HB0175

Public Safety – Ammunition – Sales & Transfers

Unfavorable

This bill is a direct violation of an American's right to privacy. Ammunition, which obviously plays vital in the role of hunting and target shooting should be readily available to any American who desires it. This bill will not prevent gun-related crimes, as those who are committing gun-related crimes are not legally purchasing ammunition and firearms in the first place.

The amount of ammunition each American owns is of no value to the State and federal governments – it is purely an overstep of authority into the daily lives of many Americans. These are not the Americans that should be persecuted, rather the ones committing the crimes. Focusing on gun safety, and inner-city crime prevention/community reach-out will prevent gun-related crimes before tightening the fist on law-abiding citizens will.
