In my opinion, HB1171 should not pass in the House, should never have passed in the Senate and should never have entered the mind of any sane person! This is an egregious bill; diabolical in nature and antithetical to any good, moral conscience. There is no age designation in this bill; therefore, a child of any age can be ravaged without mercy. There is no recourse to justice for those who become victims of this bill, allowing perverts and pedophiles free access to commit horrors on the innocent again and again. It leaves me wondering about the life styles of those who have presented and passed this bill. Please tear it up and burn it - do not pass it.
