

**TESTIMONY IN SUPPORT OF HB 910,
AN ACT CONCERNING
CRIMINAL LAW – UNTRACEABLE FIREARMS**

TO: THE HOUSE JUDICIARY COMMITTEE

SUBMITTED BY: DAVID PUCINO
STAFF ATTORNEY, GIFFORDS LAW CENTER TO PREVENT GUN VIOLENCE

DATE: FEBRUARY 25, 2020

Chair Clippinger, Vice Chair Atterbeary, and Delegates of the House Judiciary Committee: thank you for the opportunity to provide this testimony on behalf of Giffords Law Center to Prevent Gun Violence, the legal arm of the organization founded by former Congresswoman Gabby Giffords. I am writing in support of House Bill 910, “An Act Concerning Criminal Law – Untraceable Firearms,” which addresses the growing threat of untraceable firearms, often referred to as “ghost guns.”

Traditionally, when a firearm is manufactured or imported into the United States it must be marked with a serial number and additional information about the manufacturer and/or importer. Then, when it is sold by a retailer to a consumer, a background check is conducted on the consumer and the retailer retains records of the transaction. This process, which is imposed by federal law, is critically important for gun safety. When it works correctly, it prevents individuals who are prohibited from possessing firearms from buying one from a firearms retailer; it discourages trafficking; and it enables a critical law enforcement process known as “tracing.” Law enforcement use tracing as a tool when a firearm is recovered from a crime scene: using the serial number, the firearm can be traced through a chain of custody to the point of its first retail sale. Tracing is a key tool for law enforcement investigations that involve firearms.

Ghost guns disrupt this traditional process. Ghost gun purveyors avoid the range of federal laws pertaining to firearms by selling a set of parts that falls just short of the federal definition of “firearm.” Federal law defines a “firearm” as, among other things, “any weapon (including a starter gun) which will or is designed to or may readily be converted to expel a projectile by the action of an explosive” or “the frame or receiver of any such weapon.”¹ The frame or receiver—a “frame” on a handgun, or a “receiver” on a long gun—is the key component of the firearm that houses the firing mechanism.

Because a frame or receiver is characterized as a “firearm” under federal law, it is this component, and this component alone, that must carry a serial number, and that requires a background check before sale. Once an individual has acquired a frame or receiver, he or she can

¹ 18 U.S.C. § 921(a)(3).

obtain the rest of the parts needed to assemble a firearm without having to pass a background check.

To avoid federal firearm laws, ghost gun purveyors do not sell frames or receivers; instead, they sell “unfinished” frames or receivers, components that have been machined so that they are almost fully functional frames or receivers, but are not considered “frames” or “receivers”—and therefore are not considered “firearms”—for the purposes of federal law. As a result, ghost gun purveyors can sell unfinished frames and receivers, often packaged with all of the other components needed to assemble a firearm, without serializing the product and without conducting a background check. Their customers can then take the package, drill out the few holes needed to convert the “unfinished” piece into a fully functional frame or receiver, and use it to assemble an unserialized, untraceable firearm.

Ghost guns present a grave and growing danger to the public. Law enforcement are increasingly encountering trafficking rings that are mass-manufacturing and selling untraceable firearms.² And ghost guns are increasingly being used in shootings, particularly by individuals who would be unable to pass a background check.

To list just a few examples:

- A man who failed a background check and could not legally purchase a gun built an assault rifle from a ghost gun kit, then used it on a rampage at a college campus, firing 100 rounds and killing five people.³

- A man who was prohibited from owning a gun and under prosecution for multiple crimes assembled two assault-style ghost guns from parts he ordered online and went on a rampage with them, killing six people and injure 10 more.⁴
- A sixteen-year-old boy used a self-assembled untraceable firearm in a school shooting in Santa Clarita, CA, killing two students and injuring three others.⁵

HB 910 would protect Maryland residents from the dangers of ghost guns by closing the loopholes that the purveyors of these dangerous products exploit. It would do so by prohibiting the possession sale of the unserialized, unfinished frames and receivers, which are the building blocks of not just individual ghost guns but the entire ghost gun industry. By requiring that these products be serialized in accordance with federal laws and regulations for the serialization of completed firearms, this legislation will make it much more difficult to obtain an untraceable firearm in Maryland.

In addition, HB 910 would generally prohibit completed ghost guns manufactured using unfinished frames and receivers, and would also protect against ghost guns made using 3D printers.

I encourage you to advance HB 910 to address the growing threat of untraceable firearms. I am happy to answer any questions about my testimony, or to otherwise be of service to the Committee.

Respectfully Submitted,

David Pucino
Staff Attorney
Giffords Law Center to Prevent Gun Violence

ABOUT GIFFORDS

Giffords is a nonprofit organization dedicated to saving lives from gun violence. Founded and led by former Congresswoman Gabrielle Giffords, Giffords inspires the courage of people from all walks of life to make America safer.
