

Hi,

I'm against the bill HB 1171 for the following reasons:

1. To protect the young and inexperienced minors who are not capable to comprehend the complex of adults' tricks, especially the sick-minded individuals. Minors don't understand the consequences of having sex the way adults do. If these adults are not fairly penalized/disciplined, they will continue to harm the minors, not only physically but mentally. This will take away the chance for the minors to contribute to the society in a natural way. A 16 – 17 yo boy/girl would be more lively, creative, effectively learning to cope with peers, and effectively learning to grow together with their own peers. When he/she dates and has sex with an adult, the relationship is now on the deeper level, the level of belonging together, both body and souls (assuming there's a real love between them.) When this happens, naturally, the teen would no longer be hanging out with his/her teen friends. This teen would skip a few important years of his/her life. These are the years the teen's trying to identify himself/herself.
2. No abortion. It's a murder act. It's double wrong when minors can do this without parental consent. Why parents need to agree for their children to bring the asthma inhaler to school but parents are not needed to know when their child is under a procedure, a very dangerous one indeed?
3. Taxpayers have no obligation for paying these kinds of services. I don't need to write too long for this. It's common sense that my 3rd grade child can understand. We pay for our own choice benefit/choice (good or bad.) The only time we share the cost as a community is when it serves common good.
