

I am against HB1171, please vote NO. Every adult individual has the right to choose whether they should engage in acts which may lead to pregnancy. No one should be able to force themselves on another. If a rape occurs that is in violation of the victims' rights and the perpetrator needs to be held responsible and receive consequences for those actions. Pregnancy is a natural consequence of sexual intercourse. If one chooses the act, in doing so, they choose the consequence. Tax dollars should never be used to pay for an abortion. Minors must always be explicitly excluded from any legislation in regard to the reproductive acts. Children must be protected from government overreach and parents must always give consent to any medical treatments of minors. There is never a time when sexual acts are permissible with a minor. Please vote against HB1171.
