

HB1171 must be defeated. My goodness, where have we gone as a God-fearing people if we are to legislate the protection of murdering another human being. Regardless if this human being is in the womb, it is STILL A HUMAN BEING. There can never be ANY extenuating circumstances where such a protection of murder is justified. You must be completely ashamed of yourself to even promote such a bill. Please come to your senses here and do away with this Satanic bill in its purest form. Stop it now.

Dr. J. Robert Bois
