

My name is Tim and Kratom has saved my life in more ways than one. I had addiction problems for over 10 years and over that time tried everything in the book to get my life straight. Nothing i tried worked and my substance abuse just kept getting worse and worse. I actually started to believe i could never be saved and decided to just stop trying and go back to using cause thats what i knew best. Then when i was in the darkest place ive ever been before i went and picked up some kratom since i had tried it a few times before and wanted to re visit it. It surprised me because all of the sudden alot of my problems didnt seem so heavy anymore. I could eat, sleep, be social without my crippling axiety that kept me from making friendships with anyone, it made my depression disapeir and i truly felt relief for the first time. I kept with it and over time my relapses got less and less frequent until one day i realized i had been clean 6 months straight. Thanks to kratom's help i finished what i had to do to get off probation, i was able to fix my relationship to my family again, ive been clean and sober from my old substance issues for over 2 years, and it has helped me to all and all be a better person in general. It has helped me find myself again in ways nothing else ever could have. If it wasnt for me girlfriend, her family, and plain leaf kratom i dont want to know where i would be right now. Kratom helped me in more ways than i can count and it continues to do that every single day. Im happier and healthier than i have ever been in my life. Kratom was a gift from god in my life. ----Tim
