

Testimony in SUPPORT of HB0708 – Comprehensive Climate Solutions

Dear Chair Wilson and members of the Economic Matters Committee,

I support HB0708.

The Eastern Shore of Maryland will be subject to sea level rise before most of the area of the United States due to human induced climate change. This bill proposes actions in which Maryland will reduce its' production of greenhouse gas emissions, which are a major cause of human induce climate change.

My waterfront home is located on coastal bays of the Eastern Shore of Maryland. My home's existence and value are threatened by rising sea levels. Action is required by my state legislators to protect me and my family from future harm, which has been clearly identified by U.S. scientists.

Respectfully,

Joseph Jankowski  
Berlin, Maryland 21811
