

Consider myself very fortunate to have discovered Kratom about six months ago
I have chronic pain related to osteoarthritis in my knees, shoulders, hips
I am also suffer from depression and anxiety.
The effects of Kratom counter acting these conditions have been nothing short of a miracle.
I can only begin to imagine the millions of people suffering from much worse than me who could benefit
if they were only aware of it's existence. Please give light to the truth and positive science behind this tree
leaf cousin to the coffee plant. Please do not classify Kratom as a dangerous substance of any kind as that
would be a non- truth.

Sincerely,
Will Byrd

Kratom Advocate and Consumer
