

## **HB875 MD Energy Savers Gordon, Shan FAV**

**Please vote in favor of HB 875.**

Honorable Delegates,

I am writing in my role as President of MD Energy Savers. My company works to help Maryland businesses, governments, non-profits, and residents reduce their energy use and reduce pollution.

Maryland needs to use **all** of its renewable energy credits to help create more truly clean and renewable energy sources. Using these precious dollars to subsidize polluting energy sources in other states simply doesn't make sense.

This is a perfect moment to end Maryland's black liquor habit. Let's use our valuable renewable energy credits for energy that will keep us, our planet, and our economy healthy, here in Maryland.

Sincerely,

*Shan Gordon*

President

MD Energy Savers

602 Hollen Road

Baltimore, MD 21212
