

I am a grandmother of 4 with another on the way. I am 66 years old and started getting sick in my 30's. It started with fatigue and pain in my feet. For years I was just blown off by doctors and treated with anti inflammatories. The years went by and the pain got worse spreading to all the joints in my body. I had to quit nursing school which I started at 40. It got to a point where I couldn't walk, use my hands and it spread into my back. I was finally diagnosed with psoriatic arthritis and fibromyalgia. I also have an autoimmune thyroid disease among other issues. I have taken numerous injectable drugs and IV drugs and none of them have been working for me. I was prescribed painkillers and I had been taking them on and off as well. A few years ago it got to a point where I just did not have a life anymore. I could not enjoy my grandchildren, I could not go to the store, and basically could not do anything. My neighbor had told me the only thing that helped his friend was Kratom. I decided to try it and it has given me my life back. I can now do things that I could not do before and I can enjoy my children and my grandchildren as well. This is just like drinking coffee and is made from a similar plant however, now it is being threatened to be taken away. Please don't let this happen. Please let myself and others enjoy their lives and do the right thing.

Sincerely,
Janet Famularo
