JOEL N. BELLER
Deputy Director of Government Affairs

BILL NO.: **HB 22**

TITLE: Environment - PFAS Chemicals - Prohibitions and Requirements

SPONSOR: Delegate Love

COMMITTEE: Health and Government Operations

POSITION: **SUPPORT**

DATE: February 2, 2021

Baltimore County **SUPPORTS** House Bill 22 – Environment - PFAS Chemicals - Prohibitions and Requirements. This legislation would prohibit a person from using, manufacturing, or knowingly selling certain products that contain added PFAS chemicals in the State.

According to the CDC, exposure to PFAS may interfere with the body’s natural hormones, increase cholesterol levels, affect the immune system and increase the risk of some cancers. As it currently stands, a majority of Americans have PFAS in their bloodstream. Firefighting foams are known to contain PFAS. When used, the foams introduce PFAS into underground or nearby water systems, contaminating our environment and poisoning our residents. By restricting the use of these foams, we can limit their introduction into the State’s ecosystem.

Last session, Baltimore County strongly advocated for tighter regulation of PFAS usage. The County was proud to see this legislation pass and lead the way for additional measures this session. HB 22 would restrict the use of firefighting foam, rugs and carpets, and food packing that contain PFAS. Prohibiting the use, manufacturing and sale of these items will help keep Maryland’s waterways clean and safe for all residents.

Accordingly, Baltimore County requests a **FAVORABLE** report on HB 22. For more information, please contact Chuck Conner, Director of Government Affairs at cconner@baltimorecountymd.gov.
