I am not in favor of the map drawn by our partisan politicians. It hasn't been fair for years and I don't see it getting any better. Our elected public servants only care about one thing, their preferred party having a super majority. Why don't you actually try to represent the people that live here in Maryland. If you think your ideas are so wonderful, why don't you let people decide WITH fair district maps!! Please do not pass another gerrymandered district map, let's show those other states that suffer from the same thing how to do it right. Let's show them Maryland is a state that cares about ALL it's citizens and wants to represent them all fairly and equally.
