

December 2, 2021

For quite some time Maryland has been acknowledged as the worst gerrymandered state among all Democratic (Blue) states. Voter dilution and voting rights violations have been at the congressional, state, county, and municipal levels.

The public is looking for reform. For the congressional districts, let's go with the independent commission's map. After adopting that map, our politicians will be able to stand up to voter dilution in Republican jurisdictions.

Thank you.
