

To the Maryland General Assembly,

I wish to express my opposition to HB1171. This bill illustrates unlimited access for individual(s) to gruesomely terminate a pregnancy at any time. In addition, this bill, eradicates statutory rape laws and age of consent laws. Therefore, this is profoundly damaging to children and young women. Furthermore, this is destructive to unborn children and their right to life & liberty. The thought of a young girl going to the abortion clinic to murder their child without any parental knowledge is reprehensible. Nevertheless, parents are responsible for the well-being of their underage daughter and to assure a "Life Saving" alternative for the child in the womb. Nevertheless, a governing body pushing to have this type of legislation embedded as a constitutional amendment or under the guise of any law is bizarre. God will judge this government for every word stated on this bill and will judge this government for ratifying such a demonic atrocity. For certain, all of it is evil and there is no justifying a word of it. I pray the Holy Spirit will direct this governing body to completely rescind their support for this bill. The most basic human right and equality under the law is "The Right to Life". Thank You for accepting my testimony and God Bless.
