

Support for HB470

Honored Chairperson and members of the committee,

As a primary care doctor in Baltimore who sees many uninsured or underinsured patients, I take care of those who have borne the brunt of our unjust and cruel, fragmented and haphazard, health care system. We need single payer in Maryland. Further, we need a plan to make this happen. Thus I support HB470, the Commission on Universal Health Care, to plan for a universal single-payer health care program to cover all Maryland residents.
