Committee: Economic Matters

Testimony on: HB20 – “Maryland Stadium Authority – Applicability of Prevailing Wage”

Position: Support

Hearing Date: February 4, 2021

The Maryland Sierra Club urges a favorable report on HB20. This legislation would better ensure that individuals who work on public works projects are compensated fairly. This bill is one of several introduced this session which would expand prevailing wage provisions and which the Sierra Club supports, HB37 and HB174, which already have been heard by this Committee.

The Sierra Club, nationally and in Maryland, is committed to the principles of equity, justice, and inclusion, and supports placing these principles at the center of environmental initiatives. These principles include respecting and supporting the rights of workers, which includes their ability to have good jobs, earn a decent living, and enjoy occupational health and safety protections.

This commitment is reflected in our priority legislation this session (HB66) to transition Maryland off its reliance on coal-burning power plants. A critical component of the bill is the establishment of a Fossil Fuel Community Transition Fund to support impacted workers and communities. The fund would support paid worker retraining; financial compensation for impacted workers; investment in climate action projects in impacted communities; site deactivation, reuse, and remediation projects that hire from the high-quality workforce now employed at the coal plants; and compensation for a portion of lost local property tax revenues.

Two years ago, the Maryland Sierra Club prioritized passage of the Clean Energy Jobs Act, to support significant increases in wind and solar energy in Maryland, and, as well, training programs for growing our clean energy workforce.

The Sierra Club urges a favorable report on this bill.
