RE: Redistricting maps special hearing testimony

Dear Members of the Maryland General Assembly,

The Governor of Maryland, Larry Hogan, who has had bi-partisan support from both political parties in this state formed a redistricting commission of bi-partisan members during his first term. None of those members was an elected official and therefore had no vested interest in playing politics with the maps they created. The Democrats in the Maryland legislature then created its own commission made up of all-elected representatives and demanded the participation of two Republicans. The proposed Redistricting Map concocted by the Legislative Redistricting Advisory Commission is nothing short of ridiculous and continues the “rigged” districts to benefit Democrat candidates or incumbents for Maryland offices.

With all of the debate and evidence being revealed about election fraud, this gerrymandering is just another political ploy to manipulate election outcomes, which in fact deprives the voters of free and fair elections.

I expect you to conduct your affairs, as representatives of the people of Maryland, to stand up and be Statesmen and Stateswomen *by voting against this partisan map* drafted by those that benefit most from it, the elected Democrats.

Best regards,

Amy Leahy
