

I ask you to search your conscience and to take a stand against HB1171, titled the “Right to Reproductive Liberty”. This bill should be renamed the Blood Covenant with Death because that is what it is.

There was time when the science for when life begins was not clear and so it was theoretically possible that abortion was simply the removal of a sack of cells, but now even the scientific community is moving closer to confirming that life begins at conception. I ask you to carefully read and consider all of the studies listed at this website which support my statements. (<https://www.princeton.edu/~prolife/articles/embryoquotes2.html>)

Things I know beyond a doubt to be true. Abortion is a concept straight from the pits of hell. It is the exact opposite of what Jesus did on the cross, instead of giving your life to save another, you are taking an innocent life to make your life easier. No one can deny this.

Even if you are medically at risk, YOU are offering the life of your baby in exchange for your own. YOU are making that choice and YOU will have to answer to God.

God abhors the shedding of innocent blood. Your only protection from his wrath is the blood of his only son which washes away all stains, no matter how grievous and presents the sinner in righteousness before his Creator.

I’m sorry, but the truth is without his blood, YOU who support abortion are heading to the pits of hell where this practice came from.

You cannot be born again and approve of a practice which is the exact opposite of what Jesus did on the cross.

Any church which preaches otherwise is not from Jesus Christ.

This is more than just a collection of human cells.
