

I want to voice my support for House Bill 1502. Having members of my family be involved in firefighting for generations, I know the risk that every fire fighter and EMT face when they go onto an accident scene or drug overdose. Nurses have to go into peoples houses in neighborhoods that they would never usually go into along with physicians and physician's assistants. Parole officers have come to me saying that they have had a hard time getting permits as well as retired prison guards. Please give people in these occupations the ability to defend themselves and go home safely each day.

Sincerely,

R.S. Mitchell
