

I believe in the respect for life from conception to natural death. I have 2 daughter-in-laws who were adopted as babies. Because their birth mothers chose to give them life, and then their adopted parents chose life for them again, there are 7 more beautiful lives in this world, our grand children.

Because of the way this bill is worded, a young girl of any age from any state can be the victim of an abortion, (yes, the girl is a victim along with the child aborted). Because there is no mention of age of consent or parental consent, the girl may have been raped and transported across state lines to your state, without the help of family or law enforcement help, to be given an abortion. Most girls, women are very vulnerable and scared, and need the support of family or friends for such life altering decisions. Tax dollars should never be used to facilitate death, the death of a human being alive before killed by abortion.
