

Dear Md Legislator,

For 10 years I have worked providing support, counseling, material assistance and education to pregnant women and their families. Those who have aborted their children are devastated at their loss. We work compassionately to help them gain again a true hope for their new families. I often say to these beautiful women I am so sorry that our society encouraged you, when you were vulnerable, to abort your unplanned child. Instead we, as a society, ought to be cherishing you and your unborn child throughout every moment of your pregnancy and helping you to succeed or to perhaps offer your child to prospective adoptive parents. Our society in Maryland can live this good way. Please say no to abortion and yes to love of our neighbor.

Sincerely,

Marie Fitzhugh
