

Bill: HB716  
Name: Flossie Rosser  
Position: Favorable

As an educational advocate in Harford and Cecil Counties, I have seen first hand the impact that not receiving educational testing has on students. Throughout both counties, I have seen an increase in the number of students being denied access to testing during the pandemic. Schools are not equipped to support students with all the testing they had previously provided, prior to the pandemic. This leaves students without access to receiving timely support they need through an IEP or 504 process. Please consider supporting this bill to ensure that children and youth with unique educational needs receive the support they need to be successful with their educational growth.

Thank you,

Flossie
