**Committee: Environment and Transportation**

**Testimony on: HB562 - "Montgomery County - Speed Limits - Establishment - MC 02-21"**

**Position: Support**

**Hearing Date: February 11, 2021**

The Maryland Chapter of the Sierra Club supports HB562, which would authorize Montgomery County to decrease the maximum speed limit on its highways to not less than 15 miles per hour if engineering and traffic investigation justify such a decrease. Currently the lowest speed limit allowed on highways in the county is 25 miles per hour except in school zones during school hours.

We live in a car-centric culture where transportation planning, road infrastructure, and vehicle laws are largely focused on enabling vehicles to get to their destination as swiftly as possible. Unfortunately, this has resulted in some drivers feeling they have priority on the road, and there are high rates of injury and death for pedestrians and bicyclists as well as vehicle drivers and passengers. Research shows that a vehicle's rate of speed has a direct impact on the ability to see ahead and notice people in or near the roadway, how quickly one can respond to avoid potential problems, how long it takes to stop a vehicle, and how likely someone will die or be seriously injured as a result of a collision.

Transportation is now the primary contributor to greenhouse gas emissions in our state. Tailpipe emissions from cars and trucks are also a major source of health-damaging air pollution. For these reasons, there is an urgent need to get individuals out of their cars and taking public transit, riding bikes, and walking more. However, these activities are not as safe as they should be when vehicles are traveling too fast in densely populated areas, in shopping districts, where roads are narrow or where there isn't a clear line of vision.

Lowering speed limits is a key component of "Vision Zero," a program Montgomery County and many other areas have adopted to eliminate traffic fatalities and serious injuries for all road users. Other components of Vision Zero include having adequate sidewalks, bikeways, and crosswalks, allowing sufficient time to cross streets, narrowing lanes, and adding other traffic calming measures. However, even if most of the elements of Vision Zero just mentioned are implemented, it's doubtful that the program can succeed unless the speed limit can be lowered where appropriate, as this bill specifies.

In summary, this bill makes sense for Montgomery County, its residents, and our environment. It has been endorsed by the County Delegation and we urge the committee to issue a favorable report on it.
