

Written Testimony In Favor Of HB 150 – Authority of the Secretary of Health and Medical Information
Nelda Fink, 8372 Norwood Dr, Millersville
MD District 32

HB 1150 must be approved to protect the Citizens of Maryland and We The People from the medical tyranny that is being created upon us. It is interesting that non-government entities are being given this authority and this is totally unconstitutional. Governments were created to protect the people and to give power to the people, not to give that protection and power away to other entities. These entities receive licenses to operate and perform commerce in public domain and they should not be allowed to take away our rights just like the Government cannot take away our rights. Passing this bill enforces our Constitution and helps to solidify our rights under that Constitution! Please give this bill favorable support and APPROVE it to move forward. Yes I completely support this bill and encourage the committee to APPROVE it as well.

Please pass this bill!

I approve completely!

Sincerely,

Nelda Fink
