

Regarding House Bill 1171

I am writing today to state my disapproval of House Bill 1171. I am against eliminating statutory rape laws and age of consent laws. I am also against surgery performed on a minor without parental consent. Abortions should not be lawful for Maryland residents or residents of other states. We need to protect our children- born and unborn. We also need to protect their childhood and their quality of life. This HB1171 is not about "Reproductive Freedoms", but about disrespect for human life and dignity.
