

Maryland Chapter
P.O. Box 278
Riverdale, MD 20738

Committee: Education, Health, and Environmental Affairs
Testimony on: SB 163 – Election Law – Ballots – Processing and Reporting Procedures
Position: Favorable
Hearing Date: January 26, 2022

The Maryland Sierra Club urges a favorable report on SB 163. The bill establishes uniform statewide procedures for the canvassing of and curing of errors in submission of absentee and provisional ballots and requires that all election results be reported by precinct.

The Sierra Club and its members care about both the natural and human environments, including ending racial and social injustice. As a grassroots organization, we believe that voting should be as accessible and convenient as possible for all eligible voters, regardless of whether they choose to vote in person at Early Voting Centers or on election day or by mail.

In Maryland some mail-in ballots get rejected because of relatively minor problems. According to the 2020 Election Administration and Voting Survey that the State Board of Elections sent to the U.S. Election Assistance Commission, 1511 Maryland voters' ballots were rejected in the November 2020 election because the voter's signature was not on the outer return envelope.

As many as 18 states have formal processes that allow voters to cure minor problems so their votes can be counted. While at least some local boards of elections in Maryland did alert voters and allow them to cure problems, there is not currently a uniform statewide standard or process. This bill would establish a uniform ballot curing process that will ensure all voters are treated fairly and equitably no matter where they live in the state.

The bill allows election officials to begin examining absentee ballot envelopes early enough to identify problems such as a missing voter signature, notify the voter, and allow a reasonable time for the voter to correct the error so that their ballot can be counted. The bill does not allow votes on the ballots to be tabulated before election day so there will be no risk of premature disclosure of partial election results.

A voter who is unsure whether their absentee ballot has been received and will be counted may go to the polling place on election day and cast a provisional ballot. This bill sets forth reasonable and workable rules to guide election officials in determining whether the absentee or provisional ballot should be counted. Reporting all election results by precinct will increase transparency and confidence in the election process.

Voting is the foundation of our democracy, and we believe it is essential to our democracy and to racial and social justice to make the process of voting as accessible and convenient as possible for every individual who is eligible.

We urge a favorable report on SB 163.
