

Dear Representatives,

I'm retired and living with my daughter and her family. I had a reaction to the Prevnar 13 vaccine a few years ago which disabled me. I am therefore sensitive to the topic of vaccines and especially for people to be able to choose to take or not take them.

My son-in-law is the only person working outside the home. We (my daughter, four kids, and myself) depend on his job for our housing and livelihood.

I've heard mixed opinions about the new covid vaccine but that some employers are starting to require their employees to take it.

It would be terrible if he had to take it and had a reaction as debilitating as mine a few years ago.

Please vote to protect Maryland workers.

Sincerely,

Dottie Seek
