

I saw you were requesting kratom testimonies? I just don't know what you're looking for but I want to say it has been a blessing finding about kratom

I have been on pain management for 11 plus years. I eventually stopped being able to work. The pain wasn't getting better as I struggled to balance life with daily pain. I was constantly barely crawling out of bed to plead with my doctor to help me find something more effective than pain medication if this was how I had to live.

I am diagnosed with pain and anxiety so I would eventually join pain management groups to share my pain and struggles with similar people at my therapists request. I eventually heard of kratom and did my research. I was ready to try something new. I wanted to be free of being pain medications that didnt offer long term solutions for my conditions.

My life steadily has gotten better since then. I am still on kratom since my first attempt and life is so much less painful for me. I can cook for my husband. I can think about ways to earn money aside from not being able to work. Best of all, I can have a night of sleep. I consider myself lucky I can function day to day.
