

Asher Wildman
I oppose bill HB 302

This bill will negatively affect and potentially cause myself and my family great harm, if I am arrested by carrying my firearm with a permit while on private school property doing carpool or assisting with various functions of the school. I am a local business owner who provides services to private schools among my other clients. I am trained and have passed the Maryland State Police rigorous background investigations in order to legally wear and carry my firearm. This law would cause undue hardship on myself and my business if I couldn't continue wearing and carrying while conducting my business and also cause me to spend even more money on ways to secure my firearm when I can't wear and carry it within or on private school property. The school administrations that I service know and support me wearing and carrying my firearm.
