicial Proceedings Committee

IN SUPPORT of SB 958

Criminal law – Untraceable Firearms

March 3, 2020

Chair Smith, Vice Chair Waldstreicher, and Members of the Judicial Proceedings Committee:

Non-violence is at the core of Christian faith and practice. The teachings of Jesus – as contained in the New Testament – call the faithful to a rejection of a system of retribution and righteous violence and into an alternative way of living that is based on unconditional love of neighbor and accountability for the common good.

We cannot normalize violence or contemplate its use ever as being for the right. And, we do not believe that the answer to escalating gun violence is an increase in the number of guns on the street.

Over the years, our bishops have called for common sense gun safety measures that enjoy the support of gun owners and non-gun owners alike: handgun purchaser licensing; background checks on all gun purchasers; restrictions on gun ownership by domestic abusers; classification of gun trafficking as a federal crime; encouragement for the development of “smart gun” technology; and, federal funding for research into gun violence prevention strategies. Our Church has passed numerous resolutions calling for many of these measures.

We now add to that list our support of this ban on the production, possession or sale of all ‘ghost guns.’

Among other prohibitions, this Bill prohibits the use of a 3 D printer to assemble a firearm, the distribution of a program that shows how to assemble the firearm, and also the sale or possession of an untraceable firearm.

The Bill is in line with current trends including the efforts of a coalition of 20 states including Maryland, that are suing the federal government to challenge the Trump Administration’s plan to allow people to share 3 D printed gun blueprints on line.

According to the Giffords Law Center “ghost guns” are typically untraceable and can be made with a printer that can be purchased by anyone for under \$200.00

California Law Enforcement reports that ghost guns were used in several rampages in their schools killing a total of 13 people in the last several years.

We urge a favorable report.

Destini Philpot_FAV_SB958

Uploaded by: Philpot, Destini

Position: FAV

Thank you, Chairman and Members of the Committee. My name is Destini Philpot. I'm a 19-year-old non-binary person from Baltimore City, I'm a leader with Students Demand Action Baltimore and a survivor of gun violence. To elaborate, I myself became a victim of gun violence when I was 7 years old. It was around the age of 3 that I first remember tracing a healed bullet wound on my father's stomach, not knowing what it was. At the age of eight, shots rang out from a park that I had been at with my siblings, all too familiar sounds. I was lifted off my feet by my sister and remember seeing a trail of blood flowing into the storm drain. I have lost 12 close friends to gun violence in the past two years and far more than that in my lifetime.

In Baltimore and across the country, we not only have a gun violence crisis, we have a crisis of unsolved shootings. Right now, the odds that police will solve a shooting are way too low. People who shoot someone are about half as likely to be arrested as people who kill or assault someone with other weapons. As with gun violence, the burden of unsolved shootings disproportionately impacts black and brown communities. When someone is fatally shot, white victims can expect an arrest 53% of the time, but if the victim is black or Latinx, the arrest rate is only 35%.

When police find a gun at a crime scene, they can use the serial number to do a trace to learn where it came from. With ghost guns, they can't, which means more unsolved murders. The systemic failure to solve gun crimes fuels more violence. Shooters walk free, people lose more faith in the police, and some decide to try to find justice on their own. There are already too many unsolved murders in our city and the proliferation of ghost guns would make investigations even more difficult. Gun violence does not affect "numbers and statistics." It affects real people. Real lives, families and communities are destroyed when we do not take the necessary steps to prevent the use and distribution of ghost guns.

Ghost guns may not seem to be a big part of the crisis now, but it's going to make the crisis worse if we don't do something about it. Thank you for your time.

**TESTIMONY IN SUPPORT OF SB 958,
AN ACT CONCERNING
CRIMINAL LAW – UNTRACEABLE FIREARMS**

TO: THE SENATE JUDICIAL PROCEEDINGS COMMITTEE

SUBMITTED BY: DAVID PUCINO
STAFF ATTORNEY, GIFFORDS LAW CENTER TO PREVENT GUN VIOLENCE

DATE: MARCH 3, 2020

Chair Smith, Vice Chair Waldstreicher, and Members of the Judicial Proceedings Committee: thank you for the opportunity to provide this testimony on behalf of Giffords Law Center to Prevent Gun Violence, the legal arm of the organization founded by former Congresswoman Gabby Giffords. I am writing in support of Senate Bill 958, “An Act Concerning Criminal Law – Untraceable Firearms,” which addresses the growing threat of untraceable firearms, often referred to as “ghost guns.”

Traditionally, when a firearm is manufactured or imported into the United States it must be marked with a serial number and additional information about the manufacturer and/or importer. Then, when it is sold by a retailer to a consumer, a background check is conducted on the consumer and the retailer retains records of the transaction. This process, which is imposed by federal law, is critically important for gun safety. When it works correctly, it prevents individuals who are prohibited from possessing firearms from buying one from a firearms retailer; it discourages trafficking; and it enables a critical law enforcement process known as “tracing.” Law enforcement use tracing as a tool when a firearm is recovered from a crime scene: using the serial number, the firearm can be traced through a chain of custody to the point of its first retail sale. Tracing is a key tool for law enforcement investigations that involve firearms.

Ghost guns disrupt this traditional process. Ghost gun purveyors avoid the range of federal laws pertaining to firearms by selling a set of parts that falls just short of the federal definition of “firearm.” Federal law defines a “firearm” as, among other things, “any weapon (including a starter gun) which will or is designed to or may readily be converted to expel a projectile by the action of an explosive” or “the frame or receiver of any such weapon.”¹ The frame or receiver—a “frame” on a handgun, or a “receiver” on a long gun—is the key component of the firearm that houses the firing mechanism.

Because a frame or receiver is characterized as a “firearm” under federal law, it is this component, and this component alone, that must carry a serial number, and that requires a background check before sale. Once an individual has acquired a frame or receiver, he or she can

¹ 18 U.S.C. § 921(a)(3).

obtain the rest of the parts needed to assemble a firearm without having to pass a background check.

To avoid federal firearm laws, ghost gun purveyors do not sell frames or receivers; instead, they sell “unfinished” frames or receivers, components that have been machined so that they are almost fully functional frames or receivers, but are not considered “frames” or “receivers”—and therefore are not considered “firearms”—for the purposes of federal law. As a result, ghost gun purveyors can sell unfinished frames and receivers, often packaged with all of the other components needed to assemble a firearm, without serializing the product and without conducting a background check. Their customers can then take the package, drill out the few holes needed to convert the “unfinished” piece into a fully functional frame or receiver, and use it to assemble an unserialized, untraceable firearm.

Ghost guns present a grave and growing danger to the public. Law enforcement are increasingly encountering trafficking rings that are mass-manufacturing and selling untraceable firearms.² And ghost guns are increasingly being used in shootings, particularly by individuals who would be unable to pass a background check.

To list just a few examples:

- A man who failed a background check and could not legally purchase a gun built an assault rifle from a ghost gun kit, then used it on a rampage at a college campus, firing 100 rounds and killing five people.³

GIFFORDS

COURAGE TO FIGHT GUN VIOLENCE

Montgomery County after supplying ghost guns to organized crime members and other persons prohibited from possessing a firearm.¹¹

SB 958 would protect Maryland residents from these dangers by cutting ghost gun makers off at the source. It would prohibit the possession and sale of unserialized, unfinished frames and receivers, which are the building blocks of not just individual ghost guns but the entire ghost gun industry. By requiring that these products be serialized in accordance with federal laws and regulations for the serialization of completed firearms, it would close the loopholes that the purveyors of these dangerous products exploit, and would thus make it much more difficult to obtain an untraceable firearm in Maryland.

I therefore request a favorable report of SB 958. I am happy to answer any questions about my testimony, or to otherwise be of service to the Committee.

Respectfully Submitted,

David Pucino
Staff Attorney
Giffords Law Center to Prevent Gun Violence

ABOUT GIFFORDS

Giffords is a nonprofit organization dedicated to saving lives from gun violence. Founded and led by former Congresswoman Gabrielle Giffords, Giffords inspires the courage of people from all walks of life to make America safer.

Testimony of Brady United Against Gun Violence
Support for SB 958
Before the Maryland Senate Judicial Proceedings Committee
March 3, 2020

Chairman Smith, Vice Chair Waldstreicher, and Other Distinguished Members of the Maryland Senate Judicial Proceedings Committee,

Founded in 1974, Brady works across Congress, courts, and communities, uniting gun owners and non-gun owners alike, to take action, not sides, and end America's gun violence epidemic. Our organization today carries the name of Jim Brady, who was shot and severely injured in the assassination attempt on President Ronald Reagan. Jim and his wife, Sarah, led the fight to pass federal legislation requiring background checks for gun sales. Brady continues to uphold Jim and Sarah's legacy by uniting Americans from coast to coast, red and blue, young and old, liberal and conservative, to combat the epidemic of gun violence.

Brady thanks the Committee for taking action on this critical legislation. Senate Bill 958 provides a strong defense to impact and proliferation of untraceable firearms.

There are evidence-based policy solutions that we know will address the gun violence epidemic in Maryland. And make no mistake, gun violence is an epidemic, both nationwide and in the state of Maryland. Over 650 people die in Maryland each year, on average, due to firearms. Unlike most states, however, the majority of these deaths are due to homicide, which takes the lives of almost 400 Marylanders per year.¹ Much of this high homicide rate is driven by the disproportionate number of injuries and deaths: 2019 was the second deadliest year on record for the city of

¹ Everytown for Gun Safety, "Gun Violence in Maryland,"
<https://everytownresearch.org/wp-content/uploads/2019/10/Every-State-Fact-Sheet-Maryland.pdf>.

Baltimore, with nearly 350 homicides in a single year.² Firearms are the leading cause of death among both kids and teens in the state of Maryland.³ We can expect that all of these numbers to increase with unregulated access to unserialized firearms.

“Ghost Guns” are unserialized and untraceable firearms that can be made by individuals. Typically, ghost guns are constructed from gun components including unfinished receivers or “80 percent receivers,” which are often sold by online dealers as a part of a kit that includes all of the necessary component parts to turn the unfinished receiver into a fully functioning gun.⁴ Receivers are the the part of the firearm that contains the operating parts of the firing mechanism. 3-D printed guns are another type of unserialized and untraceable guns, which are printed with a 3-D printer using a specific code or program made available online. These parts and processes have all been specifically designed to fall outside of federal, state and local gun regulations.

Ghost guns and 3-D printed guns make it easy for prohibited purchasers to bypass a background check as required by federal and state law. This is a significant risk to public safety. Currently, in Maryland, private sales of firearms must be processed through a licensed dealer or designated law enforcement agency in order to conduct a federal criminal background check.⁵ This process works to prevent those prohibited from owning firearms, like felons and domestic abusers, from gaining access to handguns. And yet, in Maryland it is legal, and not particularly difficult, to purchase and assemble a ghost gun without having to comply with any of these legal obligations.⁶

Unregulated, 3-D printing technology also allows individuals to gain access to weapons the state has already decided to prohibit. For example, 3-D printers can be used to manufacture high capacity magazines, despite the fact that Maryland has banned the purchase or transfer of high capacity magazines.⁷ Similarly, while Maryland has enacted an assault weapons ban, residents of Maryland can go online and **legally** purchase the component parts of an AR-15 style assault rifle, and then easily assemble the gun at home.

⁷ Md. Code Ann., Crim. Law § 4-305(b)

Ghost guns, whether handguns or assault weapons, have no serial numbers and are essentially untraceable by law enforcement. These weapons are, by design, perfect crime guns.⁸ Because Maryland has continued to prioritize public health and safety by enacting life saving gun safety laws that regulate traditional firearms, ghost guns are, and will continue to become more and more prevalent. It is critical to act now proactively to prevent this from happening. Maryland is not the first state to understand the dangerous nature of ghost guns. New York, New Jersey, Connecticut, California and Washington have all taken action to regulate or ban ghost guns, and several other states are considering similar legislation.

The bill before you today, SB 958, is comprehensive and provides a strong defense to the proliferation of ghost guns. This legislation is necessary to protect Marylanders, to ensure that ghost guns do not become a source of crime guns in the state, and to guarantee that federal law and Maryland state law is not circumvented.

Unserialized and untraceable guns are designed for crime?

Ghost guns are unserialized and untraceable firearms that can be manufactured by individuals with parts that can be obtained without a background check. Ghost guns can be assembled by individuals with parts sold by companies or “ghost gun dealers.” One common ghost gun part sold is an 80% receiver, which is designed to fall just outside of the federal definition of a “firearm” so as to evade federally required background checks and other regulations applicable to “firearms.” These parts require very limited additional alteration before they can be easily combined with other largely unregulated gun parts, which are often included in available assembly kits, to form a fully functioning “ghost gun.”⁹ Ghost gun parts/kits enable anyone, including individuals prohibited from possessing firearms or residents of states that have banned the sale and transfer of assault weapons, to build “ghost guns.”

The process of converting parts into a ghost gun, whether it be a semi-automatic handgun or an AR-15 style assault rifle, involves just a few steps and can be completed in as little as a 15 minutes without the consumer possessing any specialized skill or abilities. Once assembled, ghost guns are just as deadly and dangerous as traditional firearms and anyone can buy these kits without any background check or any other requirement mandated under federal or Maryland state law.

⁸ Giffords Law Center Asks Internet Service Providers to Immediately Shut Down Websites for Businesses that Allow Dangerous Individuals to Make Untraceable Assault Weapons with No Background Checks, Giffords Law Center to Prevent Gun Violence,(November 28, 2017)

⁹ Baca, “Ghost Guns: Untraceable firearms in hands of hobbyists, felons, and children,” ABC7 (2018), <https://wjla.com/features/7-on-your-side/ghost-guns>

These weapons undermine and interfere with criminal investigations. Ghost gun dealers and manufacturers purposefully choose not to stamp serial numbers on these parts or other parts included in their firearms assembly kits. Thus they are essentially invisible to law enforcement. This means that the The Bureau of Alcohol, Tobacco, Firearms & Explosives (ATF) cannot trace “ghost guns” from the manufacturer/importer to the retail purchaser, making it harder to identify the chain of possession and ultimate user of a gun recovered from a crime scene. In fact, if found at a crime scene, law enforcement has little means by which to trace the weapons’ origin or ownership. This untraceable quality also interferes with law enforcement’s ability to identify potential traffickers and to detect in-state and interstate patterns in the sources of crime guns. This makes the parts/kits used to assemble these weapons highly attractive to criminals and illegal gun traffickers.

The fact that these kits and parts can be purchased online with no background check, without having any human interaction (like with a federally licensed firearm dealer) also makes them attractive and accessible to individuals who fear they may not be able to pass muster at a responsible licensed dealer. This blatantly undermines both Maryland and federal law.

Ghost gun sellers and manufacturers know all of this and intentionally target prohibited purchasers, and other dangerous parties, by purposefully emphasizing the untraceable nature of “ghost guns,” namely, the absence of a serial number and the fact that their products can be purchased without a background check or interaction with a gun dealer as major selling points.

3-D printing will increase access to untraceable guns

Recent technology has opened the door to a new type of dangerous unregulated ghost gun--firearms and high capacity magazines made with three-dimensional printers (“3-D printers”). In 2012, a company called Defense Distributed began exporting technical data related to firearms through the publication of Computer Aided Design (“CAD”) files, without restriction, on the Internet. These CAD files are essentially blueprints for the creation of guns and gun components via a 3-D printer.

Similar to traditional ghost guns, 3-D printed guns are manufactured without serial numbers and cannot be traced by law enforcement, and therefore undermine criminal investigations and circumvent federal law and Maryland law. Also, 3-D printed ghost guns can be made entirely of plastics, rendering most modern security devices like metal detectors ineffective in detecting the presence of the weapon.

This means that anyone, even those who have been deemed unfit to possess a firearm, could be armed anywhere and at any time. For example, a person prohibited from purchasing a firearm could manufacture a firearm on a 3-D printer, and then could evade metal detectors at an airport or in a courthouse without any problem. The risks of this are incalculable.

The Rapid Proliferation of Ghost Guns in the United States and in Maryland

The sale of ghost gun parts/kits have increased significantly in recent years and along with their proliferation, the use of ghost guns in crimes has also increased exponentially. In recent history, ghost guns were used in three separate mass shootings in California: in Saugus (2019), Tehama County (2017), and in Santa Monica (2013). These mass shooting incidents took the lives of 12 people, including two teenagers, and dozens more were shot and injured. Both the Tehama and Santa Monica shooters were prohibited from purchasing or possessing firearms and they both used assault style weapons, violating California's assault weapon ban. The Saugus shooter was a minor who was not legally able to possess any firearm under California law.¹⁰ Despite this, each of these shooters were able to get their hands on ghost guns. The implication of ghost guns is not limited to mass shootings-access to ghost guns has created an entirely new source of crime guns, and now account for 30 percent of all crime guns recovered in California.¹¹

California, like Maryland, has enacted strong gun safety laws, and the proliferation of ghost guns can be seen as direct response to these laws. This should be a strong warning to Maryland and should instruct legislators on what could happen if they do not act proactively to prevent the increased presence of the weapon in Maryland.

The reality is that ghost guns have already started popping up in the hands of dangerous or prohibited purchasers in Maryland. In February of 2018, a Montgomery County high schooler brought a homemade handgun to his school. The 17 -year -old was also in the middle of making an assault style rifle at home.¹² In August of 2019, a man was arrested for possessing a loaded ghost gun. The man was already on probation for a prior handgun violation in Baltimore.¹³ In December

of 2019, a man living in Silver Spring pled guilty for selling ghost guns to prohibited purchasers.¹⁴ The FBI arrested three men in Maryland on January 16, 2020 for planning to incite racial violence using homemade guns. The men had made an assault style ghost gun which they planned to use at the January 20, 2020 gun rights rally in Richmond and specifically discussed using the guns to kill police officers and to encourage a “race war.”¹⁵ We can only expect that this trend will continue if no action is taken.

These unregulated and untraceable weapons are both being made and transported into Maryland, into the criminal market, and into the hands of those prohibited from owning firearms. It is important to act proactively and aggressively to prevent the continued proliferation of these weapons.

For these reasons, Brady strongly urges the Maryland Senate Judicial Proceedings Committee to report SB 958.

THE SENATE OF MARYLAND
ANNAPOLIS, MARYLAND 21401

March 3, 2020

Senate Judicial Proceedings Committee

SB 958 - Criminal Law - Untraceable Firearms (“Ghost Guns”)

Senate Bill 958 is a mechanism to plug one of the last remaining background check loopholes for firearms in Maryland. This home-made untraceable firearm or “Ghost Gun” bill does much more than ban 3D printed guns that can avoid detection. Ghost Guns are used in crimes throughout Maryland and across the county, because they are untraceable and don’t require a background check to acquire.

There is no reason to lawfully permit functioning guns to be assembled without requiring a check for lawful ownership. We often are told at these hearings that “guns don’t kill people, people do,” but the people who want ghost guns to avoid a background check should be people of concern. Allowing people to access untraceable guns without a background check enables crime and makes it more difficult to solve crimes after the fact. With the Governor calling for action to fight crime, and the rise of MS-13, SB958 is a necessary tool to address both concerns.

Without getting too technical, the 80% rule for lower receivers makes it too easy for individuals to manufacture guns without serial numbers, while also bypassing a background check. There are videos and kits to help you finish the gun at home. Perhaps these hobbyists need a greater challenge and we should lower the 80% threshold or require 80% finished guns to have a serial number attached to them. Until the federal government comes to their senses, we can at the very least regulate background checks at the state level. If you were to buy a car that was 80% complete and finished it in your garage, you would still need a license to drive it, as well as insurance and registration. This is no different, except one can complete a gun with little prior skill, and working on new cars has gotten very complex.

The Undetectable Firearms Act of 1988 already makes 3D printed guns that are “undetectable” illegal under federal law. This bill adds a state crime that covers similar devices. 3D printed guns are a subcategory of ghost guns if they are not marked with a serial number, but they can also be considered “covert” guns if they are constructed to be difficult to detect with a metal detector. The dangers of these devices are mostly on the horizon, but that is where we stand, and a state prohibition is sensible

with the rise of this new technology. We can never fully remove the danger of access to these devices, but we can use criminal and civil penalties to discourage these devices from being sold and assembled.

Ghost Guns are found everywhere, but in Maryland many jurisdictions just don't track the collection of ghost guns from crime scenes. As a comparison metric, however, in California, 30% of guns seized at crime scenes are ghost guns. We likely have similar numbers in Maryland because ghost guns proliferate as a way to subvert background checks in states with relatively strong background check laws. These laws however are meaningless if they can easily be subverted, both legally and illegally. Not all criminals are violent, but all violent criminals are dangerous, and with access to guns without background checks, we allow them to be more dangerous than they would be with less access to firepower. We have disqualifying crimes to own guns and gun tracing techniques to protect Marylanders, and these protections shouldn't be nullified because someone happens to have the technical skill to follow a kit's instructions or has access to YouTube.

Gangs like MS-13 like these guns because they can swap barrels and other features of the guns to make them harder to trace. Parts can be discarded and replaced cheaply online to avoid ballistic matches. These groups have been known to kill with different methods, and while we can't prevent them from buying machetes, we can help prevent them from buying gun parts online with this law. If our most dangerous gangs have a harder time getting disposable guns, that is a win for Maryland.

Ghost guns include handguns and assault rifle type firearms, and they have also been used in mass killings, such as the Tehama and Santa Monica shootings that took the lives of 12 people. The Saugus shooter was a minor who was not legally able to possess any firearm under California law. The shooter in Santa Monica constructed the gun after he failed a prior background check. He then used the gun he assembled to kill five people and injured 4 others. Two years prior to the killing, California's background check laws blocked his purchase based on a mental health concern and a prior run-in with police. There, the background check was circumvented because he bought parts from other states online and assembled the assault type gun himself.

These are several examples of ghost gun killers, that within Maryland, would not currently be prosecuted for mere possession of the weapon, unless the gun was sold to someone else. There are some crimes on the book that would make unlawful possession subject to serious penalties, but if our law allows them to make killing machines, we haven't used our tools to protect our citizens and reach a peace and justice equilibrium. Liberty is essential as well, and we don't want to infringe upon any rights. But allowing the exception to swallow the rule, as we do with Ghost Guns, favors chaos not liberty.

We should allow law enforcement to prosecute individuals who possess these guns and have not undergone background checks, period, full stop. If you are able to pass a background check, you should undergo one to acquire or build these guns, if not, you should not have deadly firearms. We can work out the nuances of this bill, and find a reasonable solution to a growing threat. To further close a loophole to background checks, and to better be able to solve violent crimes, we must pass a bill to regulate Ghost Guns. We are willing to work with everyone to do so. This bill should not wait another year to become law, in one form or another.

For these reasons, I respectfully request a favorable report on SB 958.

Santa Monica Shooter Built His Gun From Parts He Bought Online

06/15/2013 01:35 pm ET | **Updated** Aug 15, 2013

Yesterday, we [learned from the Santa Monica Police](#) that the .223 caliber AR-15 type semi-automatic rifle that John Zawahri used to kill five people during his rampage last Friday was assembled from parts he bought through the Internet. To make matters worse, the California gun law had actually previously worked when he was prevented from buying a gun locally in 2011 due to his past record of mental instability that caused a run-in with police. To circumvent the law, Zawahri bought the components over the Internet from sellers in other states, and assembled the rifle himself.

To make your very own AR-15 type rifle, all you need are [Google](#), YouTube, and tools that can be purchased at any home center or tool dealer. To keep from making it easier than it already is, I'm not going to show the links to the sources or the videos here. All of the parts are available without purchasing through an FFL (federal firearms licensed dealer), and the only real fabrication that must be done is to a part called the lower receiver, the part that contains the trigger mechanism and receives the magazine. Completed receivers, which generally carry a serial number, must be sold through an FFL; to get around federal firearms law, many online dealers sell what they call 80 percent lower receivers which are only partially completed. You have to do the rest yourself, which is what Zawahri did to build his rifle. Enforcement of the current law here is muddy at best. Depending on how a lower receiver is fabricated, it can be determined by the ATF to be a firearm or not be a firearm, and it's not completely clear how that is determined, as even [admitted by some](#) gun bloggers. I found one seller who actually said on its website selling 80 percent lowers, "The item is NOT A FIREARM and does not need an FFL. We can ship to most U.S. addresses." Even though it's clear that what they sell are certainly assembled into a firearm, online sellers get away with it by being allowed to say that it's not. If not a firearm, what is it?

Zawahri's ability to assemble a semi-automatic rifle used in this mass-murder, even though he had been denied the purchase of a gun in California, is the glaring textbook example of why, with interstate commerce and the Internet, that state by state regulation of guns and

background checks for all gun purchases, including private sales, and eliminating the ability for just anyone to assemble a working rifle from parts acquired on the Internet. I actually don't believe that an "assault weapons" ban is the best policy. I believe that, along with universal background checks, laws which are consistent state to state on magazine size and ammunition lethality are more critical. The rules here should be simple; not inconsistent and muddy as it is today. Online gun parts sales should be regulated as with actual gun sales: run through an FFL for a background check that is nationwide.

The gun lobby always asserts that there should be no gun laws because criminals won't follow the law. That's nonsensical on the face, and argues for no laws anywhere, including traffic laws because everyone breaks them. The point here is that it's not that criminals won't follow the laws, it's that these laws will make it harder for these law breakers to acquire these weapons to begin with. The California gun law worked in this particular case; Zawahri was prevented from buying a gun locally. What good is that, though, when he could just get online and buy the parts from non-FFL dealers to assemble that same gun? Had laws to prevent him from buying the parts of his rifle online, this is one tragedy that could have been prevented.

In this day of Internet commerce and fast long distance travel, state by state gun laws make no sense. We need a nation wide, consistent set of laws that deny terrorists, criminals, and the mentally unstable easy access to guns, the high capacity magazines, and the massive amounts of ammunition that do so much damage so quickly. It's that common sense approach that so many oppose.

L.A. gangs stockpile untraceable 'ghost guns' that members make themselves

Los Angeles Police Det. Ben Meda holds a handgun during a news conference at the Hollywood station Thursday. More than 40 firearms were seized in a recent joint task force operation, authorities said. (Jae C. Hong / Associated Press)

By RICHARD WINTON
STAFF WRITER

JULY 6, 2018
5 AM

A small arsenal of weapons that authorities seized from gang members during a six-month undercover operation lay across the tables at LAPD's Hollywood station Thursday.

It's not unusual for the Los Angeles Police Department and the Bureau of Alcohol, Tobacco, Firearms and Explosives to grab high-power weapons during these types of

sweeps.

But these AR-15-style semiautomatic rifles and pistols were different — homemade, untraceable “ghost guns” without the traditional serial numbers, built from parts purchased over the internet.

Authorities said they are seeing more gangs turn to homemade guns as it becomes more difficult to acquire real ones.

“Criminals are making their own weapons because they cannot buy them legally ... or they are paying other people to make those guns for them to get around the gun laws,” said Bill McMullan, special agent in charge of ATF’s L.A. Field Division. “This is a trend among Southern California gangs.”

Investigators seized 45 firearms, as well as fake police ballistic vests, and eventually arrested 10 alleged gang members involved in the manufacture and sale of so-called ghost guns to criminals.

These weapons are effectively unknown to law enforcement, making them difficult to track or trace.

Firearms are on display during a news conference at the Hollywood Community Police Station Thursday. More than 40 firearms were seized in a recent joint task force operation, authorities said Thursday. (Jae C. Hong / AP)

Investigators say ghost guns begin as partially manufactured weapons. A buyer can legally purchase a partial built lower receiver, which is not part of a firearm that is required to be stamped with a serial number when sold.

An unfinished lower receiver, sometimes referred to as an “80% receiver,” can legally be purchased without a serial number from a seller who is not a federally licensed firearms dealer as long as it is missing the key components that would make it a firearm.

The lower receiver then can be completed easily by drilling a few remaining holes into the unfinished metal shell. It is then ready for a barrel, trigger mechanism, stock and upper receiver to be attached.

Investigators explain that those forbidden from purchasing a gun, such as felons and those with documented mental health issues, can still buy the partial lower receiver and then buy the other parts of the weapons off the internet.

In 2013, John Zawahri killed five in the Santa Monica area using an AR-15-style rifle, which he built from a partially manufactured lower receiver that did not have a serial number and therefore did not have to be registered. Police said the parts needed to assemble a working rifle, including magazines of ammunition, were shipped in from out of state.

Federal gun regulation has long targeted the lower receiver because it is the heart of the firearm that holds together the weapon.

Ghost guns are legal for those allowed to own firearms, but investigators say they are now involved increasingly in crime. “They are ending up in the hands of some of the most violent gang members,” said LAPD Cmdr. Blake Chow.

Chow said many of the weapons recovered were made in the heart of Hollywood, not a random warehouse. “They manufactured all over Hollywood in the hotels in the community,” he said.

“It was like driving up to fast food restaurant, ordering whatever you wanted, somebody manufacturing it, that person comes to Hollywood, pays the money and they were on their way,” he said.

Investigators seized assault rifle manufacturing equipment and parts along with 3 pounds of methamphetamine, vehicles and a silencer, as well as a stack of bulletproof vests.

At the center of the criminal enterprise was Enrique Saucedo Jr., who detectives say is the primary suspect in the transportation, distribution and sale of illegal firearms in Hollywood and the San Fernando Valley.

Detectives say Saucedo was a pipeline for weapons for street criminals across L.A.

Saucedo was convicted in October of assault with a firearm and sentenced to 364 days in jail and three years probation, court records show.

“If these guns had been back on the streets, you can imagine the number of homicides [they] would have been involved in,” Chow said.

Los Angeles County prosecutors have filed a combined 47 felony charges, including the manufacture of assault rifles, possession of a silencer and criminal conspiracy, against Saucedo and nine other associates.

LAPD Det. Ben Meda of the department’s gun unit said authorities are particularly concerned that they came across homemade 9-millimeter handguns in the bust. Authorities are now recovering more and more homemade versions of the handgun, the weapon of choice in shootings across L.A.

HB-958 Criminal Law – Untraceable Firearms - SUPPORT
Senate Judicial Proceedings Committee
Will Smith, Chair
Jeff Waldstreicher, Vice-Chair

Chair Smith and members of the committee,

My name is Robert Van Rens. I am a veteran and a gun owner. I am a former member of the NRA and an NRA-certified safety instructor in handgun, rifle, and shotgun. I understand the mechanics and operation of firearms and how they are registered and regulated.

Unserialized firearms, colloquially called “ghost guns” are an attempt to circumvent the Gun Control Act of 1968 and the Brady Handgun Violence Prevention Act, which requires background checks for all transfers of regulated arms. The sales of unfinished receivers and frames, the components normally stamped with the serial number used to register and track a firearm, for completion in a home workshop allows prohibited persons or anyone wishing to possess an “untraceable”, which is to say unregistered handgun or semiautomatic rifle to do so.

The advent of inexpensive computer-controlled machine tools for the home shop has taken the process of finishing a rifle receiver or handgun frame from a time-consuming, specialized process requiring a fair degree of skill to something anyone willing to spend a modest amount of money and with basic mechanical ability can accomplish.

Any veteran of our armed services can attest that assembling an AR-15 or semi-automatic pistol is not especially difficult with basic tools. Once the receiver or frame has been completed, every single component needed can be purchased online or in-person for cash at a gun show or gun shop. None of these items is regulated in any way.

We register and regulate firearms because they are especially dangerous tools, and they are often used in crimes of violence. Of particular concern is that handguns, the type of guns so often associated with gun violence, are prominent among untraceable guns. Because there is no bar for prohibited persons from purchasing the components to manufacture an unserialized handgun, and there is no registration record, waiting period, or any other legal hurdle to overcome. The only delay is imposed by the time it takes to build.

This bill represents a common-sense regulation that helps limit the availability of illegal guns and prevent what is currently a minor problem from becoming a major one.

Thank you for your time.

Sincerely,

Robert Van Rens

Danielle Veith_FAV_SB958

Position: FAV

Written Testimony of Danielle Veith In SUPPORT of SB 958

TO: Chair Will Smith, Vice-Chair Jeff Waldstreicher, and Members of the Senate Judicial Proceedings Committee

FROM: Danielle Veith, Takoma Park, MD (District 20)

DATE: March 3, 2020

Just over a month ago, volunteers and supporters with Maryland Moms Demand Action from nearly every legislative district across the state—more than 400 strong—gathered in Annapolis and met with every single state legislator (or their staff) demanding that our elected representatives do more to prevent gun violence in our communities. Since then, we have returned dozens of times to advocate for common sense changes to our gun laws. Thousands more mothers and others—who can't take time away from work or family to demand that more be done to address the epidemic of gun violence in our country and our state—stand behind every one of us who shows up in the capital.

As members of this committee, I know you're all too aware of the gun violence crisis we have here in Maryland—not only in Baltimore, but across our state—and across our country. Ghost guns may not seem to be a big part of that crisis right now, but it's a problem that's growing at an alarming rate, and it's a problem that's going to make the crisis even worse if we don't do something about it now. In the few short years that we have been pushing for this legislation in Maryland, untraceable, undetectable firearms have gone from a mostly theoretical threat to an exponentially more dangerous problem. Ghost guns have been used in mass shootings, in attacks on law enforcement, and have been seized in criminal investigations.

In neighboring DC, law enforcement officials have seen an exponential increase in ghost guns recently. In 2017, they recovered only three ghost guns from crime scenes. By 2018, it was up to 25, and last year, they found 115 ghost guns in DC.¹ Already in California, 30 percent of all guns now recovered are un-serialized ghost guns.² Right now, illegal gun traffickers, along with terrorists, convicted felons and others who couldn't pass a background check, can legally purchase unfinished receivers and other parts and kits which can easily be turned into guns with no questions asked. By putting in place reasonable regulations prohibiting the purchase, possession, sale and manufacture of undetectable, disguised, untraceable, or un-serialized firearms, also known as ghost guns, this bill not only makes sure that our laws are keeping up with rapid changes in technology, it ensures that prohibited people can't easily circumvent the strong gun laws our state has already passed.

Six states have already passed ghost gun laws to regulate 3D printed or DIY firearms, including—undetectable weapons that can be carried through metal detectors or disassembled to evade detection by x-ray machines, disguised guns, such as those built to look like pens, keychains or cell phones, so they can be more easily concealed, and un-serialized firearms, sold without a background check and which cannot be traced by law enforcement. Maryland should be next to join New Jersey, Rhode Island, Connecticut, California, New York, and Washington state.

¹

<https://www.washingtoncitypaper.com/news/city-desk/blog/21109272/dc-recovered-115-ghost-guns-in-2019-up-from-25-the-year-before>

² <https://www.thetrace.org/2019/05/ghost-gun-california-crime>

Without SB958, anyone with the right tools can easily access and legally possess everything they need to assemble a ghost gun. Easy unfettered access to these kits, along with some basic tools and YouTube instructional videos, and rapidly advancing 3D printing technology make homemade firearm manufacturing an appealing new hobby for criminals and prohibited purchasers. These DIY kits are carefully designed by unscrupulous sellers to come as close to providing the end user with a firearm as possible without falling under the legal definition of a “firearm.” Ghost Guns threaten our public safety, undermine our gun safety laws, thwart law enforcement investigations, and allow criminals to end-run Maryland’s strong gun laws.

To provide just a few examples, six of which are from Maryland, of what the ghost gun problem looks like today:

- 1) In 2013, a CA man killed five people in Santa Monica with multiple homemade AR-15-style rifles.³
- 2) **In July 2016, a gunman in Baltimore used an AR-15-style rifle that he'd assembled to shoot at four police officers who returned fire and killed him.**⁴
- 3) In Nov 2017, a man with severe mental illness and a criminal history prohibiting him from purchasing firearms, got around CA’s tough gun laws by ordering parts to assemble an AR-15, and shot and killed 5 people and injured 18, including 7 children, at Rancho Tehama Reserve.⁵
- 4) In Jan 2018, a South Jersey man was arrested for unlawfully manufacturing and selling ghost guns out of his home.⁶
- 5) Also, in Jan 2018, the WSJ reported in an article titled, “The Rise of Untraceable ‘Ghost Guns,’” about a man manufacturing untraceable firearms in the Los Angeles machine shop where he worked, who had sold 5 weapons to a convicted felon turned gun trafficker and offered to deliver 100 more before he was caught.⁷
- 6) **One day after the Parkland, FL, school massacre, on Feb 15, 2018, a high school student at Clarksburg High School in Montgomery County, MD, was arrested for bringing in a handgun he built at home using tools from a home improvement store. An AR-15 rifle was also found to be in mid assembly at his home.**⁸
- 7) One year ago, a Dallas man was sentenced to eight years in prison, after he was arrested in 2017 with a partially 3D-printed rifle and a hit list of lawmakers' addresses.⁹
- 8) **Also in Feb 2019, a US Coast Guard lieutenant, who had amassed an arsenal of firearms and gun components used to fabricate untraceable home-built weapons, was arrested in Greenbelt, Maryland by federal authorities who said he was planning a domestic terrorist attack.**¹⁰
- 9) In July 2019, a convicted felon, legally prohibited from possessing a firearm, killed his 84-year-old grandfather with a ghost gun in Virginia.¹¹

- 10) **On August 13, 2019, police found a loaded “ghost gun” with a high-capacity magazine attached, as well as cash and drugs, on an Edgewood man sleeping on a sidewalk in Bel Air, Maryland.**¹²
- 11) In November 2019, a ghost gun was used in the Santa Clarita school shooting, where the gunman shot five classmates, killing two.¹³
- 12) **In December 2019, a Montgomery County, Maryland, man who sold the illegal guns to drug dealers, heroin users, robbers and gang members, was sentenced to nine years after the State’s Attorney and County police worked two years to take this “purveyor of ghost guns” off the streets, meaning that “our region has one less source for illegal guns.”**¹⁴
- 13) In 2020, on New Year’s Day, a couple shot and killed a woman in Rhode Island with a 3D printed gun.¹⁵
- 14) **In January of this year, the FBI arrested three white supremacists in Maryland, ahead of a MLK Day gun rights rally in VA, who were in possession of a fully automatic homemade machine gun.**¹⁶

That’s not at all an exhaustive list, just a few news reports that were easy to find online.

Across the country, we not only have a gun violence crisis, we have a crisis of unsolved shootings. In American cities hit hardest by gun violence, and especially in Baltimore, the odds that police will solve a shooting are “abysmally low and dropping.”¹⁷ Already, people who shoot someone are about half as likely to be arrested as people who kill or assault someone with other weapons. With most cases, when police find a gun at a crime scene, they can use the serial numbers to do a trace to learn about where it came from and about gun trafficking patterns. With ghost guns, they can’t, which means they have no leads and there will be even more unsolved murders.

Just like with gun violence, the burden of unsolved shootings disproportionately impacts black and brown communities. According to FBI data, the entire decline in the “solve rate” for murders since the 1980s seems to be explained by a drop of more than 20% in the murder clearance rates for black and brown victims. When someone is shot and killed, white victims can expect an arrest 53% of the time, but if the victim is black or Hispanic, the arrest rate is only 35%.¹⁸

The systemic failure to solve gun crimes isn’t just heartbreaking for families and communities, it fuels more violence. Shooters walk free, getting away with their crimes, people lose faith in the police, and some decide to try to find justice on their own. Baltimore’s murder clearance rate is among the worst in the country.¹⁹ There are already too many unsolved murders in our city without making investigations more difficult, which the proliferation of ghost guns undoubtedly will do.

Gun traffickers can make a lot of money selling ghost guns, especially in states like ours with stronger gun laws. Like another bill Moms Demand Action is supporting this session—to close the background check loophole by requiring a

criminal check on gun transfers by unlicensed, private sellers, SB958 would ensure that deadly weapons don't fall into the hands of people prohibited from possessing a firearm who are seeking to circumvent state law.

We have a lot of work to do in Maryland to fix our gun violence problem. We all know there is no one solution to the levels of gun violence we experience. However, preventing access to ghost guns and 3D printed guns is a critical step toward ensuring the safety of our state. Please support SB958 to regulate the DIY manufacture of undetectable and untraceable firearms, helping to keep firearms out of dangerous hands. Thank you for your time.

Position: FAV

HB-958 Criminal Law – Untraceable Firearms - SUPPORT
Senate Judicial Proceedings Committee
Will Smith, Chair
Jeff Waldstreicher, Vice-Chair

March 2, 2020

Honorable Will Smith
Chair, Senate Judicial Proceedings Committee
State of Maryland

Chairman Smith and Members of the Committee:

I appreciate the opportunity to provide testimony to members of the House Judiciary Committee regarding House Bill HB-910 that prohibits persons from manufacturing firearms without proper serialization, covert or disguised firearms, and undetectable firearms.

By way of background, I believe it is important to detail some of my qualifications for presenting the testimony below. I am a retired Special Agent of the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) with almost thirty-years of experience primarily in the area of firearm-related violent crime enforcement and research. During my career with ATF, I held many positions to include: Special Agent in Charge of the Intelligence Branch, Chief of the Firearms Division and Creator and Chief of ATF's Crime Gun Analysis Branch. In these three positions, I had the opportunity to conduct extensive nationwide research in areas of firearms-related violent crime reduction strategies and methods to include managing a Presidential Directive, the Youth Crime Gun Interdiction Initiative (YCGII). Upon retirement, I have consulted and provided training to numerous law enforcement agencies and was a subject area expert for the International Association of Chiefs of Police (IACP), and currently am a member of this organization's Firearms Committee. For the last eighteen years I have been employed as a Professor at Mount St. Mary's University, Emmitsburg, Maryland, which has provided me the opportunity to continue my research in the area of firearms-related violent crime reduction while teaching both traditional students and adults.

As a current member of the IACP Firearms Committee, I can attest that law enforcement across the United States are gravely troubled by criminals who are seeking the anonymity of manufacturing firearms that bear no markings and are un-serialized thus making them 'untraceable'. "Ghost guns", as they are commonly referred, seek to accomplish exactly what the name implies, hide their makers as well as users from detection of law enforcement. Whether these firearms are manufactured in their entirety or are from component parts or from

technologies such as 3-D printers, their objective has one purpose only and that is to supply criminals, terrorists, and other prohibited persons firearms that cannot be traced by law enforcement or are undetectable by common methods of screening. Already we have seen large criminal operations springing up for this purpose. Just this last year, ATF and the Los Angeles Police Department seized over 1,000 firearms from an individual who was manufacturing 'Ghost Guns'. No law abiding citizen would want a firearm that does not possess a serial number and thereby cannot be returned to them if stolen nor one that is poorly manufactured that could potentially cause injury.

With regard to covert/disguised and undetectable firearms, they pose a pronounced and direct threat to law enforcement officers who risk their lives every day to keep their communities safe. Officers confronting individuals that possess weapons that are not readily recognizable as a firearm face the danger that they will go unnoticed. Such firearms provide a criminal the opportunity to kill or severely injure an officer by deploying what may appear to be an everyday object. In my law enforcement experience, such weapons have been used by outlaw motorcycle gang members, drug traffickers, and extremely violent offenders. Although this legislation lists a variety of examples that disguised weapons can take, I can tell you the list is only limited by the imagination of the criminal. I will also note that the United States Secret Service, with their mission of protecting the President and dignitaries, is extremely concerned with criminals, terrorists, or the mentally ill who may utilize a disguised weapon that could not be readily detected visually or by metal detection. Such weapons pose a serious threat to the Services' security protocols.

I believe that this legislation is a step in the right direction of providing law enforcement with a tool that can be utilized prior to the violent use of the firearms described in the legislation. These types of weapons have no legitimate sporting, hunting or self-defense purposes, and are a threat to public safety and directly relates to the safety our law enforcement officers. I urge you to pass this legislation.

Thank you again for this opportunity. Should you require additional information or have any questions, please contact me at any time.

Sincerely yours,

Joseph J. Vince, Jr.

Professor/Special Agent (ret.)

HB636 (SB646) OPPOSE
HB1257 (SB816) OPPOSE
HB910 (SB958) OPPOSE
HB591 OPPOSE
HB1501 OPPOSE
HB1104 OPPOSE
HB1261 OPPOSE

Honorable State of Maryland House Judiciary Committee,

I find myself again this year as a Maryland resident under the threat of becoming a common criminal simply by my choice to be a law-abiding owner of firearms.

I am a peace-loving 50 year resident of Maryland, I raised my family here, vacationed in Ocean City and Deep Creek Lake, I retired from government service at Aberdeen Proving Ground, Maryland has been a wonderful place to live, until now. I feel threatened because later in life I chose to pick recreational shooting as a hobby that I could enjoy with friends and family.

I do everything right; my firearms are locked in a safe; my ammunition is locked in yet another safe, but somehow, according to some legislators in Maryland, my ownership of firearms is causing crimes of gun violence to increase across the state. I fail to see the connection, since the only time my guns come out of my safe is when they are under my complete control and used for target shooting and recreational purposes only. The obvious truth is there is no connection, plain and simple.

It's all too obvious that criminals don't care about or complete background checks; they don't care how many rounds are in the magazine, the more the better; they don't care who they get a gun from; they don't lock up their guns at night; they don't report stolen firearms, they're probably holding one, and that list goes on and on...

I find the lack of general knowledge about firearms and the steps it takes to legally purchase a firearm in Maryland by some of our elected officials surprising. I feel that they could work toward better understanding what they are trying to legislate, because when the misinformation flows through them to the anti-gun groups and to the public, it incites fear and mistrust, and discourages open and honest conversation. The Second Amendment community stands for safety, education, responsibility, accountability, and freedom. Let's all try that for a while.

Yours in Freedom,
Jeffrey Adams

ChristopherBenedict_unf_sb958

Uploaded by: Benedict, Christopher

Position: UNF

Good afternoon,

My name is Christopher Benedict, I live at 702 Dayspring Dr, Odenton, MD 21113. I am writing to voice **my opposition** to the following bills:

- **HB636 and SB646**
- **HB910 and SB958**
- **HB1257 and SB816**
- **HB1261**
- **HB1078**

I believe this collection of bills is an unacceptable overreach being made by legislators who fail to understand that stricter gun control laws DO NOT impact criminals' access to firearms. The only people who will be impacted by this legislation are law-abiding citizens who wish to exercise their 2nd amendment rights. The root cause of these crimes needs to be addressed, and if that cannot be addressed, more citizens should be responsibly armed to protect themselves, their families, and those around them.

Specifically, I am vehemently opposed to the idea that legislation can be enacted to control what I print on my 3D printer. I don't even understand how that would be enforced. Secondly, The expansion of the definition of an assault long gun is absolutely unreasonable. The controls in place are already unacceptable, adding more control will not keep anyone safer. Lastly, state legislators should have no say over how school districts allocate funds with the exception of funds provided by the state itself.

Sincerely,
Christopher L. Benedict

Uploaded by: Brulinski, Daniel

Position: UNF

HB 591,HB636,HB910,HB1104,HB958 OPPOSE

Dear House Judiciary Committee Members,

I am writing to state my strong objections to the passage of the above listed firearm bills. They will not provide any significant additional public safety benefits to Maryland citizens. They will only place additional burdens on law abiding citizens. The gun violence occurring in Maryland and specifically in Baltimore City will not be affected by this legislation. Criminals will not adhere to these laws. Also, many law abiding citizens will view these laws as onerous (without merit and incapable of attaining the desired result--less gun violence and/or injury) and will not comply. You will be making criminals of otherwise law abiding citizens. You should focus your efforts at the real problems causing gun violence and gun injuries --- the already known criminals and remove them from society. These firearm bills are nothing more than self satisfaction (feel good) legislation which helps justify the legislators' existence. It makes them feel like they are doing something to combat the gun violence problem. In reality, it's doing more harm than good. Please vote down these bills.

In summation, I strongly believe that these legislative bills are misguided and will do more harm than good to Maryland citizens.

Sincerely,

Daniel T. Brulinski

HB910 and SB958
OPPOSE

I'm a firearms instructor who teaches the course necessary for a Maryland Handgun Qualification License (HQL) and also certified by the State of Utah to teach the Utah Concealed Firearms Permit course. I'm also a certified range safety officer who officiates competitions, an advocate of the right of armed self-defense and responsible firearms ownership and use. I write in opposition to HB910 and SB958, as these bills criminalize the possession of lawfully made firearms, including those owned for the purpose of self-defense inside the home. The bills threaten imprisonment for innocent conduct among those least likely to harm others. There are no provisions for compensation for any newly criminalized items in these bills, despite the investments made by the makers and owners. Marylanders have always had the right to make and own their own guns and that suddenly everyone is forced to rid themselves of personal property is an egregious overreach of government authority. Additionally, we've always had the right to share information, something else this legislation threatens prosecution for. The bills reflect a disdain and animosity toward those who have interests in providing for themselves.

Why is the State taking guns from Marylanders?

Since it has never been illegal to make one's own firearms, provided they are not prohibited by federal or state law from possessing them and that all other laws are followed, this legislation affects an untold amount of personally held property. It is unknown how many homemade firearms exist in Maryland homes, but it is not uncommon to see someone using one at a gun range. These arms can be made from any number of methods. Some create their guns completely from scratch while others assemble them from kits. Make no mistake, each of these items has value. Barrels, slides, triggers, frames, etc... all cost — not to mention the time and effort invested into the creation of these arms that the people are being forced to relinquish.

I've been a gun owner since 2012 and since then I've lost track of the times I've been told, "no one wants to take your guns!" My personally made arms, including a handgun that I rely on for home defense are all being taken here without any offer of any sort of compensation. This isn't just unfair, it's purely unjust.

Not even in New Zealand, where no constitutionally observed right to keep and bear arms exists did their government take such a drastic step without offering compensation for affected arms (See https://www.vice.com/en_ca/article/g5xp4x/new-zealands-gun-buyback-might-not-have-gone-so-well). The message being made instead is clear: discard your property or be subjected to force by the State.

Why would someone want to make their own gun?

We also have a right to arms that's not solely dependent on the private sector providing the people a place to buy them from. Just as many make all matters of things for themselves, if one can build exactly what they want for their needs and a nearby store doesn't provide it, why wouldn't one explore this avenue to arm themselves? Just as people have a vested interest in keeping their personal data and conversations private, those same considerations are made by many when it comes to their personal protection. Is this any different than those who use end-to-end encrypted messaging apps like WhatsApp or Signal? No doubt some who read this use such apps and there's no reason to think these readers are committing illegal acts merely because they wish to maintain as much privacy as they can. There's the same level of nefariousness between someone making their own arm and someone messaging a friend with WhatsApp, or even someone brewing their own beer — NONE. The same logic applies to those who do buy a gun from a retail outlet. Merely buying or getting a gun is not a determinant of intent.

There's also a matter of administrative and logistical barriers pitted against people from defending themselves. Personally speaking as someone who teaches the Maryland HQL course, I know those who object to or cannot afford the fees required for the exercise of their rights. Similarly, arranging for fingerprints and being subjected to the onerous wait incurred by HQL issuance and the handgun buying process (usually a taking a month) keeps many artificially disarmed. I know how tough those requirements are as I've had students who took my class only to abandon the process due to the mentioned barriers. Some couldn't arrange a time to get fingerprints. Some just couldn't schedule a class with me. Instead, some have built their own handguns and rely upon them for home protection, recreational use, and even some in competition. These people are not those harming others, nor are they contributing to crime.

Information on making guns is readily available to EVERYONE.

Anyone reading this can scan the QR code on the first page or visit <https://spee.ch/@Deterrence-Dispensed>. This site is an immutable channel that runs on blockchain technology. That data exists **forever** on the internet, and this site is just one of many outlets to find other technical data, printable files, etc... on guns. Even without the spee.ch site, anyone who spends a little time on Google can find the .stl files (a 3D model) necessary to give to any common 3D-printing program and subsequently make their own parts (top search result takes you right to a bunch, as a matter of fact https://www.google.com/search?client=safari&source=hp&ei=B9RSXsSjC-3B_QbzmbCoBA&q=3d+printed+gun+files

https://www.gutenberg.org/files/1579/1579-8642/11045/3.0/0.428.3663.4j15j3j0j1.....0....1..gws-wiz.....0i131.i_P08VFwVbA&ved=0ahUKEwiEw6retejnAhXtYN8KHfMMDEUQ4dUDCAs&uact=5

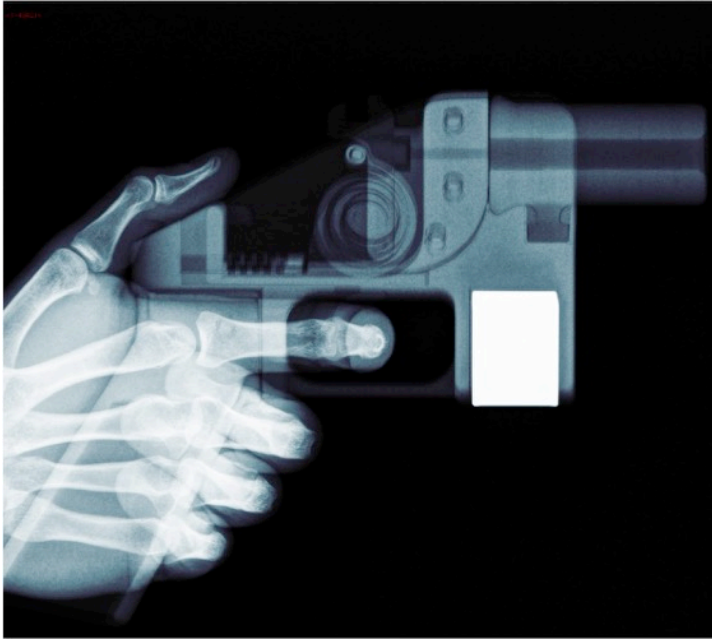

There's simply no way to prevent this information from being shared or acted upon without having law enforcement enter every nook and cranny of the lives, hard drives, and clouds of Marylanders. Putting aside that the internet is omnipresent in daily life and anyone can learn anything they want from their phone, we still have books. Blueprints. The spoken word. Dig around in nearly any public library and you're sure to find the knowledge necessary to make a gun. Anyone who has a copy of Tom Clancy's *Without Remorse* has the basic knowledge of how to make a crude shotgun or even a suppressor from parts and tools anyone can buy from Home Depot. Technical data on firearms, including blueprints, are available from the US Patent office and from numerous other official sources.

Both of these bills are in some ways redundant to federal law.

It is already illegal for a person who is prohibited from owning guns to make or possess any guns at all. A determined individual will not be deterred, nor do they need a 3D printer or milling machine to illegally gain access to a weapon. In 2018, Former Police Commissioner Darryl De Sousa testified in committee that not a single firearm used in any crime in 2017 was lawfully owned or possessed. Not only could these people not legally have the arms in question, they couldn't lawfully receive them or acquire them. Anyone making a gun for these criminals would not only be in violation of the law by making guns for distribution without a Federal license, but they'd also be in violation of numerous laws for providing those guns to prohibited persons.

A recent report from the Department of Justice Bureau of Justice Statistics shows that criminals get nearly half of their firearms from the black market (no differently than drugs) and another quarter are gotten by someone they know who illegally gives it to them. Others are stolen or gotten at the scene of the crime. About 10% of crime guns are gotten at a retail source — including 0.8% from gun shows by the way, which couldn't have happened without a background check (<https://www.bjs.gov/content/pub/pdf/suficspi16.pdf>).

These bills also affect items under the control of the National Firearms Act of 1934 (<https://www.law.cornell.edu/uscode/text/26/5845>). “Covert” arms would qualify as “Any Other Weapons” or AOWs for short. These items are registered with the Federal government and can be lawfully possessed in Maryland right now. Again, the bills force the owners of these items to be deprived of the value of them.

(Liberator pistol viewed by x-ray. Does this look undetectable to you?)

In addition, purely plastic firearms and potentially undetectable firearms fall under The Undetectable Firearms Act of 1988 (<https://www.congress.gov/bill/100th-congress/house-bill/4445>). For over 31 years at least 3.7 ounces of steel must be present in any firearm so that it can be picked up by an x-ray machine or metal detector. No 3D printed gun can be legally made without that steel.

Even the infamous Liberator pistol (left) has a space in its design for a 6 oz block of steel

and the instructions explicitly warn the maker to insert it so as to not break federal law. Even without that block, a X-ray or metal detector would still detect the firing pin (a common nail in the Liberator's case) and any ammunition.

What's different about arms made prior to 1968?

The bills contain an exemption for firearms made before 1968, presumably because the Gun Control Act (<https://www.govtrack.us/congress/bills/90/hr17735>) of that year was the first time that firearms manufacturers were required to serialize all their guns. What's otherwise different about these guns? There's countless firearms made prior to 1968 that lack numbers and aren't any more or less likely to be used in crimes. Some of these arms are identical to those still available on store shelves today. Merely because an arm may be traceable (a complex and time-consuming process done manually by the ATF) does not mean that a crime committed with it may be prevented or that the person who commits the crime isn't able to be held to account. Guns, especially long guns in Maryland, often change hands and there's no constantly updated registry of where they all are. There's simply no reliable method by which to change this reality.

It's truly painful to see more legislation that makes criminals of Marylanders who do no harm and so dismissively treats their individual rights. The recurring theme in HB910/SB958 and other legislation is that since some may misuse an item, it must strictly be prohibited and limited from the people. For example, there's bills that compel going to a dealer for a background check when selling a firearm to a friend, but there's other bills that would leave these dealers looking to spend substantial sums of money to stay in business or close, thus providing for less avenues for honest people to comply with these laws.

It's shameful for lawmakers to have such distrust of their own constituents and the constituents of others. People have an individual right to self-defense — even if that means using a gun they made themselves. Instead of muzzling the creativity, skill, and curiosity of Marylanders by forcing them to relinquish constitutionally protected property without being compensated and potentially facing off against those whose items aren't for sale, it would better serve the public interest to instead focus on intervening against those who've demonstrated a willful disregard for the lives, property, and safety of others by actually harming innocent people right now. I urge an unfavorable report of HB910/SB958.

Sincerely yours,

Daniel Carlin-Weber

DanielCarlinWeberB_UNF_SB958

Uploaded by: Carlin-Weber, Daniel

Position: UNF

- job_name: AR-15 - mill trigger well, mill selector, drill trigger and hammer pin holes - V3

job_text: Manufacture a mil-spec AR-15 lower. The 80% lower receiver MUST already have the rear take down well milled. Lower receivers without the rear take down well milled will require additional milling.

job_steps:

- step_name: Verify GG Empty

step_text: Please read and understand the Ghost Gunner Operator's Manual before proceeding. Remove magnetic chip cover and verify nothing is installed in Ghost Gunner. The 5/32" drill is too long and CANNOT BE INSTALLED or it will crash into the build plate. The 1/4" end mill can remain installed because it is shorter.

step_image: Image/1A - Remove Cover.jpg

step_gcode: Code/01_Home_Tool_Install.txt

timeout: 120

- step_name: Install T-slot Nuts

step_text: Insert two T-slot nuts into the top rail - bump side down (flat side up) - via the left side opening. Insert one nut into the bottom rail. Position the nuts as shown, erring towards the T-slot rail edges.

step_image: Image/1B - Install T Slot Nuts.jpg

- step_name: Place small Wrench

step_text: Place small wrench around the notch on the spindle to prevent rotation. Do not let go of the wrench until the end mill is installed.

step_image: Image/1C - Install 13mm Wrench.jpg

- step_name: Remove Collet

step_text: Remove ER-11 collet nut, if installed. A 17 mm wrench is required to loosen the collet nut if a cutting tool is already installed.

step_image: Image/1D - Remove Collet Nut.jpg

- step_name: Install 1/4 inch Collet

step_text: Snap the 1/4 inch collet into collet nut. Do not use the 4 mm collet. Both collets are packaged in small boxes. Make sure the collet is securely attached to the nut before threading the nut onto the spindle. The collet should snap into the collet nut when inserted at a slight angle. If the collet isn't securely attached to the collet nut, then the collet will not clamp the end mill correctly.

step_image: Image/1E - Collet to Nut.jpg

- step_name: Thread Collet Nut

step_text: Loosely thread collet nut to spindle.

step_image: Image/1F - Thread Collet Nut.jpg

- step_name: Insert 1/4 End Mill
step_text: Insert 1/4 inch end mill into collet. Push in as far as possible (important). The 1/4 inch end mill ships in a plastic case. Do not use the narrower 5/32 inch drill. The end mill is a consumable item that requires periodic replacement. If cutting quality decreases, it's time to replace the end mill. Make sure there aren't any stray aluminum chips on the end mill, as this will introduce a probing offset error.
step_image: Image/1G - Insert End Mill.jpg

- step_name: Tighten Collet Nut
step_text: CRITICAL STEP! Tighten collet nut with 17 mm wrench. Don't worry about over-tightening the collet nut; damaging the spindle threads is extremely difficult with hand tools. Failure to tighten the collet nut can allow the end mill to walk out, resulting in a rough cut, stalling, and/or cutting too far into the workpiece.
step_image: Image/1H - Tighten Collet Nut.jpg

- step_name: Remove Wrenches
step_text: Remove both wrenches.
step_image: Image/1K - Remove Wrenches.jpg

- step_name: Install Left Side Jig
step_text: Install left side jig. The jigs included with Ghost Gunner snugly fit mil-spec AR-15 lowers. A lower that doesn't fit isn't mil-spec. Custom 3D printed jigs are required for non-mil-spec AR-15 lowers.
step_image: Image/2A - Install Left Jig.jpg

- step_name: Install Right Side Jig
step_text: Install right side jig.
step_image: Image/2B - Install Right Jig.jpg

- step_name: Insert Washer & Bolt
step_text: Insert M4 washer onto M4x45 bolt. Insert bolt through lower left side bolt hole.
step_image: Image/2C - Install Bolt.jpg

- step_name: Insert Washer & Nut
step_text: Insert M4 washer onto M4x45 bolt. Thread M4 nut and snug with 3mm hex, pinching the nut to prevent rotation. The goal is to snug left and right side jig pieces until they touch. No need to overtighten.
step_image: Image/2D - Install Washer Nut.jpg

- step_name: Insert Probe Lead
step_text: Pull the (permanently attached) red probe cable outside Ghost Gunner. Ensure the cable exits Ghost Gunner via the gap between the front and T-slot plate. Insert probe wire through left side jig hole. The probe ring terminal has an obvious flat side,

which should point towards the lower receiver (as shown).

step_image: Image/2E - Install Probe Wire.jpg

- step_name: Install Grip Bolt

step_text: Slide grip bolt through probe ring terminal and thread into lower receiver. The grip bolt is included with lower receiver build kits (not included with Ghost Gunner). Different grip bolts use different tools (phillips/flat/imperial hex/etc). Snug the bolt; overtightening can wear out the probe ring terminal, which acts as a washer; no separate washer is required.

step_image: Image/2F - Install Grip Bolt.jpg

- step_name: Remove Nut & Washer

step_text: Remove M4 nut and M4 washer from left side. Leave M4x45 bolt installed.

step_image: Image/2G - Remove Washer Nut.jpg

- step_name: Assemble Front Jig

step_text: Insert M4 washer onto M4x45 bolt, then push through the hole in the plastic jig piece (snug fit).

step_image: Image/2H - Assemble Front Jig.jpg

- step_name: Install Front Jig

step_text: Insert Front Jig subassembly into AR-15 front take down pin hole.

step_image: Image/2I - Install 3DP Washer.jpg

- step_name: Install Washer & Bolt

step_text: Insert M4 washer onto M4x45 bolt, then insert into AR-15's rear take down pin hole.

step_image: Image/2J - Install Rear Take Down Bolt.jpg

- step_name: Move GG

step_text: Press the 'next' button to move Ghost Gunner to receiver installation position.

step_image: Image/2K - New Machine Position.jpg

step_gcode: Code/02_Trig_Align.txt

timeout: 120

- step_name: Install Jig

step_text: Insert AR-15 subassembly into Ghost Gunner. Make sure the probe wire and vinyl chip guards aren't caught between the jig and T-slot. Loosely thread all three screws into T slot nuts. The simplest method is to remove all three bolts, then slide the receiver left/right to verify each T-slot nut aligns with its hole at some point (they don't need to align simultaneously). Once all three holes can align with the nuts, align the top left nut and hole, then insert and loosely thread a bolt. Slide the receiver as needed and repeat with the bottom left and then top right holes.

step_image: Image/2L - Install Jig Subassembly into GG.jpg

- step_name: Slide Jig Right
step_text: Slide AR-15 jig subassembly right until the receiver is just barely not touching the end mill. Anywhere from 0.25 to 2.5 mm is acceptable (0.01" to 0.1"). The probe wire should fall down into the gap between the T-slot and the front of the machine.
step_image: Image/2M - Slide Jig Right.jpg

- step_name: Tighten Bolts
step_text: Tighten all three M4x45 bolts with 3 mm hex. Overtightening will wear out jigs. Verify vinyl covers aren't caught between AR-15 and T-slot.
step_image: Image/2N - Tighten 3mm.jpg

- step_name: Remove Tools
step_text: Remove 3 mm hex and verify AR-15 subassembly is securely fastened. Verify no metal contact between AR-15 and T slot plate. The probe won't work if the AR-15 conducts to Ghost Gunner; DDcut will report an error, forcing a reset. Use a voltage meter to verify the receiver is at 5 volts relative to the T-slot.
step_image: Image/2O - Remove Wrench.jpg

- step_name: Install Chip Cover
step_text: Install magnetic cover to contain aluminum chips. Pressing the 'next' button begins a 6 minute spindle warmup. Spindle speed will vary during warmup.
step_image: Image/2P - Install Cover.jpg
step_gcode: Code/03_Spindle_Warmup.txt
timeout: 640 #warmup

- step_name: Probe Operation
step_text: Pressing 'next' will direct machine to probe mag well and find lower.
step_image: Image/2Q - Probe Operation.jpg
step_gcode: Code/04_Well_Probe.txt
timeout: 180

- step_name: Mill Trigger Well
step_text: Lower receiver probe successful. Press next to mill the fire control pocket. This will take a couple hours. Please stay near the machine in case you need to stop cutting for any reason.
step_image: Image/2R - Mill Well.jpg
step_gcode: Code/05_Mill_Well.nc
timeout: 300

- step_name: Remove Cover
step_text: Milling complete. Remove magnetic cover.
step_image: Image/5A - Remove Cover.jpg

- step_name: Remove Jig

step_text: Unscrew three M4x45 bolts. Caution: The receiver will be warm!

step_image: Image/5B - Loosen Screws.jpg

- step_name: Remove Jig & Clean

step_text: Remove Lower (leave the probe attached). Vacuum the T-slot plate and lower, then wipe the rail clean. Never use compressed air in Ghost Gunner! Compressed air forces chips past dust seals!

step_image: Image/5C - Remove Lower.jpg

- step_name: Move T-slot Nut

step_text: Move one T slot nut from top to bottom rail. The hex key aides removal. Important: Verify no aluminum chips are stuck to the end mill. Probe accuracy suffers if chips contact the part before the end mill.

step_image: Image/5D - Move T Slot Nuts.jpg

- step_name: Install Washers & Nuts

step_text: Install three M4 washers and thread three M4 nuts. Snug with 3mm hex. Vacuum chips off the lower & jig (have we stressed this enough?). The probe will not work if a short exists between the receiver and T-slot.

step_image: Image/5G - Install Nuts Washers and Tighten.jpg

- step_name: Insert Mag Well Jig

step_text: Place the Mag Well Jig into mag well (smooth side towards trigger pocket). Place M4 washer onto M4x80 bolt and slide into jig. It's easier to install this bolt two steps from now (after the lower is placed in Ghost Gunner); remember where it goes and remove for now if desired. Also, ensure no chips remain in the pocket indicated (the probe references the part there).

step_image: Image/5H - Install Mag Well Support.jpg

- step_name: Install Bolts

step_text: Place an M4 washer onto two M4x20 bolts and slide into jig. It's easier to install these bolts after the next step; remember where they go and remove for now if desired.

step_image: Image/5I - Install M4x20.jpg

- step_name: Move GG

step_text: Ghost Gunner will move to the following position.

step_image: Image/5T - New Machine Position.jpg

step_gcode: Code/06_Align_Selector.txt

timeout: 120

- step_name: Install Jig

step_text: Insert the AR-15 jig subassembly into Ghost Gunner. Loosely thread all three screws into T slot nuts, moving lower as needed to align threads with holes. The rear M4x20 bolt is difficult

to install; if dropped into the waste chips, pick up Ghost Gunner and set it somewhere else, then retrieve the bolt.

step_image: Image/5U - Insert Jig.jpg

- step_name: Slide Jig Left

step_text: Slide the AR-15 jig subassembly left until the end mill is cornered in the right jig, as shown. Failure to locate the jig properly could cause incorrect hole placement.

step_image: Image/5V - Slide Jig Left.jpg

- step_name: Tighten Base Bolts

step_text: Tighten both M4x20 base bolts (leave mag well bolt loose).

step_image: Image/5W - Tighten Base Bolts.jpg

- step_name: Tighten Mag Well Bolt

step_text: Tighten mag well bolt. The bolt won't thread if the jig isn't fully seated (press down on top to fully seat).

step_image: Image/5X - Tighten Mag Bolts.jpg

- step_name: Remove Tools

step_text: Remove 3 mm hex and verify AR-15 subassembly is securely fastened. Verify no metal contact between AR-15 and T slot plate. The probe won't work if the AR-15 conducts to Ghost Gunner. Receivers with integral trigger guards aren't mil-spec, but will work as long as no metal contacts the T Slot plate.

step_image: Image/5Y - Remove Wrench.jpg

- step_name: Install Chip Cover

step_text: Install magnetic cover to contain aluminum chips.

step_image: Image/5Z - Install Cover.jpg

step_gcode: Code/07_Probe_Selector.txt

timeout: 120

- step_name: Mill Selector Hole

step_text: Lower receiver probe successful. Press next to mill selector hole. This will take approximately 10 minutes.

step_image: Image/5Z - Install Cover.jpg

step_gcode: Code/08_Mill_Selector.nc

timeout: 120

- step_name: Remove Cover

step_text: Milling complete. Remove magnetic cover and vacuum chips from AR-15 and T-slot plate. The probe won't work if the receiver conducts to the T-slot.

step_image: Image/8A - Remove Cover.jpg

step_gcode: Code/09_Remove_End_Mill.txt

timeout: 120

- step_name: Insert small Wrench

step_text: Insert small wrench onto spindle to prevent rotation.
Do not remove wrench until drill bit is installed.

step_image: Image/8B - Insert 13mm Wrench.jpg

- step_name: Loosen Collet Nut

step_text: Insert 17 mm wrench onto collet nut and loosen. FYI:
The nut will initially loosen and then get tight again.

step_image: Image/8C - Insert 17mm Wrench and Loosen.jpg

- step_name: Remove End Mill

step_text: Remove 17 mm wrench and 1/4 inch end mill. Loosen
collet nut more if the end mill isn't loose.

step_image: Image/8D - Remove 17mm Wrench and End Mill.jpg

- step_name: Unthread Collet Nut

step_text: Unthread collet nut. If the nut falls into Ghost
Gunner, pick the machine up and place on another surface, then
retrieve the collet nut.

step_image: Image/8E - Remove Collet Nut.jpg

- step_name: Change Collets

step_text: Remove the 1/4 inch collet by pressing down (figure
1), then snap the 4 mm collet into the collet nut (figure 2).

step_image: Image/8F - Collet to Nut.jpg

- step_name: Thread Collet

step_text: Loosely thread collet nut to spindle.

step_image: Image/8G - Thread Collet Nut.jpg

- step_name: Install 5/32 inch Drill

step_text: Insert 5/32 inch drill into collet. Push in as far
as possible (important).

step_image: Image/8H - Insert Drill.jpg

- step_name: Tighten Collet Nut

step_text: Insert 17 mm wrench onto collet nut and tighten.

step_image: Image/8I - Insert 17mm and Tighten.jpg

- step_name: Remove Wrenches

step_text: Remove wrenches. Vacuum more to ensure the receiver
isn't conducting to the T-slot.

step_image: Image/8J - Remove Wrenches.jpg

- step_name: Install Chip Cover

step_text: Install magnetic cover to contain aluminum chips.
Press 'next' to probe drill Z height.

step_image: Image/8K - Install Cover.jpg

step_gcode: Code/12_Probe_Drill.txt

timeout: 120

- step_name: Drill Trigger Holes
step_text: Probe successful. Press 'next' to drill trigger holes. This will take approximately 5 minutes.
step_image: Image/8K - Install Cover.jpg
step_gcode: Code/13_Drill_Trigger.nc
timeout: 600

- step_name: Remove Chip Cover
step_text: Drilling complete. Remove magnetic cover.
step_image: Image/11A - Remove Cover.jpg

- step_name: Loosen Bolts
step_text: Remove M4 bolts with 3 mm hex.
step_image: Image/11B - Remove Bolts.jpg

- step_name: Remove Firearm
step_text: Remove AR-15 subassembly from Ghost Gunner. Disassemble the Jig by removing all bolts. Verify trigger mechanism operates properly before loading firearm.
step_image: Image/11C - Remove Jig.jpg
step_gcode: Code/14_Remove_Drill.txt

- step_name: Remove 5/32 Inch Drill
step_text: Loosen and remove 5/32 inch drill and collet.
Notice: Failure to remove the drill now will cause the drill to crash into the T-slot plate during the next homing cycle.
step_image: Image/11D - Remove Drill.jpg

My wife and I oppose the following gun bills because we are fed up with infringing limits on our Second Amendment / Civil rights:

- HB636 (SB646)
- HB910 (SB958)
- HB591
- HB1104
- HB1261
- HB1257 (SB816)
- HB1078
- HB1501

We will be voting according to this issue in future elections.

Sincerely,

Chris K Cockrum

Re: "Untraceable Firearms"

[HB910](#) and [SB958](#)

I oppose these bills because I would like to spend some time building my own firearms when I cut back my business to semi-retirement. This has been a legal activity for a long time.

"Assault Long Guns and Copycat Weapons"

[HB1261](#)

I oppose this bill. I've been interested in purchasing an AR-15 at some point. Now you want to tax them to oblivion? I've read that more murders are committed with hammers than with rifles. Why do you need this? What's next?

"Licensed Firearms Dealers (Firearms Dealers' Safety Act)"

[HB1257](#)

I oppose this bill on principle, although it does not affect me directly. If you want to do this, apply these standards to all businesses. It's unfair to single out licensed firearms dealers.

"Access to Firearms - Storage Requirements"

[HB636](#) and [SB646](#)

I view these bills with great trepidation and oppose them. I have no minors in my home, but I have a developmentally disabled daughter who lives at home. All guns are locked, either in a gun safe or with an internal gun lock. Any determined person "could" possibly overcome these security measures. My daughter knows better than to attempt to defeat the codes on the safes. A burglar is likely to give up before he can break the codes. Why should I be legally at risk for what "might" happen?

"Permit to Carry, Wear, or Transport - Required Courses"

[SB422](#)

I oppose this bill. I have taken many firearms courses, including ones which deal with "the competent handling of a firearm" and with "situational awareness". To obtain a Wear and Carry Permit in Maryland, which is recognized as constitutionally guaranteed in many states, I now need to sit through the same two courses every year? Training is good, but this is ridiculous. Carry permit holders commit crimes at a lower rate nationwide than police. Why should the most responsible subgroup in America be treated as if they were mindless?

WRITTEN TESTIMONY OF SCOTT G. DAVIS IN OPPOSITION TO SB958

I appreciate the opportunity to present my testimony in strong opposition to SB958 to the members of this committee this afternoon.

I am a business owner of an Architectural Drafting Service that I have nurtured over the past 20 years. Prior to that I spent 10 years as an Architectural draftsman and designer in a local Architectural firm. I am a lifelong Marylander but I am not a lifelong gun owner. Shooting and building firearms became a hobby of mine about 8 years ago. I went 42 years of my life without owning or shooting a single gun. That changed when I visited my in-laws in Tennessee back in 2012. I, along with the entire family, went outside to shoot some targets on their 100 acre property. There were about 15 of us with ages ranging from 7 years old to 70 years old, practicing firearms safety as well as having fun. That was the beginning of the removal of my lifelong “fear of guns”.

Building firearms has become one of my favorite hobbies over the years. I enjoy building firearms from un-serialized 80 percent receivers for my own personal use. AR style receivers are my firearms of choice, mainly for target shooting purposes. I have invested a lot of money in tooling and a lot of money into the firearms.

There is a stigma attached to “80 percent receivers”, “AR rifles/pistols” and so called “ghost guns”. These terms translate to “untraceable firearms” in the political arena. The mere mention of those words seem to conjure up fear, murder & crime in the minds of people that are not familiar with the hobby of building such guns. **I assure you that all of us law abiding citizens that partake in this hobby are not criminals. We are people that enjoy working with our hands, enjoy problem solving and enjoy reaping the benefits of our labor once a project is complete. There are many of us.**

Under current law it *is* 100% legal to build my own firearm for my own purposes using an un-serialized 80 percent lower receiver. On page 5 of this bill, it is stated that a person may not “Possess” a firearm that is not imprinted with a serial number or an object that falls into the 80 percent receiver category. It is legally **IMPOSSIBLE** to get one of my completed home built firearms serialized. UNDER FEDERAL LAW, ONLY A MANUFACTURER CAN SERIALIZE A GUN OR RECEIVER FOR REGISTRATION PURPOSES. **There are no legal ways to serialize my completed guns or my 80 percent lower receivers for registration.**

Under current Federal law it is *already* illegal to “sell, offer to sell, transfer, purchase or receive an 80 percent firearm” that was home built. **According to this bill, SB958, there is no grandfathering of my completed firearms or uncompleted receivers in their 80 percent state. This bill does not provide any clarification or instruction on how to make my existing firearms or 80 percent receivers compliant. Under current law I cannot give them away or sell them.** I am stuck with them. **I am left to assume that all of my home built, un-serialized guns and 80 percent receivers will be illegal to own after October 1, 2020 and I will become an instant criminal for possession. What am I supposed to do with these**

guns? How many innocent, law abiding lives, such as mine, does this panel find acceptable to destroy with stiff punishments, heavy fines and jail time by passing this bill? There are going to be far more law abiding people caught in this trap vs the virtually non-existent criminal activity that happens with these types of firearms. How many people can you statistically find that have used any of the types of guns that are outlined in this bill for criminal activity in the State of Maryland? If you can find ANY, I suggest that the Maryland State Police go after those criminals instead of having the Maryland General Assembly punish us law abiding citizens for a hobby that we thoroughly enjoy. I prefer that we focus on the severe crime problems that we already have instead of focusing on the anticipation of something that has not happened or very rarely occurs.

I quote one of our Democratic Delegates as saying, "You can't just pass a bill and say, OK, crime is solved". – Baltimore Sun 2/21/2020

This is a very logical statement and I agree wholeheartedly. This statement was not in regards to this bill but this same reasoning applies to this bill, SB958. We can't just pass this bill and say, OK crime is solved. I do not understand why we, as a whole, are not applying this same logic when it comes to lawful abiding gun owners that enjoy building our own firearms for lawful purposes. This bill punishes home gun builders by creating criminals out of law abiding citizens.

The price that it takes to make a home built gun is equivalent to, or more, than it costs to buy the same gun that is already built by a manufacturer. We already know that statistically our crime problem is overwhelmingly committed by criminals using stolen handguns. It makes no sense for a criminal to research and buy an 80 percent kit, researching which particular type of expensive tooling to buy, purchasing all of the tooling and then learn how to build a firearm when they can simply buy a used, stolen gun for a small fraction of the price and without the hassles of researching, tooling and building. While the criminal closure rate remains very low in our state's high crime areas, law abiding gun owners and home builders tend to be the scapegoated group that takes the brunt of proposed legislation such as this bill.

The focus should be on criminals that break the law instead of creating a new group of criminals out of us law abiding citizens. I understand that we have a crime problem in this state. What US LAW ABIDING GUN OWNERS need all of the MEMBERS OF THIS COMMITTEE to understand is that us law abiding gun owners are tired of being the Maryland General Assembly's scapegoat for gun crime in this state. I refuse to let this committee turn me into a criminal for this hobby that I enjoy so much. GO AFTER THE BAD GUYS, not US. WE are not the problem.

I request an unfavorable report.

Sincerely,

A handwritten signature in black ink that reads "Scott Davis". The signature is stylized with large, sweeping loops for the letters.

Testimony against Bill SB0958

Hello ladies and gentlemen, my name is Nick DeTello, I'm a Software Engineer, an Eagle Scout, and I've been a resident of Maryland my entire life. I chose to settle down, buy a house, and start a family here in distant Carroll County.

I did so with every intention of being able to enjoy my collection of firearms, protect my family, and pass it down to my children, and their children. The reason I'm here today is that this bill would prevent me from doing that. This bill would criminalize the American dream that I've sought after so passionately.

As an enthusiast I've invested serious time, money, research, and labor to be able to manufacture my own firearms, long before this bill was published. I spent many days milling, filing, and sanding my last creation, like a form of art. I built it meticulously and tested it at a dedicated firearms facility. I followed all existing gun laws transporting it to and from the range, and I dedicated time practicing with it to ensure that I could safely use it in an emergency. Do I sound like a criminal? Because that's what this bill is describing me as; somehow this piece of paper makes me a criminal for possessing my own property.

I don't understand how this isn't an ex post facto law; this bill will fine me, and jail me, for an act that was perfectly legal, and federally protected. It will rob me of my property, it will rob me of time away from my beautiful wife and family, the community I uphold, and my descendant's endowment. When you're discussing this bill, I want you to picture my face behind bars, and I want you to picture my family visiting me in an orange jumpsuit. Meanwhile the real criminals are out there with firearms they either stole or got through a straw sale (both illegal acts), then filed the serial numbers off. Don't make laws restricting responsible gun owners like myself; enforce the laws on the books and make harsher punishments for the actual criminals. Thank you for your time.

Written Testimony of Jesse Ferguson, resident of Caroline County, Maryland, in Opposition to SB0958

I am a hard-working husband, father of two young girls, and a native of Maryland's Eastern Shore. I am an avid hunter, firearms collector, and participant in all manners of competition involving shooting and firearms. I am also a handyman, tinkerer, amateur mechanic, and I build my own firearms. More on that in a minute.

Prior to 1968, manufacturers of firearms were not required to stamp a serial number on their products. Many did not. Unlike other consumer products, firearms are usually well cared for and passed down from generation to generation. There are a great many firearms that are in the hands of law-abiding gun owners that were manufactured prior to 1968. There are a great many firearms, now considered to be family heirlooms, that lack a serial number. Some of these are identical models that are still sold today. In these cases, it is impossible to know when a firearm was manufactured. Thus, for those firearms, it is impossible to prove that they were manufactured prior to 1968.

As for my own home-built firearms, they are not the wood and steel heirlooms that I mention above. They are modern, they are polymer and aluminum. Will they be heirlooms in 30 or 50 years? I hope so. Will they have serial numbers? I would like to think no. For my firearms it makes no sense to serialize them.

I do not build my own firearms to avoid a background check. I continue to purchase serialized firearms and I complete background check requirements. I build my own firearms because I am a hobbyist. I build my own firearms because I want to understand physics, mechanical design, and because I enjoy frustrating myself.

The first "ghost gun" I built cost more to manufacture than a brand-new Glock, which costs between \$400 and \$500. Factoring in parts alone (\$650), I spent more building this gun than I

would have to simply buy a new handgun. Considering the used market, I probably paid double. Factoring in the time needed to troubleshoot, massage, tune, test – over multiple iterations, I would have been able to purchase 3-4 used handguns for the same investment in this single handgun. Was it frustrating? Yes. Was it rewarding? Yes. Should it be illegal? No.

The cost of a stolen handgun on the black market varies rarely exceeds \$250.

I am opposed to SB0958 and urge an unfavorable report from the committee.

Sincerely,

Jesse Ferguson

Testimony on behalf of Jeffrey S. Folk

IN OPPOSITION TO:

SB958 – Criminal Law – Firearms – Untraceable Firearms

Judicial Proceedings

March 3, 2020

I am a citizen of rural Western Maryland, a loving husband and caring father of two. I am writing today in OPPOSITION of SB958.

When our country was founded and an uprising against tyranny was starting, weapons were forged by fire. In many instances, the founders themselves forged their own weapons. Just because technology has changed, does not mean the protections under The Second Amendment are any less meaningful and broad in their meaning of “Shall Not Be Infringed”. Throughout our country’s history, its citizens have built their firearms by different methods and from different materials.

With the proximity of an hour’s drive to 4 states and the District of Columbia, this bill will do nothing to deter a citizen from legally purchasing, the parts and components to legally manufacture a firearm at home. You will only be criminalizing someone who has been a lawful citizen prior to you putting pen to paper. Criminals aren’t in their garages, spending hours completing an 80% lower and then building a firearm to their custom law-abiding needs. Nor are criminals spending thousands of dollars for 3D printers and the material to print a homemade 3D firearm.

Please focus your time, energy and effort to punish true criminals who break the law and wish to cause others harm. Do not punish law-abiding citizens who are not criminals, but who choose to exercise their Second Amendment Rights as guaranteed by the US Constitution, to NOT BE INFRINGED.

It is for these reasons that I am in opposition of SB958 and ask that the committee return an unfavorable report.

Sincerely,

Jeffrey Folk

I writing you to express my **opposition** to the following bills.

HB 636

HB 910

HB 1257

HB 958

HB 591

HB 1104

HB1261

HB1501

All of these bills hinder, restrict or penalize the law abiding citizen for owning, selling, transferring, repairing or loaning a firearm to other law abiding citizens. I think the focus should be on arresting, prosecuting and jailing (for the full sentence) the criminals in this state who are just running wild.

As a law abiding citizen and gun owner I would never loan a firearm to someone whether a friend or family member who shouldn't have it. The legislature continues to dance around the real problem crime! My personal opinion is that the education system in this state educate our young people on firearms and the proper use of them, and how deadly they can be.

It is also my personal opinion that if the murderers that commit these mass shootings were facing the death penalty they may think twice.

Please feel free to share my comments with your colleges and the committee.

THANKS,

David J. Geiman Jr.

Noah Hayward_unf_SB958

Uploaded by: Hayward, Noah

Position: UNF

Dear Sir or Madam,

I urge you to oppose the following bills (listed in order of their currently scheduled hearings):

- SB646/HB636 (Public Safety - Access to Firearms)
- SB816/HB1257 (Public Safety -Licensed Firearms Dealers)
- SB958/HB910 (Criminal Law - Untraceable Firearms)
- HB1078 (Education - No Funding for Firearms Act)
- HB591 (Public Safety - Lost or Stolen Regulated Firearms - Reporting)
- HB1104 (Public Safety - Regulated Firearm - Transfer)
- HB1501 (Public Safety - Regulated Firearm - Reporting Lost or Stolen)
- HB1261 (Public Safety - Assault Long Guns and Copycat Weapons)

None of these bills, if they were to become laws, would improve public safety. Instead, already-law-abiding citizens, hunters, and licensed firearm dealers (like myself and many of my family and friends) would only be further burdened, while criminals would only continue to ignore the law.

To the extent you are able, through reasonable legislation, I respectfully request that you work to ensure that Maryland's existing (and already overly-restrictive, in my opinion) laws are enforced, rather than passing more laws, based on feelings - or worse, politics - that will not actually contribute to the good of the people of Maryland.

Thank you for your consideration,

Noah Hayward

I oppose the following list of stunningly bad anti-firearms and anti-firearms dealer legislative bills:

HB636 SB646

HB910 SB958

HB1257 SB816

HB1078

HB591 HB1501

HB1104 HB1261

It would seem that many of the members of the Maryland State legislature have gone out of their way this year to attack the rights of legitimate firearms owners, while doing nothing worthwhile to actually stem crime. These bills are an example of legislative actions continuing to do nothing but unnecessarily over regulating, while not alleviating any problem. This is simply pandering to the far left and squandering the public purse.

Vigorous enforcement of existing laws would be more than sufficient to combat crime, combined with the judicial system actually convicting *and* incarcerating criminals. The city of Baltimore is a prime example of the actual problem of the revolving door lack of justice. Further restricting lawful firearms owners is not the answer. Pandering to the anti-firearms segment is not the answer.

As a voter and a tax payer I vehemently oppose the listed bills.

Annapolis, MD 21401

Re: House Judicial Proceedings Committee, Testimony in Opposition to HB910 and SB958

Dear Chairman Clippinger, Vice Chairman Atterbeary and honorable members of the committee,

These bills are a solution in search of a problem. There have been no reports of crimes using 3D printed or "ghost" guns. Building one of these guns is more of a hobby than gun production. Why would a criminal go to the trouble of buying all the part and tools needed to machine one of these gun. When buying a gun on the black market is so easy. Look up the Baltimore violent crime stats.

By the notes in Fiscal and Policy Note for this bill, it states that it is already a federal crime to make an untraceable gun. You need expensive equipment and skill to make one of these guns. A criminal is not likely to have ether. A criminal will buy on the black market or steal a gun.

Serial numbers on guns are for traceability in commerce, not for crime. The idea that one of these guns is untraceable is not correct. If one was used in a crime, the ballistic evidence can trace the gun and match it to a crime.

I urge you for an unfavorable report.

If you want to do something about crime. Bring up Governor Hogan's crime bills.

Respectfully submitted,

Scott Hewitt

HB910 and SB958
OPPOSE

I am a defense contractor whose current and prior employers include one of the top research laboratories in the United States and one of the leading aerospace corporations in the world. In my spare time I enjoy shooting sports, 3D printing, and amateur machinist work. Similarly, many of my coworkers share the same passions for designing and engineering work, shooting sports, hunting, and outdoor pursuits. When it comes to our firearms, we will not settle for an off the shelf gun, we like to tinker and at times engineer entirely new parts and mechanisms to reach our goals. I write in opposition to HB910 and SB958, a bill that criminalizes the possession of lawfully made firearms, including those owned for the purpose of self-defense in the home. The bill threatens imprisonment for merely owning a firearm that previously was legal with no provisions for compensation for any of the newly criminalized items in this bill despite the financial and time investments made by makers and owners. Maryland residents have always had the right to make their own firearms since before the founding of this nation. Many of the colonial era gunsmiths who made the very arms our nation won independence with were little more than men and women in a shed making their own firearm, much like today's firearm enthusiasts making their own firearms. Beyond this, we have always had the right to share information, something this legislation threatens with prosecution. The restriction of information would be impossible to enforce, costly, and waste valuable police resources to fight an over-hyped threat of home manufactured firearms being used in crimes.

Examining feasibility of making your own firearms

When discussing home made firearms we are often lead to believe there are machines that a person simply pressed a button and out pops a firearm. This could not be further from the truth, the closest to this would be somebody with a dialed in 3D printer that was assembled and tested to output a product within tight tolerances. They would need to print individual parts, sand and file them to fit, assemble this firearm, and test. This is already a tough prospect, as firearms require very tight tolerances to function. 3D printers require quite a bit of testing and calibration, wasting a good amount of material and needing constant tweaks to keep them performing. Onto the materials themselves, unless you have well over \$60,000 and an entire room to devote to a metal sintering laser based system (<https://all3dp.com/2/how-much-does-a-metal-3d-printer-cost/>), you will be using a plastic extruding 3D printer. All of the materials science data regarding plastics will lead you to doubt the effectiveness, longevity, or safety of a plastic gun made by a 3D printer. Not only is the plastic

weak compared to metal, but the way 3D printers work is by melting plastic into thin strings that form layers. Imagine that instead of being one solid piece of plastic, the part is made up of essentially a spiral of material glued together loosely in thin layers, think of it as how soft-serve ice cream is served. While this process may be great for making a chess piece or prototype of a door handle, it doesn't translate well to a firearm that has to withstand extreme pressures (in the case of a 9mm round, up to 35,000 PSI of chamber pressure when the round is fired). This also rules out trying to recreate a production firearm that utilizes plastic parts or a plastic frame. The printed material is simply weaker in every way. Sure it might make for a nice display piece, but you'll never find me firing one.

The much more common way firearms are made at home involve partially finished receivers (often called "80%") where the home machinist needs to perform 20% of the work to create a firearm. This is mandated, regulated, and enforced at the federal level by the Bureau of Alcohol, Tobacco, Firearms, and Explosives (BATFE, or ATF for short). Similarly, how and where these parts can be sold are governed by the Department of State under the International Traffic in Arms Regulations (ITAR). So for a Maryland resident who has done their research and is confident in their machinist skills, they will still need tools to actually complete the machining operations. These can range from a tool chest of hand tools supplemented with a wood router and drill press costing a total of \$1,000 (often resulting in a poor result and tens of hours of work to have a functioning firearm receiver), to a full machinist mill costing in upwards of \$30,000 on the used market. The home machinist would then complete milling operations for a few hours and if they did everything right, have the first building block of a firearm. Now they will need to purchase supplemental parts such as a trigger, various springs, a barrel, and any number of nuanced parts that must be installed carefully and deliberately to have a functional firearm. There is a steep learning curve here, I know people who have masters degrees in mechanical engineering who shudder at the work involved in manufacturing your own firearm.

Given the extreme cost associated with the tooling required to make a gun, the high cost of actually doing it, and the material weakness, it leaves one wondering if a criminal would go through all of this time, effort, and expense when they could simply buy a stolen black market firearm on a street corner.

The question of costs and why someone would want to make their own gun

Many firearm makers in the state of Maryland have taken to customizing and making their own firearms. Be it for tailoring to individual needs, making an otherwise out of production firearm where costs of an original copy are a tremendous burden, or simply for the pride and satisfaction of making something with your own two hands and the know-how to work with them. Make no mistake, there is value not only in individual parts, but also in the time and effort that goes into the making of the gun. This bill threatens to deprive Maryland residents of property, not only the value of materials but the value of time invested, sometimes many times over in the case of serious collectors.

Cost arguments aside, I have been a firearm owner for a few years now, the clear message I've received from bills like this is one of disdain and animosity toward those with an interest in owning a firearm for self defense, sport shooting, or hunting. This bill is no different, the bill is arbitrarily picking the origin of a firearm and attempting to deprive Maryland residents of their property with no justification and no compensation for their hard work, time, and materials.

The Do-It-Yourself attitudes that have become prevalent in our culture, be it home gardening, working on your own automobile, or even brewing your own fine wine or craft beer, also exist in the firearm community. Many Maryland residents like to tailor the things they use. In the case of a firearm, that thing is used for anything from self defense, hunting, or competition shooting. If the store doesn't provide it or charges unreasonably for it, they may wish to make it themselves. Take for instance, the case of me trying to find just the right grips for a handgun I enjoy shooting. I purchased a very nice CZ-75 handgun from a Maryland gun dealer, went through the MD State Police 77R process, but found when shooting that the grips simply didn't fit my hands or grip very well. Due to the company designing the handgun to fit a diverse base of customers, an active aftermarket exists for grip panels fitting this off the shelf gun. In essence, however, it's a guess and test system for what overpriced piece of plastic will fit your hands the best when it's bolted to the grip of the handgun. As I have a fair background in Computer Aided Design (CAD) and 3D printing, I decided to design and print grip panels for this handgun until I arrived on ones that fit my hand and afforded me the best grip, control, and accuracy with that firearm. Commercial grip panels for this firearm are essentially \$50-75 pieces of plastic, imagine having to try three different sets before you find one that fits you.

Lets take another example of why one might want to build their own firearm. In the case of Glock brand handguns, a common complaint is the ergonomics of the grip not fitting most hands very well. One option is to buy the Glock handgun, send it off to a custom gunsmith, wait weeks or even months, and pay in upwards of \$1,000 to have a handgun that fits your hand well. Another option is to manufacture your own. In the case of a Polymer 80 handgun frame, the ergonomic enhancements are already there from the factory but you still have to use commercial, off the shelf, Glock brand parts. The frame itself is where you must do the manufacturing yourself. It would be a violation of federal law to manufacture a firearm for another person, after all, so the burden of manufacture is on you, the ultimate owner of the firearm. When all is said and done, a handgun manufactured on a milling machine (often costing upwards of \$10,000 for even a used machine) will cost about \$650. Cheaper than the custom shop option, but still more expensive than an off the shelf Glock costing approximately \$400-500. Once again, the purpose of manufacturing this handgun yourself can be summarized with cost savings, ergonomics, and satisfaction in knowing *you* made the firearm you're depending on.

Information on making guns is readily available on the internet

If you take a moment to scan the QR code on the top of the first page, or visit <https://fossCAD.org/fc/cad/>, you will find a repository that details the design, engineering, and manufacture of firearms. This information is on the internet forever. This is, however, not the only source of gun blueprints and information. A short amount of time on Google will give you many resources with the required information, even the Library of Congress or Patent and Trademark Office are full of technical data that one could use to manufacture a firearm with little more than expensive machinist equipment, a hunk of metal, and some time and know-how.

Further illustrating this point, I found a technical book complete with blueprints, measurements, assembly, and troubleshooting instructions from a rifle manufacturer in a book store specializing in antique and used books. Aside from the beauty of the illustrations and frankly interesting engineering commentary throughout this book, where I found it may seem unlikely. It was being sold at a book store I frequent on Main street, just a few hundred feet from the very building

you are reading my testimony. In the pursuit of destroying this information, will you send Maryland State Police to book stores to comb through for old patents or technical drawings?

The bill is redundant to federal law

A purely plastic firearm would run afoul of The Untraceable Firearms Act of 1988 (<https://www.congress.gov/bill/100th-congress/house-bill/4445>), a bill that for over 31 years has mandated at least 3.7 ounces of steel must be present in any firearm so that it can be detected by an x-ray machine or metal detector. No firearm, 3D printed or not, can be legally made without that steel. Even without this steel, if a criminal were truly trying to make an “undetectable” firearm, the metal firing pin, metal springs, and metal ammunition would all show up as telltale signs on a metal detector or x-ray machine.

What does this bill mean to furthering the interest of public safety?

The rationale for this bill is weak, the only people who would comply are those who actively follow developments in Maryland law and have an interest in staying on the right side of the law. Criminals, by definition, do not follow these laws and will continue to ignore them. This law will not hurt criminals, but only those who chose to engineer firearms to meet their specific interests and needs, all while these Maryland residents did painstaking research into state and federal law to ensure they don't violate existing laws.

For these reasons, I must urge you give an unfavorable report to this bill. If it were enacted into law, the State will be prosecuting inevitable violations by otherwise law-abiding citizens of Maryland, destroying reputations and inflicting legal and economic ruin on these individuals, all for continuing to own a firearm that was legal the night before. Jobs will be lost, security clearances revoked, and families broken. Whatever public safety rationale is hollow, as criminals aren't going to invest the time, research, and effort into manufacturing their own firearm when a stolen handgun can be purchased in a back alley of Baltimore. Instead of muzzling the creativity, skill, and curiosity of Maryland residents by taking their property, it would better serve public interest to instead focus on those who have demonstrated a willful disregard for the lives and safety of others, the very people harming innocent people right now.

U.S. Constitution (excerpts)

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed.

Maryland State Constitution (excerpts)

Declaration of Rights Article 2: The Constitution of the United States, and the Laws made, or which shall be made, in pursuance thereof, and all Treaties made, or which shall be made, under the

authority of the United States, are, and shall be the Supreme Law of the State; and the Judges of this State, and all the People of this State, are, and shall be bound thereby; anything in the Constitution or Law of this State to the contrary notwithstanding.

Article 40: That the liberty of the press ought to be inviolably preserved; that every citizen of the State ought to be allowed to speak, write and publish his sentiments on all subjects, being responsible for the abuse of that privilege.

Article III: Legislative Department SEC. 40. The General Assembly shall enact no Law authorizing private property to be taken for public use without just compensation, as agreed upon between the parties, or awarded by a jury, being first paid or tendered to the party entitled to such compensation.

Sincerely yours,

Stephen Johnston

Position: UNF

SB 958
Criminal Law - Untraceable Firearms
OPPOSE

The whole aim of practical politics is to keep the populace alarmed (and hence clamorous to be led to safety) by menacing it with an endless series of hobgoblins, all of them imaginary.

H. L. Mencken

All large percentage of firearms manufactured prior to 1968 do not have serial numbers, and never did. This fact has never caused any concern among law enforcement agencies or been identified as an impediment to the investigative process.

The simple truth is that serial numbers are most useful in returning stolen firearms to the last legitimate owner of record. Once a firearm enters the illegal market, the tracing trail goes cold. *"Firearms are normally traced to the first retail seller, and sources reported for firearms traced do not necessarily represent the sources or methods by which firearms in general are acquired for use in crime."* Source: ATF 2018 Maryland Firearms Trace Report

Several sessions ago, high ranking officers in the Baltimore City Police Department admitted they could not recall a single instance wherein a firearm used in a crime, was in the possession of the firearm's legitimate owner at the time of the crime.

Attached to this testimony are the results of 2A Maryland's Public Information Act (PIA) request for information on so-called untraceable firearms. The PIA was sent to the following law enforcement agencies:

- Anne Arundel County Police Department
- Baltimore City Police Department
- Baltimore County Police Department
- Maryland State Police
- Montgomery County Police Department
- Prince George's County Police Department

The PIA asked for various information including the following (numbers shown below reflect the numbers in the attached PIA):

2. Firearms used in crime which had serial numbers removed or otherwise obliterated. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

3. Firearms used in crime which never had a serial number (e.g. built from commercially produced 80% complete receivers) and which were produced by private individuals. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

4. Firearms used in crime which never had a serial number, which were produced from raw materials by private individuals. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

5. Firearms used in crime which were produced in whole in in part on a 3D printer of any description. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

6. Firearms used in crime which were produced on CNC machinery (other than by a licensed firearms manufacturer). Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

The response clearly demonstrate that the criminal use of so-called untraceable firearms is so insignificant that none of the law enforcement agencies could provide any data.

It should also be noted that the manufacture of firearms does not require the use of sophisticated computer numeric controlled (CNC) machinery, 3D printers or computer software. The second attachment documents in photographs, the illegal manufacture of fully functioning sub-machineguns in Pakistan by persons using hand tools and only the most basic power tools.

SB 958 is an unjustified, politically driven response to a manufactured problem.

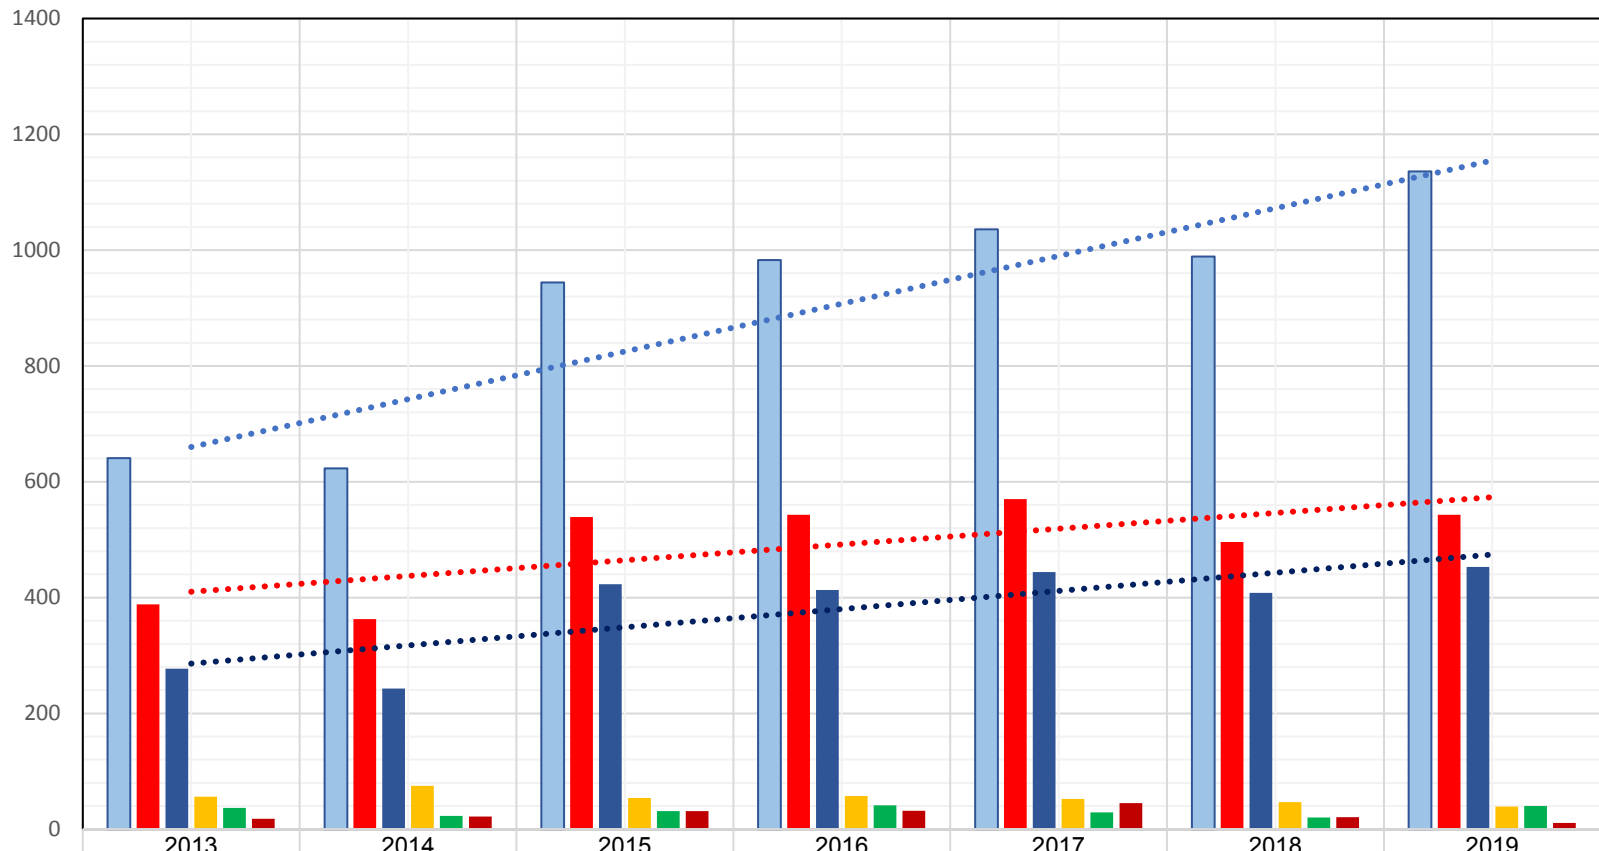

We ask for an unfavorable report.

John H. Josselyn, Director
2A Maryland

PUBLIC INFORMATION ACT REQUEST

PIAs SENT TO:

Anne Arundel County Police Department **Maryland State Police**
Baltimore City Police Department **Montgomery County Police Department**
Baltimore County Police Department **Prince George's County Police Department**

Dear:

Under the Maryland Public Information Act I hereby respectfully request the following firearms data and information for the years 2013 through 2018:

1. Firearms used in crime and recovered. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).
2. Firearms used in crime which had serial numbers removed or otherwise obliterated. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).
3. Firearms used in crime which never had a serial number (e.g. built from commercially produced 80% complete receivers) and which were produced by private individuals. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).
4. Firearms used in crime which never had a serial number, which were produced from raw materials by private individuals. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).
5. Firearms used in crime which were produced in whole in in part on a 3D printer of any description. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).
6. Firearms used in crime which were produced on CNC machinery (other than by a licensed firearms manufacturer). Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).
7. Firearms used in crimes by year and type, which were used by the registered owner during the commission of the crime. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

8. Firearms used in crimes by year and type, which were used by someone other than the registered owner during the commission of the crime. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).
9. Firearms used in crimes by year and type listed by year and type (rifle, pistol, revolver, shotgun, assault rifle) which were stolen and subsequently returned to the lawful owner.
10. Firearms purchased in gun “buy back” operations between 2000 and 2018 inclusive. Listed by type (rifle, pistol, revolver, shotgun, assault rifle) and which were reported by the lawful owner as stolen.
11. Firearms purchased in gun “buy back” operations between 2000 and 2018 inclusive, listed by year and type (rifle, pistol, revolver, shotgun, assault rifle) which were reported by the lawful owner as stolen, or determined to be stolen, and which were returned to the lawful owner.
12. Your Departmental Policy and Procedures for returning stolen and subsequently recovered firearms to the lawful owner of record.

For the purpose of this request, the data requested on firearms is for numbers only. No serial numbers or descriptive information beyond the type of firearms listed above is requested. Data in Excel electronic format, if possible, would be most helpful.

Please feel free to contact me with any questions you may have.

Respectfully,

John H. Josselyn

John Josselyn
2A Maryland

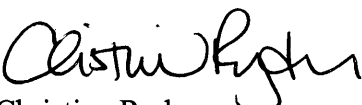

Dear Mr. Josselyn,

This letter is in response to your request dated January 11, 2019. Your request has been processed in accordance with the Maryland Public Information Act (MPIA), Annotated Code of Maryland, General Provisions Article § 4-101, et seq. (MPIA). Specifically, you have requested several types of information, all pertaining to firearms used in crimes and policy of return.

Upon search, the attached are all reports that we can produce pertaining to gun crime based on categorization and police report data. I have also enclosed our Department policies regarding release of firearms. Regarding all other listed items, data is not captured and/or indexed and is consequently not searchable on much of the very specific criteria you listed. Therefore, no records are responsive to those requests.

You may challenge any part of this response to your request by filing an action in the appropriate court of law pursuant to MPIA § 4-362. You may also contact the Public Access Ombudsman per MPIA § 4-1B-04.

Respectfully,

Christine Ryder
Custodian of Records

Re: MPIA Request 19 0096

Dear Mr. Josselyn,

On January 11, 2019 you submitted a request for public records to the Baltimore Police Department's ("BPD") Document Compliance Unit, for the following information:

Request #1. Firearms used in crime and recovered. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

Response: BPD has no responsive record. The Evidence Control Unit ("ECU") and the Firearms Analysis Unit ("FAU") are the Custodian of Records that would possibly have the information that you are requesting. Both Custodians don't share a database that collectively have the information that you are requesting. The ECU receives items into BPD custody and manage the storage of the items and many times, when firearms are brought in, no crime is associated with them. The firearms would be categorize as found firearms, firearms held for safekeeping, etc. and after they are in ECU custody, a crime may be associated with it, but ECU does not typically make changes to the status once received. So given this information, in order to provide the information that you are requesting, the Custodians would have to do a manually search of firearms used in a crime. And with that being said BPD would be creating a record, the PIA does not impose an obligation on a custodian to create a document that is responsive to a request. *See* MPIA Manual 14th Ed., October 2015, 3-44 (citing *Yeager v. DEA*, 678 F.2d 315, 324 (D.C. Cir. 1982)) ("[City] has no obligation to *create* records to satisfy a[n] [M]PIA request."); *see also MacPhail v. Comptroller of Maryland*, 178 Md. App. 115, 119 (2008) (explaining that pertinent Federal Freedom of Information Act ("FOIA") cases are "persuasive" authority in Maryland because the MPIA and the FOIA share "virtually identical" purposes.").

Request #2. Firearms used in crime which had serial numbers removed or otherwise obliterated. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

Response: BPD has no responsive record. ECU would be the Custodian of Records for this information. But ECU doesn't always track the serial numbers from firearms for different reasons, such as unable to locate, misinterpretation from the manufacturer, unknown if the firearm is old, or it may just not have a serial number. Giving a list of firearms with obliterated serial numbers from their database would not be accurate and could present a shewed representation of factual information.

Request #3. Firearms used in crime which never had a serial number (e.g. built from commercially produced 80% complete receivers) and which were produced by private individuals. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

Request #4. Firearms used in crime which never had a serial number, which were produced from raw materials by private individuals. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

Response #3 & #4: BPD has no responsive record. ECU and the FAU would be the Custodian of Records for this information but this information is not currently tracked in either ECU or the FAU. Obtaining this information is unlikely to occur with a time consuming process that would require a review and hand count of all firearms received during the time period requested. Privately manufacturing/producing a firearm for personal use from an 80% lower or raw materials is not illegal. Sharing tools, building in groups, or providing completed lower receivers ("LR") is illegal since The Bureau of Alcohol, Tobacco, Firearms and Explosives ("ATF") considers that manufactured for sale or distribution. FAU does not keep statistics on firearms received that appear to be produced from 80% LR's raw materials. The ATF may be a more reliable source for this information as they maintain lists of licensed firearms manufacturers.

Request #5: Firearms used in crime which were produced in whole in part on a 3D printer of any description. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

Request #6: Firearms used in crime which were produced on CNC machinery (other than by licensed firearms manufacturer). Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

Response #5 & #6: BPD has no responsive record. ECU and the FAU doesn't track this information in their databases. The ATF may be a more reliable source for this information.

Request #7: Firearms used in crimes by year and type, which were used by the registered owner during the commission of the crime. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

Request #8: Firearms used in crimes by year and type, which were used by someone other than the registered owner during the commission of the crime. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

Response #7 & #8: BPD has no responsive record. This information is not currently tracked in either ECU or the FAU databases. FAU does not capture this information either because Firearms Examiners analyze the evidence (firearms, and discharged firearms evidence) to determine a source of common origin (i.e. did this bullet come from this firearm). Owner, Suspect, Victim information is not considered so it won't create a potential bias for criminal cases. This information would best be obtained from the State's Attorney's Office.

Request # 9: Firearms used in crimes by year and type listed by year and type (rifle, pistol, revolver, shotgun, assault rifle) which were stolen and subsequently returned to the lawful owner as stolen.

Response: BPD has no responsive records. ECU is the responsible party for conducting the background investigations and returning firearms to their rightful owners. When going back to Response #1, it is unknown how many of the firearms were involved in crimes as compared to those that were not involved in crimes. ECU maintains the custody of evidence as well as personal property not involved in a crime (safekeeping, found property, etc.). Firearms are returned when legally permissible.

Request # 10: Firearms purchased in gun "buy back" operations between 2013 and 2018 inclusive. Listed by year and type (rifle, pistol, revolver, shotgun, assault rifle).

Response: BPD has no responsive records. There is no information readily available because ECU's database does not track information from "buyback" operations, this information is handled differently. In the December 2018 "buyback" the total number of firearms received was 1,860 and the breakdown was as follows (855 Handguns, 431 Shotguns, 510 Rifles and 64 Misc/Unknown. Firearms that were reported as stolen at the time of the buyback, as determined by personnel who were receiving the firearms at the buyback locations and ran the stolen check (0.59%) and the breakdown was as follows (7 Handguns, 2 Shotguns and 2 Rifles).

Request # 11: Firearms purchased in gun "buy back" operations between 2013 and 2018 inclusive, listed by year and type (rifle, pistol, revolver, shotgun, assault rifle) which were reported by the lawful owner as stolen, or determined to be stolen, and which were returned to the lawful owner.

Response: BPD has no responsive records This is an ongoing process and as of this date none have been returned to their lawful owner. During inventory for 1,860 firearms is a lengthy process, which is still ongoing. Information for the 2018 "buyback" will be contained in a final report when the entire operation is completed.

Request #12: BPD's Departmental Policy and Procedures for returning stolen and subsequently recovered firearms to the lawful owner of record.

Response: The Departmental Policy and Procedures for returning stolen and subsequently recovered firearms to the lawful owner of records is in a draft format and not completed. Once the draft is completed it will be released to the public.

You have the right under PIA § 4-1B-04 to contact the Public Access Ombudsman to mediate any dispute(s) you may have with this response. You may also, contest this response by filing a complaint for Judicial Review in Circuit Court pursuant to PIA § 4-362. Please refer to MPIA tracking # 19 0096 in any subsequent correspondence pertaining to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Dana Abdul Saboor". The signature is fluid and cursive, with the first name "Dana" being the most prominent.

RE: Maryland Public Information Act Request concerning Firearms Data and Information (#19-0090)

Dear Mr. Josselyn:

The Maryland State Police has received your request under the Public Information Act (Annotated Code of Maryland, General Provisions Article §§ 4-101 through 4-601) seeking records related to firearms data and information. We received your request on January 16, 2019.

This letter is to inform you that while the Maryland State Police maintains large volumes of records, but we would have to do a hand search for the data that requested. The information that we have would be incomplete as to firearms used in every crime for the years 2013 through 2018 because the Gun Center does not have data for every crime committed with a firearm. I have attached the policy requested in number 10 of your request letter – the policy and procedures for returning stolen and subsequently recovered firearms to the lawful owner of record.

I am required to provide you with notice of the remedies available for review pursuant to GP §4-203. You may seek judicial review of this decision in the appropriate Circuit Court in accordance with GP §4-362. You may also seek dispute resolution in accordance with GP §4-1B-04.

Having supplied a partial answer to you requested, I will close your request in our Public Information Act System.

Sincerely,

Rhea L. Harris
Public Information Act Coordinator

Re: Request for Information / Firearms Data

Dear Mr. Josselyn:

I am in receipt of your January 11, 2019 letter requesting records from the Prince George's County Police Department for information regarding firearms data. Your request is made pursuant to the Maryland Public Information Act ("MPIA").

Recently, the Prince George's County Government has received a large volume of MPIA requests. However, we will make every effort to process your request within thirty (30) days, as required by statute. Be advised that there are some requests that require specialized staffing and resources for processing. This, in turn, may cause response times to be somewhat longer than the normal thirty (30) days. See, Annotated Code of Maryland, General Provisions, Article 4-203(c)(2)(d).

Please note that pursuant to Maryland Code An., General Provisions, Article 4-203(c)(2), we are allowed to charge reasonable fees for time incurred to search, prepare and reproduce the documents that you have requested. At a later date, we will provide you with an estimated cost for your request. Before we release any documents to you, payment for the accumulated charges must be received. Without such payment, your request will be close without further action. See, Ireland v. Shearing, 417 Md. 401, 412, n. 8 (2010).

Several of your requests are not kept in an automated or electronic format and will be hard to produce but we will try to comply with as many requests as possible.

In closing, you may seek judicial review of this decision pursuant to Maryland Code Ann., General Provisions, Article 4-362. If you have any questions or need to contact me regarding this matter, I can be reached during normal business hours at (301) 772-4226.

Sincerely,

John T. Mitchell
Associate County Attorney

Evidence Retention Field Manual.docx

Hello Mr. Josselyn,

Thank you for your patience as we queried multiple departments within the Baltimore County Police Department in an attempt to fulfill your public information request. After speaking to representatives of our Firearm Interdiction Team, Evidence Management Unit, Forensic Services Section, and Crime Analysis Units we are unable to provide information for questions one (1) through eleven (11) of your request because that information is not tracked within our department. We do not have an existing database that captures the information you are seeking. Question twelve (12) or your inquiry is available. I have attached a copy of the BCPD Field Manual which governs the return of seized property (i.e.: firearms). Please do not hesitate to contact me should you have any further questions.

Thank you,

Yes, Anyone Can Print a Gun at Home. But Not a Very Good One.

Schematics went public online five years ago. There's a reason we haven't seen a surge in crimes committed with plastic weapons.

By [Elaine Ou](#)

August 1, 2018, 10:30 AM EDT

Plans for the Liberator handgun were published five years ago and have been illegally available online since. *Photographer: Robert MacPherson/AFP, via Getty Images*

Elaine Ou is a Bloomberg Opinion columnist. She is a blockchain engineer at Global Financial

Those who were waiting to get their hands on some 3D-printable firearm schematics are in for a disappointment: After eight states and the District of Columbia filed a [joint lawsuit](#) in federal court, a nationwide [temporary restraining](#)

Those who were waiting to get their hands on some 3D-printable firearm schematics are in for a disappointment: After eight states and the District of Columbia filed a [joint lawsuit](#) in federal court, a nationwide [temporary restraining order](#) was granted to stop the files from being posted by a Texas nonprofit called Defense Distributed.

The distribution of blueprints for 3D-printable guns had previously been classified as [illegal munitions export](#), but this May, the State Department announced a [plan](#) to amend the International Traffic in Arms Regulations regime to move the regulation of certain technical data to the jurisdiction of the Commerce Department. In response, 21 state attorneys general sent a letter to Attorney General Jeff Sessions and Secretary of State Mike Pompeo, saying that the decision was “deeply dangerous and could have an unprecedented impact on public safety.”

Regardless, little will change. Defense Distributed founder Cody Wilson first published blueprints for a printable gun called the Liberator more than five years ago. The files were removed after government demands, but a fundamental feature of the internet is that information never disappears. A search engine query can still surface copies of Wilson’s design files on internet archives and piracy sites across the web.

The whole episode mirrors the saga of cryptography, which was also once on the [U.S. Munitions List](#). Prior to 1996, encryption software could not legally be exported or distributed. [1](#) But software is just strings of text! Export controls on cryptography became such a joke that cryptographers printed a simple encryption script onto [T-shirts](#) and wore them in an act of defiance. [2](#)

Firearms are capable of a lot more damage than encryption, but this doesn’t mean we’re ushering in a dangerous new era in which nutjobs will be printing semiautomatic weapons from the comfort of their homes. There’s a reason we haven’t seen an uptick in the number of crimes committed using 3D-printed firearms since the Liberator plans became public five years ago: It’s not actually that convenient. Legalizing distribution of the plans will make them more readily accessible to amateur gunsmiths, but won’t transform 3D-printed guns into formidable weapons.

Depending on the 3D printer, the parts would take most of a day to complete. This is assuming the operator even has access to a precision printer. Entry-level machines can’t form parts with the tolerances and temperature control needed to produce a reliable firearm.

Even if made using today’s best 3D printing, the guns still aren’t very good. Any material pliable enough to feed through a printer will have trouble surviving the pressure and temperature required to propel a bullet at thousands of feet per second. (The instructions accompanying the Liberator recommend discarding the barrel after each use.) 3D-printed firearms are a clever idea, but not a very practical one.

The real purpose of Wilson’s blueprints is to dramatize the futility of gun control, much like encryption T-shirts were intended to troll those who wanted to ban encryption. Every outrageous article warning of a future where anyone can print deadly weapons serves only to validate his point and increase the hype around printable guns. Wilson’s [Twitter account](#) proudly retweets

every terrifying headline -- His organization couldn't have bought better advertising if they'd wanted to. [3](#)

Those headlines are overwrought. Yes, sufficiently-determined Americans can print a plastic firearm. But it'll be unreliable and quite likely to misfire and explode. (If you absolutely must proceed, consider taking a [safety course](#) while waiting for the gun pieces to print.)

Even if the Supreme Court overturns the temporary injunction, 3D-printable firearms are unlikely to catch on anytime soon. It would help if fear-mongers stopped providing free advertising.

“Did you really think we want those laws observed?” said Dr. Ferris. “We want them to be broken. You'd better get it straight that it's not a bunch of boy scouts you're up against... We're after power and we mean it... There's no way to rule innocent men. The only power any government has is the power to crack down on criminals. Well, when there aren't enough criminals one makes them. One declares so many things to be a crime that it becomes impossible for men to live without breaking laws. Who wants a nation of law-abiding citizens? What's there in that for anyone? But just pass the kind of laws that can neither be observed nor enforced or objectively interpreted – and you create a nation of law-breakers – and then you cash in on guilt. Now that's the system, Mr. Reardon, that's the game, and once you understand it, you'll be much easier to deal with.”

Please **OPPOSE** SB 958
Criminal Law – Untraceable Firearms

In a romantic relationship, a little bit of mystery is a good thing. This should be the same with the relationship between the citizens and their government. This year the MDGA wishes to make sure that government knows who is buying the guns via HB4/SB208 and then this bill, HB910/SB958 would prevent people from being home gunsmiths Thus insuring that government knows of all guns and who has them. Extreme caution should be taken before kicking out the pillars of freedoms that have existed for over 240 years in this country. Such huge societal changes can have a butterfly affect, causing ripples that will topple the dominoes in our lives in completely unforeseen ways. The results may be vastly opposite the desired goals. If the last 3.5 years have taught us anything, it is that ANYTHING is possible and that certain societal fail-safes need to remain in place now more than ever. Many of us have umbrella insurance policies. We pay gobs of money every year with the low expectation of ever really using it but still we do, just in case. I believe that standing firm against all of these bills is akin to paying our umbrella policy insurance bill because once we stop, you know that's when we'll need it the most!

I have seen, in person, people testing firearms they have built themselves and I'll tell you that for the amount of effort, frustration, and added cost (yes added), it sure doesn't seem worth it. Home gunsmithing is obviously just a hobby for talented machinists and tinkerers. It should not be placed on the "naughty hobby" list. You can always tell, at the range, that rare person testing a homemade firearm. They are the one who shoots once and then spends the next few minutes with tools, to include hammers, attempting to figure out what went wrong. One of the best quotes I've heard from such a person was "if I can get 500 shots through this thing it will eventually work reliably"; I found it hard not to show my doubt. At the rate he was going, he is probably still there! But you may say "but, but, but I saw this YouTube video". Yeah, and I watched a video demonstrating how to do a double back flip but you won't see me doing that anytime soon without dialing 911 first. If a criminal had the patients and skills to be a home gunsmith, they would most certainly be gainfully employed rather than being a criminal. We should be encouraging STEM work, not criminalizing it. If someone is talented enough at engineering and machinery to make something that explodes in their hand without killing themselves, America's STEM future is quite bright.

Lastly, I would like to say that with all the anti-firearm bills this year, gun owners are NOT your political enemies. We are your neighbors, safety conscience parents, dedicated public servants and members of your political party. Yes, we have a different culture, but it is one rooted in goodness, not criminality. Bills directed solely and squarely at the firearms community will not solve any of society's ills.

gmkoh@comcast.net

Position on bill: OPPOSE

1. This is yet another bill aimed at outlawing firearms possession of all persons, which has become the obvious goal of many of the supporters of restrictive firearms legislation:

This is patently obvious when listening to the committee proceeding and none of the witness, including the supporters "expert" (and often non Maryland resident) witnesses) none of whom can produce even anecdotal data the actually relates to the bill in question. Witness after witness will testify that they are a firearm violence survivor and therefore support this bill. None have been able to demonstrate how the bill in question applies to their violence survivorship, or how it would have prevented the "violence". Some early in this session have been honest enough to admit that they wanted to remove all firearms from private citizens, that is until they were counseled by their leaders not to mention that in testimony.

2. One of the broadest, most restrictive firearms legislation in the country, Firearms safety act of 2013, was passed in spite of over a decade of decreasing violence rates in Maryland. If one discounts Baltimore (10% of Maryland's population but 60% of Maryland's murders annually) Maryland would have been one of the top 5 safest states in the US.

The goal was to reduce violence in general and firearms violence in particular. All the provisions of the bill were restrictive in nature, restricting certain types of firearms and accessories, adding expense and administrative hurdles and stricter requirements to firearms ownership. Any amendment proposed to add or increase penalties for violent criminal were rejected by the MGA. Significant testimony included the statement by the Baltimore Chief of Police, Chief Batts at the time, that in response to a question as to the source of firearms used by Baltimore criminals to the effect that he did not know because very few firearms were recovered.

Six years later, the common sense provisions of FSA13 has been shown to be not just ineffective, but counter productive. Murders in Maryland have reached record levels, Baltimore has become the most dangerous city in the US, and the murder rate has gone up over 70% in that time. And the statistics probably do not tell the whole story. UMMC Shock Trauma has become so good at saving lives, the numbers of non fatal shootings has gone up even higher than the murders. Thank God the criminals are such lousy shots.

Common sense-rational sense- would dictate that when one course of action has failed to show any positive results, nay has actually shown an exacerbation of the issue, that another course of action should be explored instead of doubling down on the failed strategy. (of course, I mean the failed strategy has been firearms restriction and prohibition).

3. This is another bill that is restrictive. It does not address the problem proactively, not does it address any demonstrable problem.

4. This bill addresses "untraceable" firearms. But not all untraceable firearms should be grouped together together. Let me address the different categories separately. And it is important to look at relevant argument for and against in light of each category.

a. Serial files off, removed, of obliterated. This is already prohibited by federal law. Testimony in favor of this bill has already been presented that 30% of the recovered firearms used in crime in California were untraceable. But the witness was unable to break them down. I would submit that the great majority were in this group- serial numbers obliterated. Already illegal.

b. 3D printed. 3 D printers are expensive and require skill to use, Not a predominate trait of most violent criminals. They are also bulky, unreliable and dangerous. The technology is not there yet. You cant print out a 3d firearm at the library. (some counties offer 3d printers at one or more public libraries)

c. CNC manufactured firearms. CNC machines are huge and expensive (10's of thousands of dollars). Not likely a criminal gang would make that investment when smuggled or stolen firearms are more readily available and cheaper. Manufacturing of firearms without a federal license is already tightly restricted by federal law and requires a license. Individuals could use one for making one or two firearms, but the numbers are low and the statisitcs do not support the notion that these firearms are used in any significant numbers in crime. Federal law allows construction of firearms for personal use but not with the intention of sale.

d. Firearms constructed basically from raw materials. From raw materials- blocks of aluminum, steel, or polymers.. These are generally more expensive than buying a manufactured firearm of equal quality. Enthusiasts choose to make their own for the satisfaction of making a functional tool, understanding the technology of what they shoot, creating a one of a kind firearm to be passed down maybe for generations, to commemorate an event or something of significance. Some consider a firearm a work of art- the melding of form and function. Most with criminal intent will not invest the time, expense, and effort necessary. And the making or assembly of a prohibited firearm is already illegal.

Banning those firearms in B, C and D that are not already illegal would require a taking and that would cost Maryland taxpayers and unknown amount for what will provide no gain. No manufacturer will issue a serial number for a firearm that they did not make. An option would be to task the MSP to issue a state serial number, but this would entail additional personnel and time that they might not be able to spare.

The point is, I have been able to find nothing to support the idea prohibiting any of the last three categories would impact violent crime. And the first category is already prohibited. Before supporting this bill, I urge you to investigate the magnitude of the problem is there is any problem at all.

Re: RE: OPPOSE all new gun control bills and HB 1261

Dear elected official and staff:

I stand with the Firearms Policy Coalition and other pro-rights groups in **OPPOSITION to HB 1261 and the dozens of other gun control bills introduced this session.**

These new proposals will only crack down on those wishing to defend themselves with commonly owned guns--it will not make a difference to the criminal element. MD already has some of the strongest gun control laws in the nation.

These new proposed measures are untenable, especially because we all know criminals are not going to follow them at all. We know this because after the last big gun control laws in Maryland passed it had no significant impact on gun crime; in fact it, increased and hasn't come down.

It's time representatives in Annapolis finally stand up and defend the entire Bill of Rights and stop catering to anti-rights extremists like Michael Bloomberg.

Please make a stand and OPPOSE HB 1261, as well as the dozens of other proposed gun control bills.

Thank you.

Sincerely,
Matthew P kopp

HB 910 and SB 958: Criminal Law – Untraceable Firearms

Oppose

The Stoney Creek Fishing and Hunting Club, which has some 300 members and has been in existence for over 70 years, **OPPOSES HB 910/SB 958**. We oppose these Bills because they would create instant criminals of many law abiding citizens of the State, they would create an unlawful taking of property and elements thereof would be unenforceable.

In brief, HB 910/SB958 would amend Articles 4-602 through 4-604 to:

1. Prohibit, with certain exemptions, the use or distribution of 3-Dimensional (3D) printers to manufacture, assemble, or construct a firearm;
2. Prohibit a person from **possessing**, selling, offering for sale, transferring, purchasing or receiving a firearm manufactured, assembled or constructed by a 3D printer.
3. Prohibit the manufacturing, assembling or construction of “covert firearms” i.e., key chains, pens, cigarette lighters, cell phones, etc or “undetectable firearms”, i.e. those that would be undetectable at airport security check points.
4. Prohibit a person from **possessing**, selling, offering for sale, transferring, purchasing, or receiving a covert or undetectable firearm;
5. Prohibit a person from manufacturing, assembling, or constructing a firearm that does not have a serial number imprinted by a federally licensed firearm manufacturer or importer;
6. Prohibit a person from **possessing**, selling, offering for sale, transferring, purchasing or receiving as firearm that is not imprinted with a serial number issued by a federally licensed firearm manufacturer or importer.

(Above highlighting by author.)

Penalties for violating any of the these provisions would be imprisonment not exceeding 2 years, a fine not exceeding \$5,000, or both.

Citizens of Maryland have for many, many years made firearms for their own use. They have done so for the pleasure of having produced something by their own hands, to save money or to achieve a high level of accuracy for competitive shooting. Such firearms have run the span from single shot muzzle loaders to precision, modern day firearms. And they have produced these firearms without violating any federal or State laws. Never have they been advised that at some point they would not be able to possess these firearms nor that they would become criminals, subject to imprisonment and fines, for having them in their possession.

BH 910 and SB 958: Criminal Law – Untraceable Firearms
Testimony of Stoney Creek Fishing and Hunting Club
OPPOSE
February 26 and March 3, 2020
Page 2

As noted above, the mere possession of the prohibited items, whether manufactured using the 3D process, lacking a serial number, etc. the owners would become instant criminals upon the effective date of the legislation (October 1, 2020). They will have no opportunity to sell, transfer or otherwise dispose of their firearms and thereby will suffer a financial loss.

Not only will these Bills make instant criminals of law abiding citizens, but they will be faced with a “taking without compensation”. Such action is expressly prohibited by both Article 40 of the Maryland Constitution and the Fifth Amendment (Bill of Rights) to the U.S. Constitution. Both documents prohibit the taking of personal property without just compensation.

We are also deeply concerned about the prohibition against using 3D printers to create a firearm and the prohibition of sharing such 3D information, say via the internet. We know of no other such limitations being placed on the use of 3D printers nor the sharing of information about them. We strongly suspect the restrictions in the Bills concerning distribution of such information run afoul of the U.S. Constitution’s First Amendment concerning free speech.

Another troubling aspect of these Bills is their limitations on such “James Bond” type items as key chains, cigarette lighters, cell phones, etc. that would constitute a covert firearm. Even a .22 caliber firearm, one of the smallest size rounds of ammunition available requires a steel barrel with an outside diameter of slightly over ½” (5/8”). Assume a barrel length of but 2” plus some type of firing device, and it is difficult to conceive how such an item would be incorporated into these devices. And it would be a single shot device as well. It appears such a device would also be detectable at airport security check points, not only because of the metallic materials in the firearm, but those in the ammunition as well.

Our final concern is that elements of HB 910/SB 958 would be unenforceable. How would law enforcement agencies identify whether a firearm was made using a 3D computer versus some other manufacturing process? Or how would they determine that a firearm without a serial number was made prior to, or subsequent to 1968? Many individuals maintain their firearms in pristine condition making it very difficult to determine their age.

For the above concerns we believe these Bills to be unworkable and recommend they receive an unfavorable report.

I am writing to express my **opposition to HB910 (SB958) and HB1257 (SB816)**.

Name: Ian Rus Maxwell

Address: 18307 Crestmount Road Boyds MD, 20841

Bill #'s: HB910 (SB958): "Untraceable Firearms"

Bill #'s: HB1257 (SB816): "Licensed Firearms Dealers"

RE HB910 (SB958):

Of course, the law will do nothing to reduce crime as 3-D printed firearms have yet to be used in crimes. In addition, the prohibitions on the sharing of manufacturing-related computer programs is much too broad. Programs used in the 3-D printing of nearly any item have a great deal of similarity to those used in the printing of firearms parts, thus, the law as written could make the sharing of such unrelated code a crime.

RE HB1257 (SB816):

The proposed law will make the selling of firearms so costly and cumbersome that no business owner will want to engage in the trade. Will we start adding these sort of requirements to any vendor of potentially lethal devices? Kitchen stores making videos for those buying cleavers? Auto dealers making videos of car buyers?

Sincerely,

Ian Rus Maxwell

OPPOSE SB958

Criminal Law - Untraceable firearms

Art Novotny

3/3/2020

This bill covers multiple complex issues, and probably should be broken up into several different bills to be thoroughly evaluated individually.

Honestly, I do not know much about the 3-D printed portion, but it seems to involve a variety of issues beyond firearms. I'll leave that one up to the experts.

I personally do not have any interest in the covert or undetectable firearms, although I have heard of people collecting such things as relics of the Cold War. It would be a shame for a collector to have his life ruined over such a trinket. Undetectable firearms are already federally prohibited (see the ATF attachment below). I have to wonder if covert and undetectable firearms are really a problem, this side of the TV or movie screen.

Section 4-604 does affect me, in two ways. First, I am the custodian of several family heirloom firearms that do not have serial numbers. Back in the "old days," when rifles and shotguns could be bought in department stores or mail order, they were not required to be serialized. They were bought, legally, before 1968. I am sure of that, based on family anecdotal evidence, and the apparent age and styling of the firearms, but I have no way of actually proving it in court. I do want to be able to keep and eventually pass along my great grandfather's shot gun. I certainly do not want to go to jail for possessing it.

Secondly, a few years ago I partook in the longstanding American tradition of home firearms building. I do not yet have the specialized skills or tools to build a firearm completely from scratch, so I used a variety of off the shelf parts and an 80% "finish it yourself" kit to create something very unique. I just used it in a competition this past weekend. With a few more tweaks, I look forward to competing with it again...and with it hopefully working a little better. I would like to build some more, but...again, I do not want to go to jail for my collection.

I have already gone through the extensive vetting (finger printing, training, background checks... more background checks, and fees) process to earn my Handgun Qualification License (HQL), and have a fairly healthy collection of firearms. I've proven that I'm a "good guy," and having this homebuilt unserialized firearm is not going to lure me down a dark path and entice me to do anything nefarious that, frankly, I could not have done with any of my other firearms.

No one wants prohibited people from accessing firearms. It is already illegal for them to possess or me to transfer to them any firearms, serialized or not. We are not building these to send out onto "the street." That is already quite illegal federally (firearms may *only* be built by non-FFL's for personal use). It would also not be a very lucrative business. By the time all of the parts had been gathered, the system I used to create copy of a Glock represented an investment of well over \$700 (for a gun that does not yet always work reliably), and several hours worth of work. A new Glock would cost about \$500 (used, even less), and work perfectly every time right out of the box.

Consider including an exemption to allow HQL holders such as myself, who have proven themselves safe, sane "good people" to possess their homebuilt unserialized firearms.

Leaving them unserialized will stand as a red flag to others to stay away! It will signify that that firearm is not for sale, trade, or borrowing.

Give us some way to keep the property we already own, legally per ATF guidelines, without going to jail.

Additionally, please look at this:

It is the grip module for my wife's Sig P320 that she uses in competition. They come in various sizes for different purposes and to fit different hands. This is an extra one, as she has purchased a smaller one to better fit her hands. The firearm it works with came with a serial number and required an HQL, background check, and waiting period. The trigger group is the serialized portion, that easily interchanges between different grip modules (you can see the empty "window" at the top of the grip where, when assembled, the serial number is visible).

It is a legitimate firearm part and most certainly *not* something marketed to be manufactured into the receiver of a firearm not imprinted with a serial number...but it sure looks like one. A clever machinist could probably replicate the internal, regulated parts to make it into something unserialized, even though it was never intended to be. How do we prove that it is not? The customizable modularity of the Sig P320 is a popular selling feature. Surely there are hundreds of these grip modules in the state, legally owned by people who never intended to do anything other than use them on their already serialized and regulated purchase.

Firearms Q&As

Does an individual need a license to make a firearm for personal use?

No, a license is not required to make a firearm solely for personal use. However, a license is required to manufacture firearms for sale or distribution. The law prohibits a person from assembling a non-sporting semiautomatic rifle or shotgun from 10 or more imported parts, as well as firearms that cannot be detected by metal detectors or x-ray machines. In addition, the making of an NFA firearm requires a tax payment and advance approval by ATF.

[18 U.S.C. 922(o), (p) and (r); 26 U.S.C. 5822; 27 CFR 478.39, 479.62 and 479.105]

Written Testimony of Katie Novotny in Opposition of SB958

March 3, 2020

I am a member of Multiple Gun Rights organizations. Maryland Shall Issue, Associated Gun Clubs, Maryland State Rifle and Pistol Association, and the National Rifle Association. I am a certified Range Safety Officer with the NRA. I compete in multiple shooting events such as Steel Challenge, 3-gun, small bore, and vintage military rifle matches. I am an avid firearms collector. I oppose SB958.

This bill is over reach by the State and serves no purpose except to criminalize normal, lawful behavior. It has been legal to manufacture firearms for one's own use for the entire history of the United States.

A portion of this bill, page 4, lines 12 through 19, are taken entirely from the ATF frequently asked questions page. <https://www.atf.gov/firearms/qa/firearm-illegal-if-it-made-plastic> It is already federally illegal to manufacture a firearm that is not detectable by a metal detector, why do we wish to make it even more illegal? It is also already federally illegal to manufacture homemade firearms for sale. They are intended for personal use. <https://www.atf.gov/firearms/qa/what-atf-doing-regards-people-making-their-own-firearms>

This bill has severe first amendment implications. The government may not ban certain speech simply because it disagrees with it. A content based ban must meet the strict scrutiny standard and meet a compelling state interest. There is no compelling state interest here, aside from the desire to ban ownership of certain firearms based on fear.

Serial numbers are only useful for an owner keeping track of their property, perhaps for collector insurance purposes. They are not particularly useful in solving crime, or anything else. Details here: <http://www.davekopel.org/2A/LawRev/CluelessBATFtracing.htm> Basically, the ATF is authorized to track guns using the serial number, but only when requested to do so by the police. The police do not do a trace on a majority of firearms recovered because where they came from generally has no bearing on their case. So information gathered by the ATF from traces is not representative of anything. If serial numbers were important, police would request traces significantly more often.

There is so much focus on tracking a firearm by the serial number. The presence of a serial number does not automatically make it easier to track a firearm or to solve a crime. Serial numbers are not tracking devices, they do not act as a GPS device to take you to the gun and the perpetrator of a crime that gun was used in. Furthermore, tracking property by a GPS unit is also unconstitutional, as decided in *United States v. Jones*.

Because of these reasons above, I request an unfavorable report.

Position: UNF

My name is Carl M O'Donnell of district 19 and I am writing in **opposition to SB816/HB1257.** This past year Maryland Gun stores faced several bold attacks from criminals. Instead of sympathy we are discussing new burdens for them. Please listen to local FFL license holders and collaborate with them in pursuing criminals. All too often FFLs report suspicious and disqualified potential buyers only to go unanswered by law enforcement. These new bills are attacking the victim rather than supporting local business owners. Please pass an unfavorable review of this bill.

WRITTEN TESTIMONY OF MARK W. PENNAK, PRESIDENT, MSI, IN OPPOSITION TO HB 910 and SB 958

I am the President of Maryland Shall Issue (“MSI”). Maryland Shall Issue is an all-volunteer, non-partisan organization dedicated to the preservation and advancement of gun owners’ rights in Maryland. It seeks to educate the community about the right of self-protection, the safe handling of firearms, and the responsibility that goes with carrying a firearm in public. I am also an attorney and an active member of the Bar of Maryland and of the Bar of the District of Columbia. I recently retired from the United States Department of Justice, where I practiced law for 33 years in the Courts of Appeals of the United States and in the Supreme Court of the United States. I am an expert in Maryland firearms law, federal firearms law and the law of self-defense. I am also a Maryland State Police certified handgun instructor for the Maryland Wear and Carry Permit and the Maryland Handgun Qualification License (“HQL”) and a certified NRA instructor in rifle, pistol, personal protection in the home, personal protection outside the home and in muzzle loader. I appear today as President of MSI in opposition to HB 910 and SB 958.

These Bills

3-D Printers: These bills contain three main parts. First, the bills would enact a new Section 4-602 of the Criminal Law article to the Maryland code in order to ban the use of a 3-D printer TO MANUFACTURE, CAUSE TO BE MANUFACTURED, ASSEMBLE, OR CONSTRUCT A FIREARM; OR DISTRIBUTE A COMPUTER PROGRAM DESIGNED FOR THE SPECIFIC PURPOSE OF MANUFACTURING, CAUSING TO BE MANUFACTURED, ASSEMBLING, OR CONSTRUCTING A FIREARM USING A 3-DIMENSIONAL PRINTER. This new section would also provide that A PERSON MAY NOT POSSESS, SELL, OFFER TO SELL, TRANSFER, PURCHASE, OR RECEIVE A FIREARM MANUFACTURED, ASSEMBLED, OR CONSTRUCTED IN VIOLATION OF SUBSECTION (C)(1) OF THIS SECTION [the ban on the use of a 3-D printer].

Covert guns: The bills would then enact a new Section 4-603 to ban “COVERT FIREARMS,” which are then listed in the bills. The bills would also ban “UNDETECTABLE FIREARMS,” which is defined by reference to an undefined “security exemplar,” or by reference to those firearms which cannot be detected by an x-ray machine “COMMONLY USED AT AIRPORTS.” The bills then provide that a person may not (1) MANUFACTURE, CAUSE TO BE MANUFACTURED, ASSEMBLE, OR CONSTRUCT A COVERT FIREARM OR AN UNDETECTABLE FIREARM; OR (2) POSSESS, SELL, OFFER TO SELL, TRANSFER, PURCHASE, OR RECEIVE A COVERT FIREARM OR AN UNDETECTABLE FIREARM.

Serial numbers: Next, the bills would enact new Section 4-604 to provide that a person may not:

(1) MANUFACTURE, CAUSE TO BE MANUFACTURED, ASSEMBLE, OR CONSTRUCT A FIREARM THAT IS NOT IMPRINTED WITH A SERIAL NUMBER ISSUED BY A

FEDERALLY LICENSED FIREARMS MANUFACTURER OR FEDERALLY LICENSED FIREARMS IMPORTER IN COMPLIANCE WITH ALL FEDERAL LAWS AND REGULATIONS REGULATING THE MANUFACTURE AND IMPORT OF FIREARMS; OR

(2) POSSESS, SELL, OFFER TO SELL, TRANSFER, PURCHASE, OR RECEIVE:

(I) A FIREARM THAT IS NOT IMPRINTED WITH A SERIAL NUMBER ISSUED BY A FEDERALLY LICENSED FIREARMS MANUFACTURER OR FEDERALLY LICENSED FIREARMS IMPORTER IN COMPLIANCE WITH ALL FEDERAL LAWS AND REGULATIONS REGULATING THE MANUFACTURE AND IMPORT OF FIREARMS; OR

(II) AN OBJECT MARKETED OR ADVERTISED TO BE, OR THAT A REASONABLE PERSON WOULD UNDERSTAND TO BE, DESIGNED FOR THE PURPOSE OF BEING MANUFACTURED, ASSEMBLED, OR CONSTRUCTED INTO THE FRAME OR RECEIVER OF A FIREARM THAT IS NOT IMPRINTED WITH A SERIAL NUMBER ISSUED BY A FEDERALLY LICENSED FIREARMS MANUFACTURER OR FEDERALLY LICENSED FIREARMS IMPORTER IN COMPLIANCE WITH ALL FEDERAL LAWS AND REGULATIONS REGULATING THE MANUFACTURE AND IMPORT OF FIREARMS.

A. **Homemade Guns Are Not Used In Crime And Existing Owners Are Law-Abiding Hobbyists, Not Criminals**

These new provisions, if enacted, would severely criminalize a harmless activity that has been perfectly legal under federal and state law for the entire history of the United States, *viz.*, the manufacture of homemade guns for personal use. Under federal law, a person may legally manufacture a firearm for his own personal use. See 18 U.S.C. § 922(a). However, “it is illegal to transfer such weapons in any way.” *Defense Distributed v. United States*, 838 F.3d 451, 454 (5th Cir. 2016). This manufacture “involves starting with an ‘80% lower receiver,’ which is simply an unfinished piece of metal that looks quite a bit like a lower receiver but is not legally considered one and may therefore be bought and sold freely. It requires additional milling and other work to turn into a functional lower receiver.” (Id).

Manufacturing an “80% lower” into a “functional lower receiver” is not a trivial process. It takes machine tools, expertise and hours of time. Miscues are common and, when made, essentially convert the “80% lower” into scrap metal. Individuals who undertake this process are hobbyists, not criminals. Even after the receiver is successfully made, the owner would still have to purchase the additional parts, such as a barrel, the trigger, slide and all the internal parts to complete the assembly. All these additional parts are expensive. With the cost of the tools to mill the receiver, plus the cost of the parts, a final assembled homemade gun costs **roughly twice** as much to make as it would to actually buy an identical gun from a dealer.

Moreover, such 3-D printed guns are almost never used in a crime if only because of all the time and expense that is necessary to make such guns. It is far easier and far cheaper to buy an illegal gun on the streets than to make a gun. Yet, these bills would ban the hobby and imprison the hobbyist for the continued possession of any gun that the hobbyist constructed prior to the enactment of the law. That likely includes literally thousands of law-abiding people in Maryland.

Indeed, it is actually **more** expensive to use a 3-D printer to manufacture a firearm from an “80% lower.” Manual manipulation is still required. Precision cutting and drilling is still necessary and the chance of errors, while reduced, still abound. Purchase of other parts and assembly is still required. The same federal proscriptions on sale or transfer of such guns still apply. Again, it is far easier and cheaper for the criminals to obtain firearms on the street. Using a 3-D device simply makes that process somewhat easier than the existing manual process that has existed in this country for centuries.

There is nothing threatening or dangerous about this process. Using a computer does not produce any firearm that could not be otherwise produced by hand, using manual processes and hand tools. The use of the computer just ameliorates the risk of the possible errors associated with milling the 80% lowers into a functional receiver. **The resulting receiver is the exactly the same, functionally, as a receiver milled by hand.** Any sale of a finished receiver is banned by federal law, regardless of how it is manufactured. That is because a finished receiver is classified as a “firearm” under federal law, 18 U.S.C. 921(a)(3), just as it is under existing Maryland law, MD Code, Public Safety, § 5-101(h)(1)(ii). Thus, the receiver can only be used in a homemade gun made solely for personal use.

Moreover, the idea that 3-D printed guns are undetectable is nonsense. Current federal law makes it unlawful to “manufacture, import, sell, ship, deliver, possess, transfer, or receive” any firearm that is not “detectable” by a “Security Exemplar” or any “major component” of which does not show up accurately on airport x-ray machines. See 18 U.S.C. § 922(p). A knowing violation of that prohibition is a federal felony, punishable by five years of imprisonment and a fine. See 18 U.S.C. § 924(f). As a practical matter, a 3-D gun would need to have a metal barrel and a metal firing pin, at the very least. Both of these items would easily satisfy the requirement of being detectable by a Security Exemplar as firearm component. See Section 922(p)(2). The idea that an owner could easily 3-D print a barrel is unfounded. 3-D printed plastic barrels simply would quickly deteriorate upon use, even assuming that it withstood the firing of the first round of any modern ammunition. For example, a standard 9mm handgun round generates around 36,000 PSI in the chamber upon firing. <https://www.gunnuts.net/2009/04/03/9mm-nato-vs-9mm-luger/>. Firing a 3-D gun with a plastic barrel borders on Russian roulette.

B. These Bills Would Do Nothing To Prevent Or Deter Criminals From Acquiring Guns While Criminalizing Existing, Law-Abiding Owners

The bans on manufacturing and possession imposed by the bill would also not stop any person from actually acquiring “80% lowers” or the other parts necessary to manufacture firearms. Such items are not “firearms” under federal law and thus are not regulated by federal law. These “80% lowers” and other parts are available across state lines, over-the-counter, on-line and by mail order and would remain thus available, even if these bills should become law. The bills would simply criminalize the manufacture and possession of an actual firearm created using a 3-D printer. Nothing in all the bans imposed by this bill would actually stop any criminal or disqualified person from acquiring all the hardware necessary to make his own gun, including the 80% lower. The computer software that this bill would attempt to ban is freely available in multiple places on the Internet. See, e.g., <https://www.recoilweb.com/where-to-find-3d-printed-gun-files-140438.html>. These bills cannot possibly stop that publication – it is available to every person with a computer and

a connection to the Internet. A disqualified person or criminal would not be deterred by the ban on downloading the software or the ban on manufacturing or possession of a completed gun, since such a disqualified person is **already** precluded by federal law from possessing **any** modern firearm or modern ammunition of **any** type. 18 U.S.C. § 922(g). Actual or constructive possession of a modern firearm or ammunition by a person subject to this firearms disability is a felony, punishable by up to 10 years imprisonment under federal law. See 18 U.S.C. § 924(a)(2). The same disqualification and similar punishments are also **already** imposed under existing Maryland law. See MD Code, Public Safety, § 5-101(g)(3), § 5-133(b)(1), § 5-205(b)(1).

In contrast, if this bill became, few existing, otherwise law-abiding owners of these homemade guns will know or realize that they have become criminals. Actual compliance by existing owners will thus likely be virtually non-existent. Enforcement on this ban on possession of the software and the completed gun will be both very difficult and arbitrary. In short, these bills are utterly **pointless** as a public safety measure. It would succeed only in criminalizing and potentially imprisoning otherwise law-abiding hobbyists. That result is impossible to justify as a matter of sound public policy. Plainly, little thought has gone into this bill.

C. The Bills Violate The First Amendment

The whopper in these bill is that it would provide that a person may not “DISTRIBUTE A COMPUTER PROGRAM DESIGNED FOR THE SPECIFIC PURPOSE OF MANUFACTURING, CAUSING TO BE MANUFACTURED, ASSEMBLING, OR CONSTRUCTING A FIREARM USING A 3-DIMENSIONAL PRINTER.” This ban is a gross violation of the First Amendment.

First, there is no doubt that computer “software” or a “computer program” is fully protected by the First Amendment. See, e.g., *Junger v. Daley*, 209 F.3d 481, 482 (6th Cir. 2000) (“Because computer source code is an expressive means for the exchange of information and ideas about computer programming, we hold that it is protected by the First Amendment.”); *Universal City Studios, Inc. v. Corley*, 273 F.3d 429, 449 (2d Cir. 2001) (“[C]omputer code, and computer programs constructed from code can merit First Amendment protection.”). Banning computer programs is thus akin to banning a book and banning distribution of computer code is thus akin to banning the distribution of a book. If passed, the General Assembly would turn law enforcement officers into censors.

Second, even worse, the ban imposed by these bills is a purely “content-based” prior restraint on a First Amendment activities. See *Reed v. Town of Gilbert*, 135 S.Ct. 2218 (2015). Under *Reed*, a facially content-neutral law will still be categorized as content based if it “cannot be “justified without reference to the content of the regulated speech,” or ... adopted by the government ‘because of disagreement with the message [the speech] conveys.’” *Id.* at 2227 (quoting *Ward v. Rock Against Racism*, 491 U.S. 781, 791 (1989)).

Here, there is nothing facially neutral about the ban imposed by this bill. Rather, the bill is expressly content-based as it bans specifically only software that is “DESIGNED FOR THE SPECIFIC PURPOSE OF MANUFACTURING, CAUSING TO BE MANUFACTURED, ASSEMBLING, OR CONSTRUCTING A FIREARM USING A 3-

DIMENSIONAL PRINTER.” The ban is based on the sponsor’s “disagreement with the message.” Such a prior restraint on the message cannot stand.

A “law imposing criminal penalties on protected speech is a stark example of speech suppression.” *Ashcroft v. Free Speech Coal*, 535 U.S. 234, 244 (2002). A content-based regulation of speech is subject to strict scrutiny. *Reed*, 135 S.Ct. at 2231. Under this standard, the government must prove “that the restriction furthers a compelling interest and is narrowly tailored to achieve that interest.” *Id.* (quoting *Ariz. Free Enter. Club's Freedom Club PAC v. Bennett*, 131 S.Ct. 2806, 2817 (2011)). See also *Cahaly v. Larosa*, 796 F.3d (4th Cir. 2015) (applying *Reed* to invalidate a state statute that banned politically-related unsolicited calls made by automatically dialed announcing devices”). There is thus no doubt that the bill is content-based suppression of speech.

Moreover, every American has a First Amendment right to receive information. Although the First Amendment refers only to the right to speak, courts have long recognized that the Amendment also protects the right to receive the speech of others. See *First Nat'l Bank of Boston v. Bellotti*, 435 U.S. 765 (1978) (stating that the “First Amendment ... afford[s] the public access to discussion, debate, and the dissemination of information and ideas”) *Virginia State Bd. of Pharmacy v. Virginia Citizens Consumer Council, Inc.*, 425 U.S. 748 (1976) (ban on advertising of prescription drug prices overturned); *Bigelow v. Virginia*, 421 U.S. 809, (1975) (ban on abortion advertising invalid); *Lamont v. Postmaster General*, 381 U.S. 301, (1965) (a postal regulation limiting the importation of Communist publications overturned); *Martin v. City of Struthers*, 319 U.S. 141 (1943) (ordinance prohibiting door-to-door solicitation invalid as to distribution of leaflets announcing a religious meeting). Thus, every person in Maryland has a constitutional right to receive, purchase or otherwise obtain the very computer software or programs that these bills would ban. The bills are blatantly unconstitutional in banning distribution of protected speech.

Even more fundamentally, the bans imposed by this bill are a form of prior restraint of First Amendment protected material, as the bills broadly state that a person may not DISTRIBUTE A COMPUTER PROGRAM DESIGNED FOR THE SPECIFIC PURPOSE OF MANUFACTURING, CAUSING TO BE MANUFACTURED, ASSEMBLING, OR CONSTRUCTING A FIREARM USING A 3-DIMENSIONAL PRINTER. It is well-established that prior restraints to speech are “the most serious and least tolerable infringement on First Amendment rights.” *Nebraska Press Ass'n v. Stuart*, 427 U.S. 539, 559 (1976). The Government thus carries “a heavy burden of showing justification for the imposition of such a restraint.” *N.Y. Times Co. v. United States*, 403 U.S. 713, 714 (1971). The case law uniformly holds that in order to justify a prior restraint, the Government must show that the “expression sought to be restrained surely will result in direct, immediate, and irreparable damage.” *Bernard v. Gulf Oil Co.*, 619 F.2d 459, 473 (5th Cir. 1980). See also *N.Y. Times*, 403 U.S. at 730. There must be no “alternative measures” available, and the restraint must “effectively ... operate to prevent the threatened danger.” *Nebraska Press*, 427 U.S. at 562, 565, 569–70.

Here, using a 3-D printer simply helps in the manufacture of a homemade firearm. This computer code is harmless and as far as we know, has not been used to commit any crime at all, nation-wide. As explained, such manufacture of a homemade gun for personal use is and has been **completely legal** since before the Founding of the United States. There is, in

short, no threat of a legally cognizable “harm” or “danger” whatsoever. The State of Maryland simply may not ban the distribution of this speech.

D. The Bills Are Unconstitutional Under The Second Amendment

Proposed Section 4-604 of these bills create a possession offense, providing that a person may not “POSSESS, SELL, OFFER TO SELL, TRANSFER, PURCHASE, OR RECEIVE: (I) A FIREARM THAT IS NOT IMPRINTED WITH A SERIAL NUMBER ISSUED BY A FEDERALLY LICENSED FIREARMS MANUFACTURER OR FEDERALLY LICENSED FIREARMS IMPORTER IN COMPLIANCE WITH ALL FEDERAL LAWS AND REGULATIONS REGULATING THE MANUFACTURE AND IMPORT OF FIREARMS; OR (II) AN OBJECT MARKETED OR ADVERTISED TO BE, OR THAT A REASONABLE PERSON WOULD UNDERSTAND TO BE, DESIGNED FOR THE PURPOSE OF BEING MANUFACTURED, ASSEMBLED, OR CONSTRUCTED INTO THE FRAME OR RECEIVER OF A FIREARM THAT IS NOT IMPRINTED WITH A SERIAL NUMBER ISSUED BY A FEDERALLY LICENSED FIREARMS MANUFACTURER OR FEDERALLY LICENSED FIREARMS IMPORTER IN COMPLIANCE WITH ALL FEDERAL LAWS AND REGULATIONS REGULATING THE MANUFACTURE AND IMPORT OF FIREARMS. Section 4-604 is thus a gun ban, pure and simple.

The criminalization of existing gun owners who have own a firearm without a serial number is vast overkill. Indeed, that criminalization extends not only to the completed firearm, but to any “object” that was marketed as or could be reasonably understood to be for the purpose of being “manufactured” into a “frame or receiver” if the object was without a serial number. This aspect of the bill would thus ban a solid block of aluminum if it was advertised as a “0% lower,” *viz.*, a block of solid metal that had not been machined in any way whatsoever.

That overreach violates the Second Amendment right of owners to possess firearms under *District of Columbia v. Heller*, 554 U.S. 570 (2008), and *McDonald v. Chicago*, 561 U.S. 742, 750 (2010). Even under the least demanding test (“intermediate scrutiny”), if the State can accomplish its legitimate objectives without a ban (a naked desire to criminalize gun owners is not legitimate), then the State must use that alternative. *McCullen v. Coakley*, 134 S. Ct. 2518, 2534 (2014). Stated differently, under intermediate scrutiny, the State has the burden to demonstrate that its law does not “burden substantially more [protected conduct] than is necessary to further the government’s legitimate interest.” *Id.* at 2535 (quoting *Ward v. Rock Against Racism*, 491 U.S. 781, 796 (1989)). See also *NY State Rifle & Pistol Ass’n. v. Cuomo*, 804 F.3d 242, 264 (2d Cir. 2015), *cert. denied*, 136 S.Ct. 2486 (2016) (striking down a 7 round load limit in a firearm magazine because the limit was “untethered from the stated rationale”). See also *Reynolds v. Middleton*, 779 F.3d 222, 232 (4th Cir. 2015) (holding that, under the intermediate scrutiny test as construed in *McCullen*, the government must “*prove* that it actually *tried* other methods to address the problem”). (Emphasis in original).

The test for “strict scrutiny” is even more demanding as, under that test, the State must prove both a “compelling need” and that it used the “least” restrictive alternative in addressing that need. See *United States v. Playboy Entm’t. Grp., Inc.*, 529 U.S. 803, 813 (2000). And in *NYSRPA v. NYC*, 883 F.3d 45 (2d Cir. 2018), *cert. granted*, 139 S.Ct. 939 (2019) (S.Ct. Jan 22, 2019), now pending before the Supreme Court on the merits, the Court may well reject both immediate and strict scrutiny tests and hold that the constitutionality

of gun laws must be analyzed under the “text, history and tradition” test that was actually used in *Heller* and *McDonald*. See, e.g., *Heller v. District of Columbia*, 670 F.3d 1244, 1269 (D.C. Cir. 2016) (Kavanaugh, J., dissenting) (“In my view, *Heller* and *McDonald* leave little doubt that courts are to assess gun bans and regulations based on text, history, and tradition, not by a balancing test such as strict or intermediate scrutiny.”). There is no “text, history or tradition” that could possibly support the type of ban imposed by these bills.

Again, the use of a 3-D printer to create a perfectly legal homemade gun or gun component does not make that gun illegal in the slightest under long-standing federal law. Banning manufacture or the mere possession of any gun made, in part, by a 3-D printer, cannot be justified under any of these tests. Indeed, the bills’ ban on the use of computers is akin to the argument that the Second Amendment protects only muskets that were used during the Revolutionary War, a contention that the Court in *Heller* rejected as “bordering on the frivolous.” *Heller*, 554 U.S. at 582.

Heller thus held that guns in “common use” by law abiding persons are prima facie protected arms under the Second Amendment. *Heller*, 554 U.S. at 627. Homemade guns easily satisfy this requirement as there are literally tens of thousands of such guns made over many years throughout the United States. The General Assembly simply may not disregard that reality. See *Caetano v. Massachusetts*, 136 S.Ct.1027 (2016) (summarily reversing Massachusetts’ highest court for failing to follow the reasoning of *Heller* in sustaining a state ban on stun guns); *Ramirez v. Commonwealth*, 479 Mass. 331, 332, 352 (2017) (on remand from *Caetano*, holding that “the absolute prohibition against civilian possession of stun guns under § 131J is in violation of the Second Amendment” and declaring the State’s absolute ban to be “facially invalid”). Homemade guns are at least as much “in common use” as stun guns at issue in *Caetano*.

Here, these bills purport to address guns without serial numbers because such guns are not “traceable.” As explained above, that concern is utterly misplaced as homemade guns are hardly ever used in a crime so there is no need (much less a “compelling” need) to “trace” such guns. Indeed, tracing runs out after identification of the gun’s first purchaser and firearms may be sold and resold many times in their lifetime. Criminals, who may not possess firearms at all, will not be deterred by these bills as possession of a firearm by a prohibited person is already a 10-year federal felony. See 18 U.S.C. § 922(g). Few crimes that are solved by tracing guns left at a crime scene as only a small fraction of guns used in crimes are actually traced by the ATF. See David B. Kopel, Clueless: The Misuse of BATF Firearms Tracing Data. <http://www.davekopel.org/2A/LawRev/CluelessBATFtracing.htm>. See also Police Departments Fail to Regularly Trace Crime Guns. <https://www.thetrace.org/2018/12/police-departments-gun-trace-atf/>. The ATF itself has cautioned against any use of trace data, noting that “[t]he firearms selected [for tracing] do not constitute a random sample and should not be considered representative of the larger universe of all firearms used by criminals, or any subset of that universe.” Bureau of Alcohol, Tobacco, Firearms and Explosives. Firearms Trace Data, 2016: Maryland, <https://www.atf.gov/docs/163521-mdatfwebsite15pdf/download>. As the ATF further notes, “[n]ot all firearms used in crime are traced and not all firearms traced are used in crime,” stating further that “[f]irearms are normally traced to the first retail seller, and sources reported for firearms traced do not necessarily represent the sources or methods by which firearms in general are acquired for use in crime.”

But, if the concern is truly that these guns lack a serial number (rather than a desire to criminalize gun owners), then that concern can be addressed without banning homemade guns and severely criminalizing the owners. Specifically, there are alternatives to bans. For example, a new law passed in California (which is ranked by the Giffords Law Center as having the most restrictive gun laws in the nation) provides that a new resident to the state shall apply to the Department of Justice for a unique serial number within 60 days of arrival for any firearm the resident wishes to possess in the state that the resident previously self-manufactured or self-assembled or a firearm the resident owns, that does not have a unique serial number or other mark of identification. As of July 1, 2018, prior to manufacturing or assembling a new firearm, a person is required to apply to California for a unique serial number. The gun owner is then simply required to engrave that number onto the receiver and report back to California that he or she has done so. As of January 1, 2019, owners of existing guns were required to apply for such serial numbers and perform this engraving. See California Penal Code §§ 29180-29184.

In short, assembly of new homemade guns and existing possession is permitted as long as this serial number is obtained, engraved and reported. California Penal Code §29180. In this way, the owner is identified and the gun is fully “traceable” and thus no longer a so-called “ghost gun.” As this law indicates, there is no reason to take the extreme step of flatly banning homemade guns or converting existing owners into criminals. Under *Heller*, the State may not simply reject this alternative simply because a general ban is more convenient or cheaper for the State. Gun owners may not be criminalized for such flimsy reasons. See, e.g., *Board of Estimate of City of New York v. Morris*, 489 U.S. 688, 702 n.10 (1989); *Heller v. District of Columbia*, 801 F.3d 264, 310 (D.C. Cir. 2015) (Henderson, J., concurring in part and dissenting in part). Indeed, just this last Session, the House Judiciary Committee favorably reported a bill (HB 740) that expressly required the State Police to conduct a study of this California alternative and that approach was adopted by the full House on third reader. Unaccountably, these bills simply drop an approach that has already passed the House. **Why?**

E. The Bills contain no *Mens Rea* requirement

Nothing in these bills purport to impose any *mens rea* requirement. For example, Section 4-602 bans the use of a 3-D printer to construct a firearm and then states that a person may not “possess, sell, offer to sell, transfer, purchase or receive a firearm” that was made through such a use of a 3-D printer. Such “possession” or “receipt” is a strict liability crime and thus the jail time imposed by the bill could be imposed without regard to whether the possessor even knew if the firearm was made using a 3-D printer. Similarly, mere possession of an “undetectable” firearm is a crime regardless of whether the owner knew that the firearm was “undetectable.” The same is true for the ban on possession of any “object,” that was advertised as something that could be manufactured into a receiver without a serial number. As noted above, that section punishes mere possession of a raw, solid block of aluminum even though the person never knew that the block had been thus advertised by some vendor, somewhere, sometime in the past.

The lack of any *mens rea* element means that unlike federal firearms law, these bills would impose strict liability for any unwitting or unintentional violation. See *Rehaif v. United States*, 139 S.Ct. 2191 (2019) (holding that the “knowingly” requirement on the federal ban on possession of a firearm by an illegal alien required proof that the alien actually knew

that he was illegally in the United States). Federal law, for example, requires that the person knowingly possess an undetectable firearm of the type covered by 18 U.S.C. 922(p). See 18 U.S.C. 924(f) (imposing punishment for “a person who knowingly violates section 922(p)”). Yet, these bills contain no such *mens rea* requirement.

The absence of reasonable notice and any *mens rea* requirement pose serious Due Process Clause problems. In *Owens v. State*, 352 Md. 66, 679 (1999), the Maryland Court of Appeals ruled that it is “[a] fundamental tenet of due process is that persons of ordinary intelligence and experience have a reasonable opportunity to know what actions are prohibited so that they may conform their conduct according to the law.” These bills fail that test. For example, these bills does not purport to prohibit the possession of guns made without the use of a 3-D printer. Yet, such guns may be literally indistinguishable from a gun made with a 3-D printer, as a 3-D printer may have simply been used to make single part, such as a receiver. The ban on “receive” is undefined, thus the bill would impose criminal penalties for the simple act of “receipt” regardless of whether it was a temporary receipt and regardless of whether the person receiving such a gun had any reason to know that a part was manufactured using a 3-D printer. That result is impossible to justify.

Nothing in these bills contain any *mens rea* requirement and thus the bills create, on their face, strict liability crimes. The federal courts “apply the presumption in favor of scienter even when Congress does not specify any scienter in the statutory text.” *Rehaif*, 139 S.Ct. at 2195. Maryland State courts, however, do not follow the same approach, especially where the relevant statute uniformly does not contain any *mens rea* requirement, such as in these bills. See *State of Maryland Central Collection Unit v. Jordan*, 405 Md. 420 (2008). Thus, if the General Assembly does not specify a *mens rea* element, then the risk is real that a person innocent of any conscious wrongdoing will go to jail. The General Assembly should expressly apply a *mens rea* requirement to all parts of these bills, just as the Supreme Court insisted, in *Rehaif*, on applying the “knowingly” requirement under federal firearms law in accordance with the “basic principle that underlies the criminal law, namely, the importance of showing what Blackstone called ‘a vicious will.’” *Rehaif*, 139 S.Ct. at 2196, quoting 4 W. Blackstone, Commentaries on the Laws of England 21 (1769). “Scienter requirements advance this basic principle of criminal law by helping to ‘separate those who understand the wrongful nature of their act from those who do not.’” (Id.).

F. The Bills Violate The Takings Clause Of The Federal And State Constitutions

The bills also suffer from a massive Takings problem. Proposed Section 4-604 provides that a person may not (2) **POSSESS, SELL, OFFER TO SELL, TRANSFER, PURCHASE, OR RECEIVE: 1) A FIREARM THAT IS NOT IMPRINTED WITH A SERIAL NUMBER ISSUED BY A FEDERALLY LICENSED FIREARMS MANUFACTURER OR FEDERALLY LICENSED FIREARMS IMPORTER.** This prohibition would ban the mere **possession** of any (post-1968) unserialized firearm. That is a Taking under both federal and statute constitutions. Stated differently, because firearms are existing lawful property, such firearms are protected by the Takings Clause of the Fifth Amendment and Article 40 of the Maryland Constitution, both of which indisputably fully protect personal property. *Horne v. Dep't of Agric.*, 135 S.Ct. 2419 (2015); *Serio v. Baltimore County*, 384 Md. 373 (2004). Maryland’s Takings Clause is violated “[w]henver a property owner is deprived of

the beneficial use of his property or restraints are imposed that materially affect the property's value, without legal process or compensation." *Serio*, 384 Md. at 399.

The State's "police power" cannot be used to justify such a Taking without compensation. For example, in *Serio*, the Maryland Court of Appeals applied these principles to invalidate as a "Taking" the seizure by the police of all the property rights of a convicted felon in the value of his firearms that he could no longer possess. As stated in *Dua v. Comcast Cable of Maryland, Inc.*, 370 Md. 604, 623 (2002), under the Maryland Constitution, "[n]o matter how 'rational' under particular circumstances, the State is constitutionally precluded from abolishing a vested property right or taking one person's property and giving it to someone else." (Emphasis added). The rule is the same under the Fifth Amendment. See, e.g., *Lucas v. South Carolina Coastal Council*, 505 U.S. 1003 (1992) ("[T]he legislature's recitation of a noxious-use justification cannot be the basis for departing from our categorical rule that total regulatory takings must be compensated. If it were, departure would virtually always be allowed."); *Loretto v. Teleprompter Manhattan CATV Corp.*, 458 U.S. 419, 425-26 (1982) (finding a Taking in that case regardless of "the public interests that it may serve"). See also *Duncan v. Becerra*, 265 F. Supp. 3d 1106 (S.D. Cal. 2017), *affirmed*, 742 Fed.Appx. 218 (9th Cir. 2018) (relying on *Horne*, *Lucas* and *Loretto* to enjoin enforcement of California's ban on continued possession of certain firearm magazines).

Here, the ban on the continued possession of existing firearms obviously "deprives" the existing lawful owner of any "beneficial use" of his property. *Serio*, 384 Md. at 399. Such owners cannot even recover the value of these guns via an out-of-state sale before the effective date of the bill because such a sale is barred by existing federal law. Accordingly, if the State bans continued possession of existing homemade guns, it will be required to pay just compensation. To avoid that result, these bills must, at the very least, be amended to include a "grandfather clause" to protect the property rights of existing owners. A failure to include such a clause will quite likely result in an injunction. Under Maryland law, it is well established that a court may enjoin a statute that violates Article 40 until compensation is provided. *Department of Natural Resources v. Welsh*, 308 Md. 54, 65 (1986). These bills, if enacted, face the same fate. For all these reasons, the bill should receive an unfavorable report.

Sincerely,

Mark W. Pennak

Good Morning,

I am emailing you to tell you how unfair the current gun bills are that are being proposed. As an avid hunter and sport shooter none of these bills will actually help keep guns out of the hands of criminals or felons. These bills will hurt ALL gun owners and especially those that may struggle financially already as the re-registration fee costs more than the ATF charges when you register a firearm with them. I do support the requirement of a background check being made when any gun is sold. I believe more responsible laws such as a universal background checks for ALL new gun owners and firearms training such as is required per the conceal carry laws in Maryland now would be a great way to educate and protect new gun owners. Limiting magazine size, outlawing "assault weapons", and requiring re-registration of guns is not a deterrent for the criminals we are trying to prevent from obtaining firearms. A better deterrent would be to make and enforce laws that imprison felons caught with firearms to a mandatory jail time of no less than 5 years.

I hope you will see the lack of depth in these proposed gun bills and push for more good common sense gun laws that would actually help your constituents when it comes to gun related issues. Please vote no on these bills.

Thank You,
Cooper Pollard

Good afternoon,

I am writing at the behest of the second amendment support organization Maryland Shall Issue to make a statement regarding the protection of our rights. My statement reads as follows.

Once a Right/freedom is taken, it will never be given back. Each should be protected at all costs as they are quite unique to protect and serve us as individual citizens outside of the powers granted to our governing bodies. It's the little nibbles that you don't notice and acquiesce. Could this be the reasoning and intent behind phrases like "shall not be infringed upon"?

Further more, I personally oppose any further action by the state of Maryland to further infringe upon the rights granted to me by the Constitution of the United States.

COMMITTEE: Judicial Proceedings
TITLE: *Criminal Law – Untraceable Firearms*
POSITION: Oppose

Testimony from: Bradford V. Sharpless
316 Townleigh Road
Reisterstown, MD 21136
bvsharpless@hotmail.com
Registered Democrat, District 10

SB 958 would eliminate the ability for individuals to manufacture or possess homemade firearms, activities that have been considered legal for the entire history of the United States. The sort of individuals who make and use homemade firearms are generally hobbyists who spend considerable time perfecting their machining skills, not criminals seeking an alternative source of firearms. Given the incredible rarity of homemade firearms being used in any crimes, it is highly improbable that this bill will result in a measurable improvement to public safety. I request an “unfavorable” vote on SB 958.

To our representatives concerning HB636/SB646, HB910/SB958, HB1257/SB816, HB958/SB910, HB591, HB1078, HB1501, HB1261.

You are our elected representatives and thus are duty bound to represent the wishes of your constituents.

We the people are **strongly opposed to ANY** additional regulations on law-abiding gun owners in MD. These laws will do nothing to prevent crime and will only further infringe on the rights of the good people that you are supposed to represent.

Not only will these ridiculous laws be completely ineffective against crime, but they will serve only to turn good law-abiding working tax payers into instant criminals.

Instead of making more laws like these we would all be better served if you actually made harsher penalties for the criminals who will always ignore such laws.

RE: OPPOSE all new gun control bills and HB 1261

Dear elected official and staff:

I stand with the Firearms Policy Coalition and other pro-rights groups in OPPOSITION to HB 1261 and the dozens of other gun control bills introduced this session.

These new proposals will only crack down on those wishing to defend themselves with commonly owned guns--it will not make a difference to the criminal element. MD already has some of the strongest gun control laws in the nation.

These new proposed measures are untenable, especially because we all know criminals are not going to follow them at all. We know this because after the last big gun control laws in Maryland passed it had no significant impact on gun crime; in fact it, increased and hasn't come down.

It's time representatives in Annapolis finally stand up and defend the entire Bill of Rights and stop catering to anti-rights extremists like Michael Bloomberg.

Please make a stand and OPPOSE HB 1261, as well as the dozens of other proposed gun control bills.

Thank you.

Sincerely,
Garrett Stefan

Position: UNF

Hello Delegate Arian,

My name is Steven Steinbacher.

My address is 1900 Huntfield Ct, Fallston, MD 21047

I have written to you and your colleagues before and will continue to do so.

I am **STRONGLY OPPOSED** to all gun related bills being pushed by the Maryland General Assembly.

I OPPOSE:

HB636/SB646

SB816/HB1257

HB910/SB958

HB1078

HB958/SB910

HB591

HB1104

HB1501

HB1261

All of these are restrictions on my natural rights. As a tax paying, law-abiding citizen, I have had enough of the political class and their attacks on my rights and the rights/freedoms of my friends and family.

The gun bans initiated in 2013 have done nothing for Marylanders to make them safer, but they have made it harder for law-abiding citizens to protect themselves, their families, and their property. The general assembly should focus on the laws already on the books and the crime in Baltimore city that will not be affected by any of these bills. Criminal prosecution reform should be on the docket, not my right to peacefully own property.

Sincerely,

Steven Steinbacher

Position: UNF

Testimony in Opposition to Senate Bill 0958 of 2020

Earle A. Sugar
Davidsonville, MD
Representing Myself

SB958 has many fundamental flaws, the most significant of which is that it assumes any person fabricating a firearm themselves does so for criminal purposes. That couldn't be further from the truth. There are a significant number of hobbyist machinists and amateur gunsmiths in Maryland who fabricate their own either for the satisfaction and novelty of "do it yourself", to build a customized firearms for high-precision target shooting, or to create a family heirloom that is higher quality than what's commercially available.

I am one of those hobbyist machinists. My primary interest is in antique firearms, particularly early and experimental cartridge arms from the mid to late 19th Century. I have been slowly building my skills and collection of tools as an amateur machinist, with the intent of creating replicas of early cartridge firearms for my collection that, because of their rare, antique status, are unaffordable or simply unavailable.

In fact, the way SB0958 is worded, using the definition of "Firearm" from § 5-101 of the Public Safety Article¹, reproductions of muzzle loaders such as those used by Civil War re-enactors, would be banned. They are not firearms under Federal law, and do not need to be manufactured by FFL manufacturers, nor imported by FFL importers. And therefore they would fall afoul of this bill because they would lack a serial number issued by a Maryland-authorized source. Does MSP plan on arresting entire units from the next re-enactment at Antietam? Because any of the participants with reproduction muskets or cavalry carbines made after 1968 would appear to be in violation of SB0958 as worded.

Yes, it is possible for a prohibited person to build their own modern firearm. It's also possible for them to steal one, which as Baltimore crime statistics bear out, is far and away the preferred method for violent previous offenders to obtain guns to commit crimes. Nobody wants convicted violent felons to have the tools to re-offend. But the only people this bill will stop from fabricating firearms is hobbyists and others already predisposed to follow the law.

SB0958 tries to fix the fear of criminal fabrication and unlawful use of guns with legislative sledgehammer surgery. It is a blanket ban on all fabrication and possession of non-commercial firearms. Even California's Code of Regulations Title 11, Division 5, Chapter 14, provides mechanisms for legally producing and serializing self-made firearms, as well as grandfathering existing units. But not Maryland, under SB0958.

Unrelated to the antiques issue, the bill's proposed ban on dissemination of computer code for amateur firearms fabrication runs afoul of the 1st Amendment's freedom of speech and press protections. This isn't speculation on my part. The fact that computer code is a means of protected expression and communication was affirmed by the US Court of Appeals, 9th Circuit, in *Bernstein vs. Department of Justice* (1999), and is now established law.

¹(h)(1) "Firearm" means:

- (i) a weapon that expels, is designed to expel, or may readily be converted to expel a projectile by the action of an explosive; or
- (ii) the frame or receiver of such a weapon.

If SB0958 becomes law, not only will I be unable to produce any future replicas of historic firearms for my hobby, I will have to dispose of any existing self-crafted firearms. That regulatory taking will cost the thousands of dollars invested in each rifle that must be turned in or destroyed in order to comply. I don't make firearms with using cheap, plastic 3D printing, or print files downloaded off the Internet. I fabricate out of metal and wood with real machine tools and hand craftsmanship, with quality in mind. One of them is the single most accurate bolt-action target rifle I own, better than any industriallymanufactured target rifle I've ever bought. Why do I have to part with that because of what criminals have done, and will continue to do, even if this bill is passed?

And, by the way, I engrave everything I've fabricated with my name, and, yes, with a serial number, that comply with ATF commercial firearm marking standards, found in 27 CFR 478.92, even though I don't have to.

SB0958 is a draconian bill that misses its target of preventing prohibited persons from obtaining firearms. It's only significant effects will be on those who follow the law in their acquisition and use of firearms. Even California's very anti-gun legislature thought the types of categorical bans and regulatory takings contained in this bill go to far. Vote against virtue signalling run amok, vote UNFAVORABLE this bill.

I am writing today to express my opposition to a series of gun control legislation due to be heard soon. These pieces of legislation while well intended will do little or nothing to solve the violence we see today.

The 2018 FBI unified Crime Report notes that there were 14,123 homicides during the year. 1,515 involved knives or sharp objects (10.72%), 672 involved hands and feet (4.76%) and only 532 involved a rifle or shotgun (3.77%). Modern sporting rifled were only a small percentage of that total. This compares to 11,000 drunk driving deaths, 47,000 suicides and the 330,000 lives lost to abortions. One should also consider that the suicide rate in Australia remained constant after they adopted their gun banning legislation.

A CDC Study reported a 94% reduction in firearms fatalities from 1933-2017 while at the same time the private ownership and concealed carry of firearms increased dramatically. If firearms were to blame for the violence in our society one would assume that gun related deaths would be much higher due to the increase in legally owned guns.

HB 636 Access to Firearms Storage **OPPOSE**

This legislation would make myself and my wife significantly less safe since it would require us to store our self defense firearms in a way that would make them unavailable for use should our rural home be a target for thieves or home invaders.

HB 910 and HB 958 Untraceable Firearms. **OPPOSE**

This legislation is a solution looking for a problem. Americans have been making firearms of all types since Colonial times. Those firearms used in some shootings were manufactured and sold illegally. This bill would encumber all honest citizens who build firearms for the pleasure of having a hand-crafted firearm they built to use hunting and at the range.

HB 591 and HB1501 Lost or Regulated Firearm Reporting **OPPOSE**

What would this legislation accomplish except for creating a list of lost or stolen firearms? Rarely are firearms found at a crime traced back to the criminal. This law would at best trace the firearm back to the owner who reported it missing or stolen. On it's face it would create additional work for an already overburdened law enforcement agency with no significant benefit to public safety.

HB1104 Regulated Firearms Transfers **OPPOSE**

Apparently, designed to eliminate the fictitious gun show and private transfer/sale issue. Sales of firearms at gun shows are already regulated if the seller is in the business of selling firearms. Since most sellers at shows are licensed FFL's all sales are conducted with a background check. Those who are selling a few of their private collection are in the distinct minority. All online sales where the seller resides in a different state must be conducted with an FFL to FFL transfer and the required background check. All instate sales are done face to face and the seller can assess the purchaser and terminate the sale if they suspect the purchaser to be a prohibited person. this legislation would make it illegal for me to loan one of my firearms to a relative or friend. For instance, I and a group of my friends are at deer camp and my friends rifle malfunctions. Based on this legislation I could not loan my friend of many years my spare firearm unless I accompanied him to his deer stand are remained with him while he hunted. This legislation is burdensome and unnecessary.

HB 1257 Licensed Firearms Dealers **OPPOSE**

This bill would place an additional burden on already heavily regulated legal business establishments. It is excessive regulation with no real public benefit, and it is designed to force legal firearms retailers out of business.

HB 1261 Assault Long Guns and Copycat Weapons **OPPOSE**

As noted in my introduction firearms of this type (Modern Semi-automatic Sporting Arms) are involved in an incredibly small number of homicides. They have been the victim of a massive public relations campaign designed to dupe the public into believing that they are evil. If these types of firearms were a problem one would think that they would be involved in many more homicides. Estimates indicate that there were over 16 million modern semi-automatic sporting arms legally owned by American citizens. Politicians and the media have created a myth about these firearms which is patently untrue. John F. Kennedy once said, "The greatest enemy of the truth is very often not the lie-deliberate, contrives and dishonest – but the myth – persistent, persuasive and unrealistic." This is the myth developed around these firearms and it is totally unrealistic. Finally, this legislation is written so poorly that it would include most shotguns used for hunting and sport shooting along with most if not all semi-automatic firearms.

Ben Weishaar_unf_sb958

Position: UNF

Ben Weishaar

Testimony in Opposition to HB 910 and SB 958

I oppose both the above mentioned bills on two accounts.

First, the firearms noted in the bills are rarely, if at all, used in crimes thus the bills will have no impact on crime in our state and will only serve to criminalize law abiding citizens perusing their hobby. To make these firearms functional, it would seem to require a great deal of time, effort, equipment, and knowledge. If this were truly an easy path for criminals to acquire guns, why would the statistics not show more of these type of weapons used in crime? It would seem that it is far easier for someone who is prohibited from legally purchasing a firearm to buy one illegally on the street rather than invest all effort it takes to create one.

Secondly, these bills violate rights enumerated by the constitution on many levels. Rights, that are simply not up for debate. Case law has been established and past precedent set. Thus, both bills should receive and unfavorable report and not be advanced.
