

Appliance Standards Awareness Project

2022 State Appliance Standards Recommendations – ADAPTED for products in Maryland Bill

Assumptions for national annual shipments, average lifetime, per-unit savings, per-unit incremental cost, and percentage of shipments already meeting standard level

Product	National annual shipments in 2024 (million)	Average lifetime (years)	Per-unit annual savings*	Units	% savings relative to baseline products	Per-unit incremental cost (2020\$)	Adjusted market share of products already meeting standard level**

*For portable electric spas (standard/exercise/combination), the per-unit savings take into account sales that already meet the standard.

****We used the estimated current market share of compliant products in the calculation of total savings and costs with the following exceptions: For high CRI fluorescent lamps, the estimated shipments include only T12 lamps (i.e., they do not include shipments of compliant replacement options such as widely-available LED tube lamps), so accounting for the current market share of compliant products is also not needed. For the plumbing products (faucets, showerheads, toilets, and urinals), we adjusted the estimates of the current market shares of compliant products to take into account that a significant portion of current models have efficiency levels that fall in between the baseline levels and the recommended standard levels. Adjusting the market shares avoids overestimating potential savings.**
