

HB0283

I had my last child 2.5 years ago... I got preeclampsia after child birth and had everything from fluid in my lungs, to 216/210 blood pressure! I was on every kind of pill you could think of from blood pressure to pain to anti-depressants! Since I have been taking kratom, I've gotten off of ALL of that nasty medication with horrible side effects, all but the main blood pressure medicine I have to take to avoid a stroke! The opioids I was on made me useless! I never wanted to do anything with my 4 kids or my family, I was still constantly in pain, and having to take several doses of handfuls of pills a day was awful! If it wasn't for kratom I have no idea where I'd be or how I'd be!! Keep our miracle PLANT legal! It does so many people so much good!!
