

A day in June of 2013 would change the course of my life when I was involved in a motorcycle accident. months of prescribed opiates for pain would lead to a 5 year struggle for me. Fast forward those 5 years and I found my self laying in bed constantly begging god for answers, telling him I don't know what to do anymore, begging for help. I didn't know what else to do and was slipping into depression for the first time in my life. Then I saw the word kratom appear, that lead me to the internet and doing a lot of research. I made my first order online and instantly I noticed the urge and thoughts about the meds subside. Today those urges and thoughts are completely gone and I truly feel that kratom saved my life. I can sit here in 2019 and proudly say I am happy, my wife is happy, my bank account is no longer lingering around 0. I have a new chance at life and I'm loving it. I owe it all to kratom. Without kratom I don't know where I'd be or how far that depression I would have gone. It's amazing what a plant can do for you, here's to hoping it's around for many years/generations to come. God bless everyone and kratom on!
