Re: House Bill #304 State and Local Government – Participation
in Federal Immigration Enforcement

Dear Sir or Madam:

I am opposed to the passage of House Bill #304.

My ancestors from England, Ireland, and Italy came to the United States of America as immigrants. They assimilated, learned the English language, and became US Citizens.

All of their children learned the history of America and pledged allegiance to our magnificent Red, White, and Blue American Flag!

I oppose illegal immigration practices in the United States and, especially, in the State of Maryland. As well, I object to reduced funding to support law enforcement in this important work to keep our communities safe.

I object to State and local policies which impose limitations on illegal immigration enforcement.

I wholeheartedly support that all State and local law enforcement personnel and associated authorities process criminal illegal immigrants as required – including deportation.

In closing, I respectfully encourage those people from other countries who want to live in the United States of America to stand in line and wait their turn.

Our tax payer dollars should not be spent to support and protect illegal immigrants – especially those who engage in criminal activities while living illegally in the United States.

Sincerely,

Deborah Fuller
