

House Bill 1108 – Real Property – Land Installment Contracts – Requirements and Vendor Duties and Limitations

Position: Support

Maryland REALTORS® supports HB 1108 which seeks to provide greater disclosure and a quicker transition in land installment contracts.

Although not common in real estate, land installment contracts can be good tools for renters seeking to purchase a home but not yet in a position financially to afford it. Most land installment contracts are a separate contract with a renter that will allow them to pay toward the purchase of the rental property while still a tenant of that property.

HB 1108 would make some important changes to the law, including: providing a title search at the time the renter/purchaser enters into the land installment contract; separate notice of liens that may exist on the property; the amount of the principal and interest for each installment payment; as well as notice about any balloon payment.

Finally, under current law once a purchaser pays more than 40% of the original cash price of the property, the purchaser may demand grant of the premises as long as the purchaser obtains financing. That 40% trigger would be lowered to 20% under the bill.

Land installment contacts can be useful tools for renters seeking to be homeowners and HB 1108 will create a more transparent and fair process. The REALTORS® encourage a favorable report.
