

I strongly object to the proposed House Bill 1171. I find it completely disgraceful to attempt to introduce a Bill that will eliminate any possibility for parents to be knowledgeable about their children's actions as pertains to their reproduction future. The possibility that it would be possible to rape a child by an adult with no criminal consequences and for Maryland to become a haven for abortion and murder of innocent life is inexcusable! To aggravate this even further knowing that this will be available free of charge to people receiving this "service" to any person.

What future do we leave for our children, grandchildren and society if this is allowed to become law.

I urge you to prevent this bill from moving forward.
