

Abortion is murder, it is not a form of free birth control, that the taxpayers will provide. Unthinkable there will be no age on statutory rape. Do you even listen to the debates and arguments? This is frightening and unacceptable hurting our children not the offenders. What are you thinking? That there will be no repercussions to your horrific actions. If not in this life then in the next. Do the right thing protect the most precious gift of life and allow our children to be that- children, not making a transgender decision as a child. Let them be carefree before the world, social media and peer pressure beat them down.
