

Dear Senators,

Please veto and stop the HB1171, it is very ambiguous and not really focused on the wellbeing of people. The world has already too much of this reproductive rights help, this radical bill talks about rights, I have heard too much of rights but never heard at all about responsibilities. We cannot give more degradation to the new generations. We have worse problems in the world, do you know why Global Warming is ignored? Because our Senators use all our tax money in abortions instead of taking care of the Ecology.

These types of bills like HB1171 are creating monsters that will end up hurting and killing us all. The Senators who are trying to pass this bill are making our youth and children weaker instead of stronger, putting them to the risk of dying by suicide, and depression for the enormous confusion of a turmoiled world where our politicians are passing laws for personal interests. The Senators are teaching our future generations that the good is bad and the bad is good. Putting them at risky procedures rather than being responsible for their own body and carefully choosing to care for themselves. I don't see any good intention in this bill and it will bring horrible consequences to Maryland, to the United States and to the world. Right now we are in the risk of a new 3rd World War, but how is the world going to have peace when mothers kill their babies inside and outside the womb? Dogs, turtles and other species are more protected now than humans. Just as a mother is supposed to protect her baby, politicians are placed to protect citizens and if you are supporting this kind of bill, Senators you are not doing your job. You should make laws to protect our children from predators. Please veto and stop HB1171, I am sure your name will be written as one of our modern heroes, your hands will be clean and you will find peace in your life. Please contact me if you need anything else.

Thank you.
