To whom it may concern:

I am writing to say I support the bill HB1171. Right now, I am the sole provider for my household and me losing my job would be detrimental to my family's well-being. At this point in time, I do not think there has been enough time to research and conduct studies to clearly show if the vaccine is safe and effective. Therefore, if my job required me to take the vaccine to keep my job I would have to refuse and then lose my job if this bill is not passed. Please pass this bill to provide us the opportunity to choose what is best for us and our families. Thank you for your consideration.

Best regards,

Michael Rosenthal
