

Currently, COVID-19 vaccinations are authorized for emergency use only. It would be inhumane to mandate their usage due to their lack of long term testing and current documented short term adverse reactions which include death in some cases.

We protect criminals from cruel and unusual punishment. Allowing businesses or government agencies to require an EUA vaccine would be cruel and unusual.

COVID-19 numbers have dropped significantly in the past couple months and early treatment options are saving lives. There will soon be no reason for people to get vaccines.
