The Maryland State Child Care Association (MSCCA) is a non-profit, statewide, professional association incorporated in 1984 to promote the growth and development of child care and learning centers in Maryland. MSCCA has over 4500 members and our members provide care and education for Maryland children and support working families. We believe children are our most important natural resources and work hard to advocate for children, families and for professionalism within the early childhood community.

**Testimony Concerning HB 608:
Child Care Provider Support Act
Submitted Appropriations and Ways and Means Committees
February 3, 2021
Position: Support**

MSCCA fully and enthusiastically supports HB 608 and applauds the efforts of Delegate Solomon in sponsoring this legislation to take important steps to ensure a critical source of funding for child care providers that will offer support through grants as the State reopens and their enrollment capacity increase. The grants may be used for payroll expenses, rent or mortgage payments, utility expenses, and other operating costs, including PPE, cleaning supplies which have skyrocketed in price. MSCCA also supports the innovative solutions for distributing grants through Department of Commerce as MSDE does not have an efficient system in place to ensure timely distribution of critical grant funds.

MSDE data shows there were 7, 858 licensed providers pre-pandemic in March 2020. As of December 2020, MSDE shows that currently 6, 577 licensed providers have completed a form and been approved to reopen to serve children and families. There are 977 that have not submitted a form to reopen yet and 279 have permanently closed. The loss of businesses and therefore the loss of tens of thousands of slots is deeply concerning. Significant closures means less choice for families and possibly less affordable choices. Families will suffer a shortage of child care when they need or believe it is safe to go back to work. Delegate Solomon understands child care needs help now. The programs that are currently open serve roughly 45-55 percent of our historic capacity. Our members are small businesses and often women and minority owned. Our essential service enables Maryland's economy to flourish. When the State shutdown, thousands of our licensed programs remained open, many risking their own health to serve families and save their businesses. We are all concerned about the future of child care and the workforce. In the best of times, the America's child care industry operates on razor-slim margins. Providers have high fixed costs and important teacher-to-child ratios that cap revenue capacity. Due to the COVID-19 pandemic, our providers have faced catastrophic reductions in children served while fixed costs were unchanged and additional expenses incurred due CDC guidelines for child care.

Experts conveyed to Congress child care would need 50 billion dollars infused to states to recover. Congress approved 10 billion. Maryland will not get enough federal funds to recover fully. HB 608 will help in the effort to secure critical grants from the state to supplement costs.

While our programs remain on the brink of financial ruin, endangering the broader Maryland economy, we believe the support of the government can help stabilize our programs and bridge the gap between reduced enrollment and full enrollment. Child care is essential and

Maryland should not only depend on federal dollars for COVID 19 relief efforts for child care.

It is time to recover, rebuild, provide support and stabilize the child care industry which supports working families in our state.

MSCCA urges a favorable committee report.
