HOUSE Bill 0715/Public Schools – Self Contained Special Education Classrooms Use of Video Recording Devices

POSITION: Support with Amendments

Ways and Means Committee

3/9/2021

My name is Bruce D. Hasty, Sr., I am the grandfather of an Autistic Grandson, Josiah D. Hasty and I am in support of HB715 with amendments. This bill is important to me because Josiah, now age 7 was abused at age 4 in the Prince Georges County Public School System and at age 6 at a Private School, the Childrens Guild in Hyattsville, Maryland.

Josiah is Verbal but cannot articulate the events of the school day. To date we are still awaiting evidence of and paperwork relating to his abuse/injuries. Though Josiah could not articulate his abuse/injuries he did act out in other ways to let us know that he felt in danger. Josiah's great-grandparents live near the Childrens Guild and he would have crying and yelling fits if we went in the direction of their home thinking that he had to go to school, he would also fight us when trying to get him to even get out of the car in both instances to go in school after such abuse/injuries took place! Josiah is currently under the care of a Psychologist to deal with his trauma and was removed from the Childrens Guild due to such and was about to have a teacher come to our home until the investigation was concluded; however, COVID-19 happened, and everyone went Virtual. (We are still in litigation for such.)

Several years later we are still awaiting proper documentation from the incidents that occurred in Prince Georges County School System.

In closing, this doesn't just stem from a personal although family is most important to me as an Assistant Pastor of a Church in Washington, D.C., but most importantly as an Educator and Principal of National Christian Academy in Ft. Washington, Md. I believe in and support this Bill as it not only protects our young scholars that have challenges and cannot speak for themselves, it also protects our teachers from false allegations who work hard to develop as well as educate our children, If there had been cameras in the classrooms then the answers to our Who, What, When How, and Why's could have quickly been answered and it would have alleviated the trauma, stress and abundance of money on legal fees to assure Josiah's safety.

As a parent/grandparent we should not have to worry about the Safety of our children when at school.

I am asking that you PLEASE SUPPORT THIS HOUSE BILL 715 to ensure the future Safety of Josiah and ALL CHILDREN WITH SPECIAL NEEDS. SPECIAL NEEDS CHILDREN NEED THE VOICE THAT THEY DON'T HAVE TO ENSURE SAFETY, PROTECTION AND A PROPER AND FAIR EDUCATION!!!

Thank you for your time and support!

Bruce D. Hasty, Sr.
