

# Testimony

I would like to point out that these proposals could not be laws at all but what our forefathers would call pretend law because they do not follow the constitution. The constitution clearly states that our rights come from a creator and not from Man nor Government and the governments job is to protect those rights. The second amendment as also clearly states it shall not be infringed upon. It seems quite basic but difficult for a tyrannical government to grasp and you wonder why the citizens feel the need to be armed? This is exactly what the founding fathers had in mind was a self righteous government that seeks total control of an unarmed population that the power hungry government can control or even worse, destroy. It's already happening in this State.

Seven day wait-infringement,

Handgun qualification license-infringement

Handgun roster-infringement

Barrel length -infringement

Substantial reason for conceal carry – infringement Just to name a few of the already tyrannical decisions made by the state. I hope in my lifetime that someday I can be here to testify on minimum sentencing for the treasonous politicians that are convicted for ignoring their oath and trampling on the rights of the people. I pray that you will revisit the words of our founders and the true meaning of the constitution and vote no on every tyrannical bill!

Thank you
