

My name is Amy Waychoff and I am testifying in opposition to HB0001. It is clear that the legislature has no real interest in public input or transparency.

The map chosen for Congressional districts is so gerrymandered that it received a failing grade from the Princeton Gerrymandering Project. An "F" was given in the Partisan Fairness category stating "significant Democratic advantage" and Geographic Features: "non-compact districts, more county splits than typical."

Receiving a failing grade during this process is embarrassing at best and disgraceful at worst. The Democrats already have seven out of eight districts drawn to their favor, but they are greedy for more. I am embarrassed to live in a state with such a hyper-partisan legislature.

Please do not vote for this map.
