

My name is Robin Barry, I am from Las Cruces, NM. I am a 51 year old woman on disability. I have numerous health issues that has caused severe chronic pain. I have been in pain management for over 20 years. I was prescribed opioids and had been on them since 2005. Not only was I on opioids, I was on muscle relaxers, anti-depressants, sleeping medication, stomach medicine, and NSAIDS.

My pain medication had not been working on my pain so in 2014 I did research on any and all natural supplements and spent so much money on gadgets and vitamins to no avail.

In 2017 I was in an Osteoarthritis support group when someone had mentioned an all natural supplement called Kratom and how it worked so well for them...and they were able to stop the opioids they were prescribed.

I purchased my first order of Kratom in 2017 and I can honestly say it has changed my life. The relief it has given me does not compare to the pain medication I was on and my stomach issues, insomnia and depression subsided enough to eliminate any and ALL pharmaceuticals.

My life has been given back to me after all those years. I was practically bedfast and in a medication vicious circle of a medicated and emotional coma. My mind is clear and I am more active than I can even remember. I can sleep again and I am actually enjoying life.

My family members are amazed at my progress and I couldn't imagine living my life without Kratom. It has been an answer to my prayers. I still have pain, but it is so minimal that I would be devastated if this miracle plant became unavailable. The thought of being forced to go back to my opioid drugged life scares me. Please do not take my Kratom

away. With out Kratom I know that the quality of my life will be drastically reduced.

Sincerely,
Robin Barry
