

How has America as a country let alone states come down to this, Similar to how sepreart states diveded away from the rest of the US. How can we let this happen, killing the Future of America. This Bill Spits in the face of those who wrote the constiution because it directly conflicts with the 5th and 14th ameandments along with slapping the American people who go agianst this genocide in the face. Think down deep and vote against this bill. The Country is watching.
