

All filing fees shall be canceled as well as the personal property taxes shall be lowered by 80% per filing.

MD has done very little to help the Small Business. As a business owner I find it borderline mental to pay for taxes/filing fees especially when scammers actively watch for newly registered businesses on SDAT. Upon registering my business I had several run-ins with scammers creating duplicate businesses and using my trade name. There was 0 help on the states side for remedial action and years later there still is 0 help. Since then I have not made any filings(I will not support something scammers make money off of). Simply put it's a great way to take the working man's money and put money in the pocket of the white collar con artist. How has this benefited Small Businesses in any way?
